Abstracts

With the economic development of Southeast Asia, the pace of life of residents has accelerated and the concept of food has gradually changed. Modern fast food, as a mass catering to meet people's basic daily needs, is flourishing in Southeast Asia with its quick, convenient and delicious features.

The development of the fast food industry in Southeast Asia varies greatly from country to country. For example, the fast food industry in Singapore has been relatively mature and has gradually emerged in Singapore since the 1970s. McDonald's is one of the major fast food brands in Singapore, with more than 100 stores, and KFC has about seventy stores. In Vietnam, the fast food industry developed later, and only in 2010 did western fast food chains such as KFC and Pizza Hut try to enter the Vietnamese market. At present, brands such as Lotte Lee, Happy Bee, Yum Brands and Quan Ngon 138 dominate the fast food industry in Vietnam, and the fast food industry is highly competitive.

Southeast Asia in this report includes 10 countries: Singapore, Thailand, Philippines, Malaysia, Indonesia, Vietnam, Myanmar, Brunei, Laos and Cambodia. With a total population of over 600 million by the end of 2021, Southeast Asia has an overall economic growth rate higher than the global average and is one of the key drivers of future global economic growth.

According to CRI's analysis, the economic levels of the 10 Southeast Asian countries vary greatly, with Singapore being the only developed country with a per capita GDP of about US\$73,000 in 2021. While Myanmar and Cambodia will have a GDP per capita of less than US\$2,000 in 2021. The population and minimum wage levels of each country also vary greatly. Brunei, which has the smallest population, will have a total population

of less than 500,000 people in 2021, while Indonesia, which has the largest population, will have a population of about 275 million people in 2021.

With the rapid expansion of the middle class in Southeast Asian countries in recent years, the population's standard of living has improved, and the overall spending power has increased, CRI expects the fast food industry in Southeast Asia to continue to grow from 2023-2032.
