Description

According to WHO, depression, an affective mental disorder, is quite common with an incidence of 3-5%. Currently, the number of depression patients has exceeded 90 million in China and still keeps increasing. It is expected that by 2020, depression will become the second biggest threat to human health.

As a drug of the selective serotonin reuptake inhibitor (SSRI) type, paroxetine is mainly used for the treatment of depression, obsessive-compulsive disorder and social anxiety and is among one of the three SSRI drugs with certain efficacy (the other two being fluoxetine and paroxetine).

Paroxetine develops fast after entering China despite a slight decline in 2014, annual sales value rising from less than CNY 60 million in 2005 to CNY 204 million in 2013 and CAGR during this period reaching up to 17.3%. Sino-American Tianjin Smith Kline & French Laboratories Ltd, GlaxoSmithKline plc (CA), Beijing Wansheng Pharmaceutical Co., Ltd, Zhejiang Huahai Pharmaceutical Co., Ltd and Zhejiang Jianfeng Pharmaceutical Holdings occupy the majority of the Chinese market, among which Sino-American Tianjin Smith Kline & French Laboratories Ltd had the largest market share of about 69% for sales value in 2014.

With the increased mental pressure brought about by economic development and lifestyle change, the number of depression patients keeps growing too. Therefore, the market size of paroxetine is expected to expand in the next few years in China.
