Abstracts

Blood pressure monitors are medical instruments used to measure blood pressure. With the increasing global trend of aging, the rising elderly population has boosted the sales of blood pressure monitors. And with the global economic development, the material level is improving along with the health consciousness of consumers, which promotes the development of blood pressure monitors market.

China is one of the major producers and exporters of blood pressure monitors worldwide. According to CRI's analysis, in 2021, China exported 166 million blood pressure monitors (referring to blood pressure measuring instruments and apparatus, the same below), up 10.00% year-on-year, with an export value of US\$761 million, up 27.37% year-on-year. From January to October 2022, China exported 115 million blood pressure monitors, down 14.44% year-on-year, with an export value of US\$538 million, down 11.02%.

In 2021, China exported blood pressure monitors to about one hundred and seventy countries and regions around the world. CRI analysis, by export volume, the United States, Japan, Vietnam, Germany, the Russian Federation, Brazil, India, Hong Kong, China, the United Kingdom and the Netherlands are the main export destinations of Chinese blood pressure monitors. Among them, the United States is the largest destination of China's blood pressure monitor exports. In 2021, China exported 44,431,900 blood pressure monitors to the United States, accounting for 26.77% of the total exports of blood pressure monitors in that year, with an export value of US\$197 million, accounting for 25.82% of the total export value.

China is one of the major manufacturing bases and exporters of blood pressure monitors worldwide. With the growth of the global blood pressure monitor market, CRI

expects that China's blood pressure monitor exports are expected to continue to rise from 2023-2032.
