Description

Cerebrovascular disease is one of the three principal diseases that can cause people to death. Acute cerebral infarction which occupies 70% of cerebrovascular disease has a disability rate of 50%-70% and a recurrence rate of 40%. And one thing to be noted is that the more relapses people have, the higher the mortality and disability.

Acute cerebral infarction, one of the serious threats to old people's health, features sudden onset, complex pathogenesis and "three high and one low": high morbidity, high mortality, high fatality and low cure rate.

Edaravone injection, a life-saving drug for the treatment of acute cerebral infarction, is the only free radical scavenger in the world with a clear mechanism and target of acute cerebral infarction. Ever since its debut in Japan in 2002, its sales in the first 13 months has surpassed JPY 40 billion.

Simcere is China's first and world's second manufacturer of edaravone injection. Its new product "Bi Cun" is priced at 1/33 of the price of similar products in Japan. In 2007, "Bi Cun" spread over China with a market share of 74.62%. According to CRI's statistics, edaravone develops fast after entering China, annual sales value rising from less than CNY 50 million in 2005 to CNY 629 million in 2014 and CAGR reaching up to 34.3% during the period of 2005-2015. Currently, local manufacturers of edaravone are as follows: Simcere, Jilin Boda Pharmaceutical Co., Ltd, Jilin Province Huinan Changlong Biopharmacy Co., Ltd and Kunming Jida Pharmaceutical Co., Ltd, among which Simcere has the largest market share of 39% with sales value reaching up to CNY 246 million in 2014.

With the ageing population, the incidence of acute cerebral infarction in China will keep increasing, thus promoting the growth of edaravone market.
