Abstracts

The Indian Mini Excavator industry, which is going through a phenomenal growth phase, offers to its players' immense opportunities to grow their business. This sector will certainly witness growth in the long run but progress in this industry is directly related to demand from the construction industry which is further bifurcated into two i.e. real estate and infrastructure industries. And, with smart cities in the pipeline, increasing infrastructural investment in road construction and housing projects will ensure growth of the mini excavator market in India. Moreover, rise in diesel prices will support the demand growth as mini excavators are more fuel efficient than heavy excavators.
