Abstracts

This research article is focusing on management accounting practices and the utilization of the process costing and job order costing in the different corporations. For the purpose of analysis three production corporations in the public sector of the Barbados is selected. Semi structured interview conducted with the financial management, production and operational managers and also with the supervisor of the three selected corporations in the Barbados. Respondent's show that the management accounting tools make them able to get the desired data for the sensible decision making process. According to the results of the interview it is revealed that the job order costing is best when the goods manufactured by the companies are of different nature and the company assign the cost to the specific batch or job while for the companies with the similar goods production as in mass production then the process order costing is the best option. The results further show that the no complicated management accounting tool and software was utilized to get the data other than the routine accounting software. Timeliness, efficiency, data requirements, technology and the adaptability of the excellent practices were crucial element affecting the option of the management accounting tasks used. Participant of the study perceived that the management accounting tasks employed in the selected corporations were very crucial and it play vital role in the progress of the corporations. It was also find out that the management accounting tasks were in alignment within the group and the companies in the Barbados select the costing system depending on the nature of the products produced by the manufacturing companies in the Barbados (Philmore Alleyne & Diana Weekes-Marshall, 2011).
