The market for ADC payloads or warheads is currently estimated at \$267 million in 2022 and is projected to growth with a CAGR of 12% in the forecast period.

With six approved drugs, including POLIVY™ (2019), LUMOXITI™ (2018), BESPONSA® (2017), MYLOTARG™ (2017, reapproval), KADCYLA® (2013), and ADCETRIS® (2011),

and a pipeline featuring more than 300 candidates in clinical or preclinical stages, antibody-drug conjugates (ADCs) have emerged as a promising class of therapeutics for various disease indications. Over time, medical researchers have advanced their understanding of ADC design intricacies and streamlined the development process of these complex pharmacological interventions.

ADCs are engineered therapeutics composed of monoclonal antibodies linked to potent cytotoxic payloads via chemical connectors. Due to the high potency of ADCs' cytotoxic molecules, their manufacturing demands sophisticated technical capabilities and highly potent chemical substances. The multi-step production of cytotoxic payloads used in ADCs necessitates a controlled environment, specialized manufacturing facilities, dedicated analytical and purification techniques, and storage infrastructure. However, many ADC developers lack in-house capacity for commercial-scale manufacturing of cytotoxic payloads and, thus, rely on contract manufacturers. Estimates suggest that 70-80% of ADC manufacturing operations are outsourced.

Since 2000, various contract manufacturing organizations (CMOs) and contract development and manufacturing organizations (CDMOs) have emerged, offering services related to highly potent active pharmaceutical ingredients (HPAPI) and cytotoxic drugs to meet the rising demand for cytotoxic payloads in ADCs and similar therapeutic interventions. Additionally, numerous ADC developers have established strategic partnerships with payload providers to advance the development of ADC candidates in their pipelines. With the increasing number of ADCs in clinical development and ongoing technological advancements, the ADC payloads and warheads market is expected to witness significant growth throughout the forecast period.
