The Turkish pension market is very strong and dynamic, evident from its response to the ongoing financial crisis. Amidst deepening global financial crisis which has resulted into downward trend in pension funds all around the world, the Turkish pension market has shown strong immunity to the crisis.

Unlike the rest of the world, the number of pension funds participants in Turkey has been increasing at fast pace because of its strategy of safe investments. People prefer to invest in less risky instruments like pension funds, says a new report, "Turkey Pension Fund Market Forecast to 2013" by RNCOS, a leading market research firm.

The report provides extensive research and in-depth analysis on the Turkish pension market. It will help clients to analyze the leading-edge opportunities critical to the success of emerging private pension market in the country. Detailed data and objective analysis along with quantitative statistics will help players to navigate through the evolving pension market in Turkey.

Our research provides forecast (2009-2013) on

Number of participants in the system

Number of potential prospects in the system

Investments in pension funds

Prospective investments in pension funds

The forecast given in the report is not based on a complex economic model, but is intended as a rough guide to the direction in which the market is likely to move. The forecast is based on a correlation between past market growth and growth of base drivers.
