Abstracts

This is the latest and most up-to-date Market Report from Select Biosciences addressing the adult stem cells marketplace. In this report, we focus upon adult stem cells (especially mesenchymal stem cells; MSCs) and their properties making them highly suited for the development of cellular therapeutics.

This report details the current status of the cellular therapeutics marketplace, products that are commercialized, market potential, clinical trials pipeline and characterization of this pipeline by therapeutic class. The report also provides an analysis of the cellular therapeutics that are currently performed and categorizes them according to type/class of adult stem cell utilized as well as disease(s) treated.

This report analyzes the umbilical cord blood marketplace from a technical as well as market perspective describing the types of transplantation utilizing cord blood, disease classes treated, size of public cord blood banking, associated growth, as well as market drivers and associated qualitative trends.

This report presents an exhaustive analysis of the commercial trends in stem cell research by describing the quantitative metrics (market size, growth rate, segmentation), as well as data from primary market surveys describing trends in stem cell research from the bottom-up. These data are derived from Select Biosciences worldwide pool of researchers and therefore provide invaluable insight into stem cell research trends (both qualitative and quantitative).

This data-driven characterization of the adult stem cells market landscape is a hands-on document that can be used for competitive benchmarking, business planning, and strategy development—all the data that have been collected in this industry analysis are presented and they form the basis for the conclusions drawn throughout the market report presented in a format enabling “drag-and-drop” into business

presentations/business plans.

Extensive Worldwide Technical and Market Analyses Presented in this Report:

Characterization of Mesenchymal Stem Cells (MSCs)

Their biological properties

Mechanisms of tissue repair/regenerative function in vivo

Characterization of the Cord Blood Stem Cell Marketplace

Quantitative utilization for various disease classes

Utilization from different patient types (adult versus pediatric)

Size of the public cord blood banking space—number of stored cord blood units available for transplantation

Growth rate of the public cord blood banking space

Distribution of selected cord blood banks by worldwide region

Adult Stem Cells Commercialization Quantitative Trends

Cellular therapy market opportunity forecast

Growth rate

Breakout of the cellular therapy market by autologous versus allogeneic usage

Analysis of current stem cell clinical trials pipeline—by stage, by disease class/therapeutic area

Cellular therapeutic products currently commercialized and their quantitative market penetrance

Cellular therapies performed and their breakout by type of adult stem

cell, disease class (therapeutic area) addressed

Research Trends Analyzed by Bottom-up Worldwide Market Survey

Describes market segmentation by stem cell class

Utilization of different cell types for research in cellular therapy

Utilization of different cell types for drug discovery/development/toxicity screening assays

Types of assays for drug discovery/development/toxicity screening that are deployed using stem cells currently—assay class, market forecast

Markers used to characterize different stem cell types (pluripotent stem cells, MSCs, NSCs, HSCs)

Market penetrance of different vendors into the overall stem cell marketplace—by reagent class

Differentiation of different stem cell types into various cellular lineages

More details of the scope of coverage of this industry report are found in the Table of Contents (TOC) for the report—see below for link to downloadable PDF of the TOC

Contents

CHAPTER I. EXECUTIVE OVERVIEW

CHAPTER II. MESENCHYMAL STEM CELLS (MSCS) AND THEIR THERAPEUTIC

Potential
Adult Stem Cells—HSCs & MSCs: Cellular Therapeutics in the Near-Term
Properties of MSCs
Markers that Characterize MSCs
Multipotency of MSCs
Mechanisms of MSC-Mediated Tissue Repair

CHAPTER III. CORD BLOOD-DERIVED STEM CELLS AND THEIR THERAPEUTIC POTENTIAL

Umbilical Cord Blood in Hematopoietic Stem Cell
Transplantation
Engrafting Efficiency with Cord Blood
Transplant Trends for Pediatric and Adult Recipients: Market
Penetration of Cord Blood
Comparison of Cord Blood Transplants vis-a-vis Bone
Marrow Transplants
Cord Blood Units Worldwide Market Size and Growth Rate
Breakout of Public Cord Blood Banking by Country

CHAPTER IV. ADULT STEM CELL RESEARCH AND COMMERCIALIZATION

Market Segmentation and Industry Structure
Adult Stem Cell Market Projections and Timeline
Autologous versus Allogeneic Quantitative Market Segmentation
2011: Stem Cells Market Forecast by Segment
Stem Cell Primary Market Survey Highlighting Current
Research Trends (Qualitative and Quantitative Data/Analysis)
Publication Trends in the Stem Cells Space
Approved Cellular Therapy Products, Clinical Trials, and
Cellular Therapy Quantitative Market Trends

APPENDIX I. RESEARCH METHODOLOGY

I would like to order

Product name: Adult Stem Cells Market Trends 2011

Product link: <https://marketpublishers.com/r/ABE814FEC26EN.html>

Price: US\$ 1,986.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:

info@marketpublishers.com

Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page <https://marketpublishers.com/r/ABE814FEC26EN.html>

To pay by Wire Transfer, please, fill in your contact details in the form below:
