Abstracts

Al Razi is a popular and well known person in the Islamic history that attained a reputable name and position in the field of medicine, alchemy, philosophy and various other fields of science. His progress in various fields of sciences was not considered during his life period as many authors do not appreciate his ideas in the field of science. All of his work is essential and crucial. His major contributions are his encouragement in the field of doctrine that serves the human beings in efficient manners. In the field of philosophy he elaborates the various factors of Plato and Socrates and his mostly work inspired by the Timaeus. He was also famous for the five elements that he describes and these elements or factors are God. Space, matter, time and the soul and the concept of happiness that is elaborated by him the outcome of the basic harmony along with various alterations that creates pain [Continued..... please purchase to read it full]
