## Abstracts

Metal and mining companies are engaged in the production or mining of metal and ores. Mineral resources contain metal elements or compounds that can be extracted for industrial use. Metals include ferrous metal, non-ferrous metal, noble metal and rare metal.

In 2016, China's mining industry achieved total profits of CNY 182.52 billion, down by 27.5% YOY. This included CNY 40.37 billion in ferrous metal mining, down by 13%, which is 30.9 percentage points smaller over the previous year; CNY 48.33 billion was in non-ferrous metal mining, up by 9.7%, compared with the 19.3% decrease a year before; CNY 38.78 billion was in non-metallic mining, down by 6.5%, compared with 4.9% increase a year before. In 2016, completed fixed asset investment in the non-ferrous metal industry was CNY 668.73 billion, down by 6.7%; private investment was CNY 546.9 billion, down by 6.3% YOY.

Despite the overcapacity of metal production, the production volume continued to rise. In 2016, the production volume of crude steel was 808.37 million tons, up by 1.2% YOY; that of pig iron was 700.74 million tons, up by 0.7% YOY; that of steel products was 1,138.01 million tons, up by 2.3% YOY. In 2016, the production volume of 10 major non-ferrous metals was 52.83 million tons, up by 2.5% YOY and ranking the world's first for 15 consecutive years. Among them, the production volume of copper concentrate, primary aluminum, lead and zinc were 8.44 million tons, 31.87 million tons, 4.67 million tons and 6.27 million tons, up by 6%, 1.3%, 5.7% and 2% YOY, respectively; the production volume of copper products and aluminum products was 20.96 million tons and 57.96 million tons, up by 12.5% and 9.7% YOY, respectively. Income from main businesses in the non-ferrous metal industry was CNY 6 trillion, up by 5.6% YOY; profits were CNY 24.3 million, up by 34.8% YOY.

CRI believes that with surging resource prices and steadily rising demand, the market size of mining will remain stable. With slowed global economic growth, resource prices might fall modestly. The size of China's mineral mining and dressing market will grow steadily.

In this report, CRI analyzes 81 metal and mining enterprises listed in A-share market in China.

The report is composed of two parts: the first part is enterprise profiles and the second part is the operation status of these enterprises in the recent decade (presently 2006 to 2016, we will update it to the latest as time goes by).

The operation status is demonstrated from the following perspectives: (1) financial indexes, such as earnings per share, book value per share (BPS), sales per share, net cash flow per share, return on net worth and debt to asset ratio; (2) indexes on the income statement, such as revenue, operating profit, net profit and EBIT; (3) indexes on the income statement, such as revenue, operating profit, net profit and EBIT; (4) indexes on the balance sheet, such as liquid asset, fixed asset, current liability, non-current liability, capital reserve and shareholders' equity.
