Abstracts

Steel is a major component in buildings, tools, automobiles, and appliances, hence making steel consumption an important indicator of economic growth and prosperity. GCC steel production is fairly fragmented, and UAE's steel demand has made it one of the largest consumers in the GCC region. The region is investing Billions of Dollar in construction projects, mostly in preparations for World Expo 2020 in Dubai and FIFA World Cup 2022 in Qatar. It is anticipated that steel consumption in UAE will grow at a CAGR of 8% during 2016-2020.

In the latest research report "UAE Steel Industry Outlook 2020", our analysts have studied the UAE steel industry's performance, which is currently a key growth market in terms of production, consumption, import and exports due to the fast-expanding construction & infrastructure sector. Our research is an outcome of extensive primary & secondary research, and thorough analysis of industry trends.

The UAE steel industry worldwide has been experiencing growth in the region, and the country's key players are holding a strong imprint in the steel market globally. In addition, it also covers the production and consumption forecast till 2020 of crude and finished steel. Finished steel has been further segmented into long and flat products. Long products have been further classified into rebar and structural sections. Extensive research and analysis revealed that long products occupy the maximum share in finished steel consumption. In long products, rebar dominates finished steel consumption in UAE. Similarly, flat products have been segmented into coils, strips & sheets and plates. Our comprehensive report has closely studied and provided market forecast till 2020 for production and consumption of both long & flat products and their types.

It further provides a comprehensive analysis of UAE's steel export and import, which includes the steel trade scenario by product, covering ingots and semi-finished steel,

long products, flat products and tubular products. In addition, the section provides a list of major countries involved in the export of steel to UAE.

Our report has also provided a brief overview of the drivers and competitive landscape covering the profiles & key management people of various industry players. Thus, the report covers all the important aspects of the UAE steel industry, which will prove decisive for the clients.
