

Research Report on China Boiler Industry, 2010-2019

<https://marketpublishers.com/r/R6CCC47346AEN.html>

Date: July 2015

Pages: 50

Price: US\$ 2,200.00 (Single User License)

ID: R6CCC47346AEN

Abstracts

Description

In China, coal is the major fuel source of industry and people's daily life. Coal-burning industrial boiler more often than not uses raw coal not selected by washing whose high level of ash and sulfur as well as low granularity result in combustion inefficiency and high pollutant emission which accounts for 45%-65% of urban air pollution. Therefore, using gas instead of coal constitutes a fast and effective solution to air pollution.

In the early 1980s, in order to improve people's living standards, many local governments fastened the popularization of gas in cities and built many commercial gas projects, which greatly boosted the urban gasification rate and development of gas-fired boiler. However, since the beginning of the 1990s, gas-fired boiler has been stagnant in technical innovation and market promotion as gas is priced high and the construction of gas pipe network is relatively backward. Industrial boiler, in particular, mainly uses coal rather than gas.

Since the beginning of the 21st century, gas-fired boiler has undergone a fast development due to the improved construction of gas pipe network as well as the fastened process of mining and marketing gas. Recent years, in particular, have witnessed gas-fired boiler' capturing the market occupied by coal-burning boiler originally as a result of increasingly severe environmental pollution, gradual limitation of coal-burning boiler and government-funded coal-to-gas shift.

Without government subsidy, it is not economical to turn single coal-burning boiler into gas-fired one. However, turning several coal-burning boilers into one gas-fired boiler to provide electricity and heat is feasible.

As denitration project of heat-engine plant in key areas was completed at the end of

2014, industry will become the next focus of utility-based energy efficiency. The Chinese government has released many policies like the Twelfth Five-Year Plan Key Programs on the Prevention and Control of Air Pollution of Key Regions, the Opinions on Accelerating the Development of Energy Saving and Environmental Protection Industry, the Draft of Emission Standard of Air Pollutants for Boiler to control the emission of industrial pollutants. Many local governments have also acted actively to do the same thing with a series of projects like becoming hot both in policy and market.

As commercial gas-fired boiler is mainly oriented towards upscale hotels, large government agencies, hospitals, large commercial retailers, general office buildings, brownstone districts as well as industrial customers and common residences in recent times, the potential market is quite large.

Gas-fired boiler enjoys huge potential for development in cities near the West-East gas pipeline and gas pipeline from foreign countries as well as harbor cities able to import liquefied gas and their radiant districts.

As an environmentally friendly product, gas-fired boiler enjoys the support from the Chinese government and therefore good market prospects. And gas-fired boiler is expected to replace coal-burning one to a great extent and become the mainstream product in boiler market in China.

Readers can get at least the following information through this report:

supply and demand of industrial boiler in China

Chinese government's policies related with boiler industry

reason why gas-fired boiler replaced coal-burning boiler

competition in boiler industry in China

major boiler manufacturers in China

expectation to boiler industry in China

The author suggests the following groups of people purchase this report:

enterprises engaged in industrial boiler manufacturing and trade

users of industrial boiler

investors/research institutions interested in industrial boiler industry

Contents

1 OVERVIEW OF BOILER IN CHINA

- 1.1 Definition and Classification
- 1.2 Coal-burning Boiler
- 1.3 Gas-fired Boiler
 - 1.3.1 Introduction to Gas-fired Boiler
 - 1.3.2 Advantages of Gas-fired Boiler
- 1.4 Economic Analysis of Coal-to-gas Shift Project
 - 1.4.1 High Fuel Cost
 - 1.4.2 Comparison between Demand for New boiler and Transformed one

2 CHINESE GOVERNMENT'S ENVIRONMENTAL POLICIES RELATED WITH BOILER INDUSTRY

- 2.1 Policies for Coal-burning Boiler Transformation
 - 2.1.1 Policies Released by the State Council of China
 - 2.1.2 Policies Released by the Ministry of Environmental Protection of China
- 2.2 Energy Efficiency and Environmental Protection as a Criterion for Government Assessment
- 2.3 New Emission Standard of Pollutants for Boiler
- 2.4 Industrial Boiler as Market Focus

