## Abstracts

### Description

Aloe extracts are dried juice of liliaceous plant aloe barbadensis, aloe capensis or stripe aloe vera leaves. Major components include glycosides and saccharide such as aloin, isdobsrbaloin, 7-hydroxyaloin and 5-hydroxyaloin. Major functions are heat clearing, bowel relaxing, sterilization and antiphlogosis. Yuanjiang, Yunnan Province is a tropical greenhouse and typical dry-hot valley with an annual rainfall below the surface evaporation, which is suitable for aloe planting.

It is a trend to perform extraction, separation and purification of active aloe ingredients. Single or multiple active ingredients will be applied in pharmaceuticals and nutraceuticals after extraction and separation with efficient functions, leading to higher economic benefits.

The demand for barbaloin with a content of over 95% is large directly for pharmaceuticals in the international market. Certain market demand for acemannan with high purity exists for functions of antitumor and immunity enhancing. The development trend of the biological engineering and pharmaceutical industries is to extract and separate functional components from plants.

This report obtains first hand information of the aloe extract market through researches. It provides information to investors concerning the market status, competition status and development trend for opportunities through analyzing raw materials, production and demand of aloe extracts.

Through this report, readers can acquire the following information:

Development Environment of Aloe Extract Industry in China

Development Status of Aloe Extract Industry in China

Key Enterprises and Their Operation Status of Aloe Extract Industry in China

Market Competition of Aloe Extract Industry in China

Major Driving Forces and Market Opportunities in Aloe Extract Industry in China

Risks and Challenges Faced by Aloe Extract Industry in China

Price Trend of Raw Materials of Aloe Extracts in China

Development Trend of Aloe Extract Industry in China, 2017-2021
