Abstracts

The biosimilars industry has been growing stupendously across the globe for the past few years. Increasing healthcare costs, major blockbuster drugs about to go off patent and rising aging population are driving this industry, which stands at a vivid position, and is expected to evolve greatly from its current state. With the governments and private players worldwide stepping into this industry, the market shows bright prospects and immense opportunities to cash in on.

As per the estimations of our latest report, “Global EPO Biosimilars Market Outlook 2018”, the global EPO biosimilars market will grow at a CAGR of around 37% during 2013-2018. Our report provides a thorough study of the EPO biosimilars market, and its future outlook. Firstly, we have provided a basic overview of the total biologics market, along with its current and future size. Next, we have highlighted some of the major trends and drivers which would be responsible for shaping the global biosimilars market. Some of these trends are rising collaborations among major pharma players and strong government support to encourage the growth of biosimilars. This is then followed by the total biosimilars market and its future size. The key segments of this market and their respective shares have also been highlighted.
