Abstracts

Description

According to the statistics of International Diabetes Federation (IDF), in 2013, the prevalence of diabetes among adults aged from 20 to 79 was 8.3% and the number of diabetes patients has reached 382 million in the world, 80% of which come from middle income and low income countries and the figure demonstrates a fast rising trend. It is estimated that by 2035, there will be nearly 592 million people suffering from diabetes in the whole world. The number of diabetes patients in China was estimated to be 98.4 million in 2013, ranking first in the world, followed by India (65.1 million), USA (24.4 million), Brazil (11.9 million) and Russia (10.9 million). IDF estimates that by 2035, the number of diabetes patients in China will reach 143 million, still ranking first in the world while that in America will reach 29.7 million. The fast growth of diabetes in China and other developing countries has put a heavy burden on their social and economic development.

Insulin glargine is the first long-acting insulin produced by simulating recombinant DNA technology. It was approved to be put into use by FDA in Apr. 2000 and then by the European Agency for the Evaluation of Medicinal Products (EMA) in Jun. 2000. Since insulin glargine reports no obvious peak after using it for a long time, it has become the most widely-used insulin in the USA.

In China, the third generation of insulin is still in promotion period. Since its price is relatively high, it is mainly used in big cities. The second generation and the third generation of insulin will take the shape of stagger competition.

According to CRI's survey on some sample hospitals in China, the CAGR of insulin

glargine in sample hospitals in China has exceeded 60% during the period of 2014-2015. Currently, the Chinese market is dominated mainly by Aventis Behring GmbH (the trade name of insulin glargine is Lantus and the sales in 2014 exceeded USD 7 billion) and the generic drugs (the trade name of insulin glargine is Basalin) made by Gan & Lee Pharmaceutical. As the patent of Lantus expired in Feb. 2015, the global market structure is estimated to change in the next few years. On Sep.9, 2014, Eli Lilly and Company and Boehringer-Ingelheim issued a joint statement that the insulin biosimilar – insulin glargine owned by them has been approved to come into market by the EU. On the other hand, in Chinese market, some local enterprises are also hastening the development of Lantus's generic drug.

With the improvement of living standards and the change of life styles in China, the incidence of diabetes has kept growing and the market size of diabetes drugs has expanded each year, exceeding CNY 20 billion in 2014 according to CRI's research. Currently in China, the second generation of recombinant human insulin is the mainstream of market. Having reduced the defects of the second generation of insulin and effectively shortened the length of treatment, the third generation of insulin products is expected to substitute the second generation gradually. It is predicated that insulin glargine is a potential product of growth among all three generations of insulin products.

Readers can get at least the following information through this report:

market size of insulin glargine in China

market share of insulin glargine manufacturers in sample hospitals in China

retail price of insulin glargine in Chinese market

major manufacturers of insulin glargine in Chinese market

market outlook of insulin glargine in China

The author suggests the following groups of people purchase this report:

manufacturers of antidiabetic drugs

investors/ research institutions interested in Chinese medicine market

any interest in medicine market, please contact CRI for customized survey service

COMPANIES MENTIONED

Gan & Lee Pharmaceuticals, Aventis Behring GmbH , Tonghua Dongbao
Pharmaceutical Co., Ltd

Contents

1 RELATED CONCEPTS OF INSULIN GLARGINE

- 1.1 Indication
- 1.2 Developments in Global Market

2 MARKET PROFILE OF INSULIN GLARGINE IN CHINA

- 2.1 Patent and License Status
- 2.2 Major Manufacturers
- 2.3 Market Scale

3 RESEARCH ON INSULIN GLARGINE'S SALES VALUE IN CHINA, 2010-2014

- 3.1 Overall Sales Value
- 3.2 Regional Sales Value

4 RESEARCH ON INSULIN GLARGINE'S SALES VOLUME IN CHINA, 2010-2014

- 4.1 Overall Sales Volume
- 4.2 Regional Sales Volume

5 RESEARCH ON MARKET SHARE OF MAJOR MANUFACTURERS OF INSULIN GLARGINE IN CHINA, 2010-2014

- 5.1 Market Share by Sales Value
- 5.2 Market Share by Sales Volume

6 RESEARCH ON MARKET SIZE OF DOSAGE FORMS OF INSULIN GLARGINE IN CHINA, 2010-2014

- 6.1 Market Share of Different Dosage Forms by Sales Value
- 6.2 Market Share of Different Dosage Forms by Sales Volume

7 REFERENCE PRICE OF INSULIN GLARGINE IN CHINESE HOSPITALS

- 7.1 Insulin Glargine produced by Beijing Gan & Lee
- 7.2 Aventis Behring GmbH

7.2 Aventis Behring GmbH

7.3 Tonghua Dongbao

8 MAJOR MANUFACTURERS OF INSULIN GLARGINE FOR CHINESE MARKET, 2010-2014

8.1 Gan & Lee Pharmaceuticals

8.2 Aventis Behring GmbH

8.3 Tonghua Dongbao Pharmaceutical Co., Ltd
