## Abstracts

China is a major global producer of rubber products, and China produces and exports a large amount of rubber products, such as automobile tires, every year. Since China's local supply of natural rubber is insufficient, China needs to import a large amount of natural rubber every year.

In 2021, China imported 2.386 million tons of natural rubber, up 3.8% year-on-year, and the import value was US\$3.86 billion, up 25.4% year-on-year. According to CRI's analysis, in the first three quarters of 2022, China imported 1.838 million tons of natural rubber, up 10.3% year-on-year, and the import value was US\$2.99 billion, up 11.1% year-on-year.

CRI analysis, in 2018-2020, the average price of China's natural rubber imports remained in the range of US\$1,300-1,400 per ton, which is generally relatively stable. 2021, the average price of China's natural rubber imports rose to US\$1,617.4 per ton, an increase of 20.8% y-o-y. In the first three quarters of 2022, the average price of China's natural rubber imports was US\$1,627.8 per ton, an increase of 0.8% y-o-y. The average price of Chinese natural rubber imports in the first three quarters of 2022 was US\$1,627.8 per ton, up 0.8% year-on-year.

The four main types of natural rubber imported into China are natural rubber latex, smoked sheets, technically specified natural rubber (TSNR) and other shapes of natural rubber. According to CRI's analysis, the main type of natural rubber imported into China in 2021 is technically specified natural rubber (TSNR). 1.448 million tons of technically specified natural rubber were imported into China in 2021, accounting for 60.7% of the total import volume and US\$2.47 billion, accounting for 64.1% of the total import value in that year.

Southeast Asian countries are the main sources of natural rubber imports for China. According to CRI's analysis, in 2021, China's major sources of natural rubber imports by import volume were Thailand, Malaysia, Cote d'Ivoire, Vietnam and Indonesia. Among them, Thailand is China's largest natural rubber import source. 2021, China imported 1.129 million tons of natural rubber from Thailand, accounting for 51.1% of the total natural rubber import volume and US\$1.99 billion in import value, accounting for 51.7% of natural rubber import value.

As China's economy grows, market demand for natural rubber continues to be released. China has been the world's largest natural rubber consumer for many years, but China's domestic natural rubber production capacity can only meet less than half of the domestic market demand, and most natural rubber needs to rely on imports. CRI expects that China's natural rubber imports are expected to continue to grow in 2023-2032.