3 MARKET DEMAND FOR GAS-FIRED BOILER IN CHINA, 2010-2014

- 3.1 Waste Heat Recovery Boiler of Power Plant
- 3.2 Demand for Industrial Gas-fired Boiler of Power Plant
- 3.3 Demand Forecast of Gas-fired Boiler
- 3.4 Supply and Demand Analysis of Gas-fired Boiler in China
 - 3.4.1 Output
 - 3.4.2 Demand

4 COMPETITIVE LANDSCAPE OF GAS-FIRED BOILER IN CHINA, 2010-2015

- 4.1 Large Power Plant and Distributed Power Plant Market
- 4.2 Industrial Gas-fired Boiler
 - 4.2.1 Output
 - 4.2.2 Market Competition

5 MAJOR BOILER MANUFACTURERS IN CHINA, 2011-2015

- 5.1 Harbin Boiler Co., Ltd
- 5.2 Dongfang Boiler Group Co., Ltd
- 5.3 Shanghai Boiler Works, Ltd
- 5.4 Hangzhou Boiler Group Co., Ltd
- 5.5 Taishan Group
- 5.6 Babcock & Wilcox Beijing Co., Ltd
- 5.7 Wuxi Huaguang Boiler Co., Ltd
- 5.8 Western Power
- 5.9 Jinan Boiler Group Co., Ltd
- 5.10 Hailu Heavy Industry
- 5.11 Anhui Jinding Boiler Co., Ltd
- 5.12 Alstom
- 5.13 Wuxi Huaguang Industrial Boiler Co., Ltd
- 5.14 Changsha Boiler Plant Co., Ltd. China

6 EXPECTATION TO BOILER INDUSTRY IN CHINA, 2015-2019

- 6.1 Factors Affecting Development
 - 6.1.1 Government Policy
 - 6.1.2 Economic Environment
- 6.2 Supply Forecast
- 6.3 Demand Forecast
- 6.4 Advice on Development and Investment

TABLE OF SELECTED CHARTS

- Chart Boiler Ownership in China, 2005-2014
- Chart Unit Power Investment of Some Gas-fired Boilers in China
- Chart Initial Investment Comparison between Coal-to-gas Shift and Smoke Treatment of Coal-burning Boiler
- Chart Operating Cost Comparison between Coal-to-gas Shift and Smoke Treatment of Coal-burning Boiler
- Chart Coal-burning Boiler Transformation in the Twelfth Five-Year Plan for Prevention and Control of Air Pollution of Key Refions
- Chart Draft of New Emission Standard of Air Pollutants for Boiler (2013 Version)
- Chart the First Batch of Distributed Energy Demonstration Projects in China

Chart Gas Output in China, 2005-2014

Chart Annual Coal Consumption of Industrial Boiler in Key Control Areas

Chart Major Local Manufacturers of Gas Turbine in China

Chart Competitive Landscape of Large Power Plant Boiler in China

Chart Output of Waste Heat Recovery Boiler in China

Chart Output of Industrial and Power Plant Boiler in China, 2008-2014

Chart Major Manufacturers of Industrial Boiler in China

Chart Output Forecast of Boiler in China, 2015-2019

COMPANIES MENTIONED

Harbin Boiler Co., Ltd; Dongfang Boiler Group Co., Ltd; Shanghai Boiler Works, Ltd; Hangzhou Boiler Group Co., Ltd; Taishan Group; Babcock & Wilcox Beijing Co., Ltd; Wuxi Huaguang Boiler Co., Ltd; Western Power; Jinan Boiler Group Co., Ltd; Hailu Heavy Industry; Anhui Jinding Boiler Co., Ltd; Alstom; Wuxi Huaguang Industrial Boiler Co., Ltd; Changsha Boiler Plant Co., Ltd. China
