## Abstracts

The US has a dominant share in the global medical imaging devices industry. Commercialization of advanced systems, including multi-slice computer tomography (CT), high field magnetic resonance imaging (MRI), 4-D ultrasound, and positron emission tomography (PET)/CT scanners in the recent past has given a boost to the industry.

According to the report, "US Medical Imaging Devices Market", the US medical imaging devices market is anticipated to grow at a CAGR of around 9% during 2010-2013. Factors including an aging population requiring more intensive medical care and technologically advanced products that improve diagnostic and therapeutic outcomes are likely to drive the industry towards a stupendous growth trajectory in the future. Further, the latest medical imaging devices require higher resolution, 3D imaging techniques, and lesser image capturing time. Apart from it, increasing demands of the underlying electronic components with faster processing and higher resolution coupled with more sensing and transmitter channels will also upsurge the future market growth.

Our research on the industry revealed that, the US market for medical imaging devices is highly competitive with few industry leaders. The leading manufacturers of medical imaging products for the US market include General Electric, via GE Healthcare; Germany-based Siemens, through Siemens Medical Solutions USA; and the Netherlands-based Royal Philips Electronics, via its Philips Electronics North America healthcare business.

Our report "US Medical Imaging Devices Market", analyzes the US medical imaging devices industry, by segmenting it into CT scan, MRI equipments, X-Ray Systems, Ultrasound, and Nuclear Medicine Imaging. Each of these segments has been thoroughly studied and existing products and recent development have been covered comprehensively. Moreover, the report also provides an overview of the recent trends,

competitive landscape, and regulatory environment in the US medical imaging devices industry in the country, which will facilitate our clients in identifying the future demand scenario.

The report also includes a section of current market performance and future projection that presents a rough idea about the prospective market trends to facilitate clients comprehends the market progress in coming years.
