ABSTRACT

Purpose – Public private partnership (PPP) is the structure which contains both parties to productively attain projects of long term to transport what the nation and people want. To catch the attention of the private sector to contribute and give the services required with the predictable high qualities and techniques, the public sector requires improving the surroundings to make possible PPP implementation. This research will examine theoretical success factors of implementing PPP projects in Kuwait.

Design/methodology/approach – This is an exploratory research as the main objective of this research is to find critical success factors of housing public private projects. In this research, the data will be gathered through survey questionnaires. The quantitative data will be gathered from various articles and research papers for evaluation of literature review. The data will be analyzed by SPSS and MS excel. Various articles are examined for analysis of literature.

Findings – The research study gives complete information about the critical success factors of implementing housing welfare units on Public Private Partnership (PPP) in Kuwait. It is recommend in the research the both public and private sectors should work together to get significant results. Association among public and private sectors is necessary to make good implementation of projects.

Research limitations/implications – Like several other researches, the current research has several limitations such as lack of resources and time. The sample size of companies is also limited which affect the reliability of results.

Practical implications – This research is great contribution in past literature. The policy makes can take help from this research to make effective policies and strategies. This is effective contribution in past literature.
