Abstracts

According to levels, China's development zones can be divided into state-level development zones, provincial development zones, county-level development zones, etc. In line with positioning and functions, they can be classified as economic and technological development zones, new and high-tech industrial development zones, export processing zones, bonded zones, border economic co-operative zones, etc.

Since the implementation of opening up policies and establishment of special economic zones at the end of 1970s, the development zone is regarded as the showcase of China's opening up, primary region for attracting foreign investment and development engine of regional economy. After the development and construction for more than 20 years, development zones become modern industrial cluster parks with the rapidest economic development in China, the most foreign investment attraction, the best investment environment and the highest technological level. Development zones are important components of China's economy.

During 1984 and 1988, China's State Council approved 14 state-level economic and technological development zones including Dalian. Later, China's opening up gradually develops from the coastal areas to regions along the Yangtze River, borders and inland cities. By Nov. 2012, there are 132 state-level economic and technological development zones in China, with 67 in eastern coastal areas, 38 in central areas, 27 in western areas and 15 in border economic co-operative zones. A hundred and five national new and high-tech zones are approved by the State Council. In addition, there are thousands of development zones in other types in China.

During the development of over 30 years, development zones crucially function in the development of China's economy and they play a vital role in the integration of China's

economy with the world system. However, development zones also face problems such as severe homogenization and low technological contents in development.

In terms of the development prospect of China's development zones, it will be an inevitable choice for most development zones transforming from ones with a single economic function to multi-functional comprehensive development zones. The phenomenon is because of the following reasons: firstly, development zones gradually form and develop in a relatively small space scope. The transformation of development zones with a single economic function to multi-functional comprehensive ones will be conducive to reducing the number of development zones and promoting the change of China's development zones from the increase in numbers to the improvement in qualities; secondly, the transformation of development zones with a single economic function to multi-functional comprehensive ones will be beneficial for the concentration of financial resources, material resources and human resources to establish development zones and the perfection of infrastructure construction in development zones; thirdly, it will be favorable to the development, supporting and coordination of self industries in development zones and promote the development of cross-industry and various industries of enterprises in development zones.

On the whole, with the development of China's economy, development zones continuously play an important role in addressing employment problem, increasing urbanization level, etc. As for enterprises, preferential policies in taxation and other aspects can be generally enjoyed if they settle in development zones.

More following information can be acquired through this report:

Development Status of China's Development Zones

Factors Influencing Development of Development Zones

Industrial Policies of Development Zones

Introduction of Part Important Development Zones in China

Prediction on Development Trend of China's Development Zones

Following people are recommended to buy this report:

Manufacturing/Trade Industry Practitioners

Investors and Research Institutions Focusing on Development Zone Industry

Contents

CHAPTER ONE BASIC SITUATION OF CHINA'S DEVELOPMENT ZONE INDUSTRY

- 1.1 Definition and Classification
 - 1.1.1 Definition
 - 1.1.2 Classification
- 1.2 Status of Development Zone Industry in China's Economy

CHAPTER TWO DEVELOPMENT ENVIRONMENT OF CHINA'S DEVELOPMENT ZONE INDUSTRY, 2011-2013

- 2.1 Economic Environment
 - 2.1.1 China's Economy
 - 2.1.2 International Economy
- 2.2 Industrial Policies
 - 2.2.1 Overview on Policies
 - 2.2.2 Introduction of Key Policies

CHAPTER THREE DEVELOPMENT OF CHINA'S DEVELOPMENT ZONES, 2011-2013

- 3.1 Distribution of State-level Economic and Technological Development Zones
- 3.2 Operation of State-level Economic and Technological Development Zones
 - 3.2.1 Economic Indicators
 - 3.2.2 Foreign Investment Utilization
 - 3.2.3 Import & Export
- 3.3 Analysis and Prediction on Investment and Financing
 - 3.3.1 Analysis on Status Quo of Investment and Financing of Development Zones
 - 3.3.2 Investment and Financing Characteristics of Development Zones
 - 3.3.3 Analysis on Development Trend of Investment and Financing

CHAPTER FOUR COMPETITION IN CHINA'S DEVELOPMENT ZONES, 2011-2013

- 4.1 Factors Influencing Industrial Competitiveness
 - 4.1.1 Geographical Locations
 - 4.1.2 Industrial Clusters
 - 4.1.3 Preferential Policies
 - 4.1.4 Human Capital

