Abstracts

Lithium batteries are widely used in electric vehicles, energy storage, consumer electronics and other fields. Lithium batteries are divided into disposable batteries and lithium-ion batteries, of which lithium-ion batteries account for most of the market share of lithium batteries.

As downstream applications continue to expand, the global market demand for lithium-ion batteries continues to rise. According to CRI's analysis, China is the world's leading producer and exporter of lithium-ion batteries, exporting large quantities of lithium-ion batteries every year.

In 2021, China exported 3.427 billion lithium-ion batteries, up 54.34% year-on-year, with an export value of US\$28.423 billion, up 78.32% year-on-year. From January to October 2022, China exported 3.195 billion lithium-ion batteries, up 18.16% year-on-year, with an export value of US\$39.754 billion, up 82.74% year-on-year.

CRI analysis shows that the average price of China's lithium-ion battery exports grows continuously from 2018-2022. The average price of China's lithium-ion battery exports maintains a 10%-15% growth rate in 2018-2021, rising from US\$5.58 each in 2018 to US\$8.29 each in 2020. From January to October 2022, the average price of China's lithium-ion battery exports was US\$12.44 each, up 54.65% year-on-year.

In 2021, China exported lithium-ion batteries to more than two hundred countries and regions worldwide. CRI analysis shows that Hong Kong SAR, Vietnam, India, the United States, South Korea, Germany, Poland, Malaysia, Hungary and Taiwan are China's major lithium-ion battery export destinations by export volume.

Among them, Hong Kong SAR is the largest destination for China's lithium-ion battery exports. According to CRI's analysis, in 2021, China exported 675 million lithium-ion batteries to Hong Kong, China, accounting for 19.70% of total lithium-ion battery exports in that year, with an export value of US\$2.279 billion, accounting for 8.02% of total exports. If divided by export value, the U.S. is the largest destination for China's lithium-ion battery exports. In 2021, China's exports of lithium-ion batteries to the U.S. amounted to US\$4.971 billion, accounting for 17.49% of total exports.

China is the world's leading producer and exporter of lithium-ion batteries. With the development of new industries such as electric vehicles worldwide, CRI expects that China's lithium-ion battery export market has a bright future.
