Abstracts

The use of various biometric technologies is increasing all around the world as well as in UK. The government of UK is using the technology for many our poses like access to computer networks, security issues, fraud detection etc (Parliament. UK, 2010). The biometrics industry has a growth rate if 14% each year. This is a system of personal identification by assessing the physical or behavioral traits of human beings. There are several types of biometrics available like eye detection, ear detection, face recognition, finger print recognition, voice recognition etc. These all are use to authentic the access or use of something either in public or private sector (IDPC.gov, 2015).
