As a kind of effective ingredient extracted from African yohimbe barks, Yohimbine is widely used abroad for male health products. At present, it is classified into yohimbine 8%, yohimbine 98% and yohimbine hydrochloride 98% in Chinese market.

Yohimbine hydrochloride is another form of yohimbine 98% after acidification for better preservation. Yohimbine hydrochloride is characterized with enhancing muscular tension, suppressing urine without injury, accelerating body energy metabolism and increasing energy supply which is helpful in penis hyperemia erection through expanding human stem artery and increasing the blood flow in penile cavernous sinus.
