Abstracts

With rising initiatives by government, the UAE Healthcare market is witnessing an astonishing growth. This is due to sedentary lifestyle by the people of Emirates and growing medical tourism in the region. Also, the UAE government is extensively expanding and upgrading its healthcare system to develop strong world class healthcare infrastructure. The government is also encouraging private sector participation to upgrade the existing infrastructure and match the quality of services offered in developed countries.

Further, the UAE Government is liberalizing policies to attract foreign investments, in order to improvise the healthcare standard and boost the healthcare industry. Our holistic research and analysis depicts that the healthcare market of UAE will grow at a CAGR of around 10% during the forecast period 2019 to 2023.

According to our latest research report titled, "UAE Healthcare Sector Outlook 2023", UAE has witnessed significant deals in terms of mergers, acquisition and strategic tie ups between healthcare stakeholders, public and private entities to enhance the healthcare industry. Our report provides an extensive information and rational analysis of UAE's healthcare market. An individual market analysis of key emirates describing their healthcare infrastructures, resources and future outlook will help build a clear understanding of the industry's performance.

The report provides an in depth analysis of the contribution by private and public sector to the country's healthcare industry. Various government initiatives in terms of health programs focused on training & development, investment and regulatory reforms have also been mentioned. The report includes a study of demand for hospitals and number of hospital beds along with current investment opportunities and competitive landscape of the country's pharmaceutical players and hospitals, which will help the client to understand the market structure and potential growth.