- 4.1.5 Land Intensity
- 4.2 Competition Characteristics of Development Zones
 - 4.2.1 Undefined Function Positioning and Convergent Industrial Structure
 - 4.2.2 Insufficient Foresight of Industrial Development Planning
 - 4.2.3 Externalization of Costs
 - 4.2.4 Sustainable Development of Local Enterprises
 - 4.2.5 Relatively Low Intensive Utilization Level of Land
 - 4.2.6 Existing Problems in the Development of Development Zones

CHAPTER FIVE ANALYSIS ON INDUSTRIAL CLUSTERS OF CHINA'S DEVELOPMENT ZONES

- 5.1 Industrial Clusters and Urbanization of Development Zones
 - 5.1.1 Influence of Industrial Clusters on Urbanization
 - 5.1.2 Counteraction of Urbanization on Industrial Clusters
- 5.2 Economic Development of Industrial Clusters and Development Zones
 - 5.2.1 Leading Role of Agglomeration in Industrial Clusters
 - 5.2.2 Leading Role of Circular Economy in Industrial Clusters
- 5.3 Problems in the Development of Industrial Clusters
 - 5.3.1 Vulnerability of Industrial Clusters
 - 5.3.2 Severe Dependence on Multinational Corporations
 - 5.3.3 Low-end Industries Dominating
 - 5.3.4 Backward Supporting Facilities

CHAPTER SIX ANALYSIS ON CORE INDUSTRIES OF CHINA'S DEVELOPMENT ZONES, 2011-2013

- 6.1 Overview on Core Industries of Development Zones
 - 6.1.1 Criteria for Selection of Core Industries
 - 6.1.2 Distribution of Core Industries of China's Development Zones
- 6.2 Electronic Information Industry
 - 6.2.1 Industrial Scale
 - 6.2.2 Supply & Demand
 - 6.2.3 Operation Characteristics
 - 6.2.4 Development Trend
- 6.3 Pharmaceutical industry
 - 6.3.1 Industrial Scale
 - 6.3.2 Supply and Demand
 - 6.3.3 Operation Characteristics

- 6.3.4 Development Trend
- 6.4 Automobile Industry
 - 6.4.1 Industrial Scale
 - 6.4.2 Supply & Demand
 - 6.4.3 Operation Characteristics
 - 6.4.4 Development Trend

CHAPTER SEVEN ANALYSIS ON CHINA'S DEVELOPMENT ZONE INDUSTRY BY REGION, 2011-2013

- 7.1 Regional Distribution
- 7.2 Industrial Layout and Development Trend
 - 7.2.1 Regional Layout of Development Zones
 - 7.2.2 Regional Development Trend of Development Zones
- 7.3 Key Regions in the Industry
 - 7.3.1 Jiangsu
 - 7.3.2 Jiangxi
- 7.4 Development Zones in Western Region of China
- 7.5 Analysis on China's Typical Development Zones
 - 7.5.1 Beijing Economic and Technological Development Zone
 - 7.5.2 Zhengzhou Economic and Technological Development Zone
 - 7.5.3 Shaanxi Development Zone

CHAPTER EIGHT PREDICTION ON DEVELOPMENT OF CHINA'S DEVELOPMENT ZONE INDUSTRY, 2013-2017

- 8.1 Factors Influencing Development
 - 8.1.1 Macro Economy
 - 8.1.2 Industrial Policies
 - 8.1.3 Others
- 8.2 Development Trend
 - 8.2.1 Industrial Cluster
 - 8.2.2 Accelerating Development of Modern Service Industry
 - 8.2.3 Promoting Rise in Urbanization Level
- 8.3 Investment Recommendations

Selected Charts

SELECTED CHARTS

- Chart Types and Numbers of China's State-level Development Zones, 2012
- Chart Primary Policies of China's Development Zone Industry, 2009-2012
- Chart Total Regional Output Value of State-level Economic and Technological Development Zones in Eastern China, 2011
- Chart Total Regional Output Value of Major State-level Economic and Technological Development Zones in Central China, 2011
- Chart Actual Foreign Investment Utilization of State-level Economic and Technological Development Zones in Eastern China, 2011
- Chart Export Value of Major State-level Economic and Technological Development Zones in Eastern China, 2011
- Chart Leading Industries of Partial State-level Economic and Technological Development Zones in China
- Chart Number Distribution of China's State-level and Provincial Development Zones
