Abstracts

With economic development, increasing per capita disposable income and mobile internet penetration in Southeast Asia, Southeast Asia has become one of the fastest growing regions in the world for e-commerce development. According to the 2022 Southeast Asia Digital Economy Report, the GMV of Southeast Asia's e-commerce industry jumped from US\$10.9 billion to US\$131 billion from 2017-2022, with a CAGR of 64% from 2017-2022. CRI analyzes that as online consumption gradually becomes the shopping habit of Southeast Asian residents, it is expected that the future of Southeast Asia's e-commerce sector will still show notable growth potential.

The rise of e-commerce market has promoted the development of Southeast Asia's express delivery industry, attracting many express delivery companies to Southeast Asia to compete for market share. According to CRI's analysis, local courier companies in Southeast Asia, such as Ninja Van, J&T Express and Flash Express, continue to make efforts, and international logistics giants UPS, DHL, FedEx and Chinese courier companies SF and Best have also laid out the Southeast Asian market one after another.

Southeast Asia in this report includes 10 countries: Singapore, Thailand, Philippines, Malaysia, Indonesia, Vietnam, Myanmar, Brunei, Laos and Cambodia. With a total population of over 600 million by the end of 2021, Southeast Asia has an overall economic growth rate higher than the global average and is one of the key drivers of future global economic growth.

According to CRI's analysis, the economic levels of the 10 Southeast Asian countries vary greatly, with Singapore being the only developed country with a per capita GDP of about US\$73,000 in 2021. While Myanmar and Cambodia will have a GDP per capita of

less than US\$2,000 in 2021. The population and minimum wage levels of each country also vary greatly. Brunei, which has the smallest population, will have a total population of less than 500,000 people in 2021, while Indonesia, which has the largest population, will have a population of about 275 million people in 2021.

With the gradual improvement of infrastructure in Southeast Asia, e-commerce penetration is gradually increasing, and e-commerce GMV is rising year by year, which also promotes the development of the express delivery industry. CRI expects that the express delivery industry in Southeast Asia will continue to grow rapidly from 2023-2032.
