Abstracts

The software-defined networking (SDN) is a burgeoning industry and it exhibits immense potential for growth in coming years. Factors such as rising need for mobility across enterprises, an efficient network of infrastructure and declining cost of network maintenance & operations through SDN deployment are driving the growth of the SDN market. Considering these, the market is slated to grow at a CAGR of a whopping 62% during 2014-2018.

In their latest research study, “Software Defined Network Market Outlook 2018”, RNCOS’ analysts have identified and deciphered the market dynamics in important segments to clearly highlight the areas offering promising possibilities for companies to boost their growth. The report studies the market on three main grounds viz. by Segment (Network Infrastructure, Network Software, Network Services), by end-user (Enterprise, Service Providers, Public Sector) and by Region (North America, Europe, Asia-Pacific, RoW).

The different trends & drivers of the market too have been studied along with forecasts to provide an understanding of the market’s dynamics. Further, the market’s Inhibitors have been discussed to aid players in designing their business strategies and provide them with key insights that will help them boost their profits.

Moreover, with a view to providing a balanced outlook of the global SDN market to clients, our report also includes the profiles of key industry players with their recent market activities.
