## Abstracts

Depending on the location, scale, target customers, merchandise composition, in-store facilities, operation model and service functions, there are eight retail formats: department stores, convenience stores, supermarkets, hypermarkets, membership warehouse clubs, specialty stores, exclusive shops and shopping malls. To meet consumers' demand for convenience, quality and prices, new retail formats have emerged, such as specialty stores focusing on one variety, combination stores, duty-free stores, membership clubs and boutique supermarkets.

In 2016, total retail sales of consumer goods in China amounted to CNY 33,231.6 billion, increasing by 10.4% YOY. Urban retail sales was CNY 28,581.4 billion, increasing by 10.4% YOY and rural retail sales was CNY 4,650.3 billion, increasing by 10.9% YOY. In terms of consumption types, the sales of the catering industry was CNY 3,579.9 billion, increasing by 10.8% YOY and that of merchandise was CNY 29,651.8 billion, increasing by 10.4% YOY.

In 2016, online retail sales reached CNY 5,155.6 billion, increasing by 26.2% YOY. Among online retail sales, CNY 4,194.4 billion were physical goods, increasing by 25.6% and accounting for 12.6% of the total retail sales of consumer goods. Online sales of food, clothing and daily goods increased by 28.5%, 18.1% and 28.8%, respectively. The import and export value of cross-border e-commerce was CNY 6.5 trillion with an annual growth rate of over 30%. The growing cross-border shopping market has prompted many e-commerce and traditional retail leaders to step into the cross-border business.

According to CRI, in 2017, the growth of China's retail industry will slow down, rental and labor costs will go up while interest rates will go down. These will intensify industry

consolidation and increase the market concentration rate. Meanwhile, the integration of online and offline channels will be highlighted.

In this report, CRI analyzes 27 supermarkets and multi-format retailers listed in A-share market in China.

The report is composed of two parts: the first part is enterprise profiles and the second part is the operation status of these enterprises in the recent decade (presently 2006 to 2016, we will update it to the latest as time goes by).

The operation status is demonstrated from the following perspectives: (1) financial indexes, such as earnings per share, book value per share (BPS), sales per share, net cash flow per share, return on net worth and debt to asset ratio; (2) indexes on the income statement, such as revenue, operating profit, net profit and EBIT; (3) indexes on the income statement, such as revenue, operating profit, net profit and EBIT; (4) indexes on the balance sheet, such as liquid asset, fixed asset, current liability, non-current liability, capital reserve and shareholders' equity.
