

Research Report on Chinese Electric Machinery Industry, 2010-2011

<https://marketpublishers.com/r/RE8DAAF09FDEN.html>

Date: December 2009

Pages: 60

Price: US\$ 1,668.00 (Single User License)

ID: RE8DAAF09FDEN

Abstracts

The electric machinery industry is a major part of the electric industry. It consists of the electric generator and generator set sector, the electric motor sector and the micro motor sector. Electric machinery products are widely applied in the petroleum, chemical, metallurgy, electricity, urban construction and environmental protection industries. During 2001-2007, the average annual growth rate of Chinese electric machinery industry remained over 20%. In 2008, due to the international financial crisis, the growth rate of Chinese electric machinery industry declined; the market scale was about RMB 270 billion, rising by 16% YOY.

By November 2009, there were over 2,000 electric machinery enterprises in China. Though the quantity of enterprises is large, 90% of them are small and medium enterprises. Due to the numerous producers and high production, the price-cutting competition has formed to seize the market. The uneven qualities of products, price-cutting competition and meager profits become the major factors impacting the survival and development of the electric machinery enterprises. Chinese electric machinery industry is in urgent need of reintegration to eliminate inferior enterprises and retain competitive enterprises, which has become the development trend of Chinese electric machinery industry.

Most of the major products of Chinese electric machinery industry are positioned in the low-end market. These products are of low added value. The export advantages of Chinese electric machinery manufacture relying on the traditional cheap labor and domestic resources no longer exist. Speeding up the transformation of enterprises and propelling the industry integration are the absolute choice for the development of this industry. The global financial crisis drives away the low-price competition era of electric machinery. The prices of raw materials are uncertain with violent fluctuation at present,

acting against the cost control of small and medium electric machinery producers. Due to the deficiency of core competitiveness, many electric machinery enterprises suffer production reduction or even bankruptcy. The primary reason is that these enterprises lack the core competitiveness, namely, their own core products and technologies.

In recent years, a large number of electric machinery enterprises in China adopt the trade pattern of processing imported materials and processing & assembling of materials supplied by customers. They expand the export through fixed brand production model. Presently, the export to Hong Kong, South Korea, Japan, USA and EU, etc adopts this pattern. Nowadays, many foreign enterprises are also seeking various ways to get rid of the tough situation, including changing the line of production, switching to another business, carrying out partial OEM or relocating the production base, etc. They increase the technology cooperation and joint venture production with Chinese enterprises. Therefore, for Chinese electric machinery enterprises, especially the producers, there is high market potential. It is suitable for the production and export of Chinese enterprises. On the basis of rational and orderly development, exporters can acquire some profits.

The major problems of Chinese electric machinery export are the few categories, single structure, low price, long transaction period and poor appearance quality. In the electric machinery manufacture of EU's member states, the majority are small and medium enterprises. Their market position of high technology-content electric machinery is stable. On the one part they positively produce high-effectiveness electric machinery to save the energy; on the other part they add smart design on the same product. Their products with the same power as Chinese products possess better electric performance. Thus, their products display prominent superiority, effectively avoiding the competition with ordinary products. Chinese electric machinery export to USA mainly depends on foreign traders to produce in Chinese mainland the products sold well in USA market, including manufacture and processing of supplied materials, processing of supplied drawings and samples, fixed brand production.

Through this report, readers can acquire more information:

- Development environment of Chinese electric machinery industry
- Supply and demand of Chinese electric machinery industry
- Market competition of Chinese electric machinery industry
- Major enterprises in Chinese electric machinery industry and their operation
- Export of Chinese electric machinery industry
- Investment opportunities in Chinese electric machinery industry

-Prediction on the development trend of Chinese electric machinery industry

Following persons are recommended to buy this report:

- Generator and electric motor producers
- Generator and electric motor distributors
- Downstream enterprises of generator and electric motor
- Investors concerning Chinese electric machinery industry
- Research institutes concerning Chinese electric machinery industry
- Others concerning Chinese electric machinery industr

Contents

1. CONCEPTS OF CHINESE ELECTRIC MACHINERY INDUSTRY

- 1.1. Industry Definition and Product Categories
 - 1.1.1 Industry Definition
 - 1.1.2 Product Categories
- 1.2 Analysis on Industry Status in Chinese Economy

2. DEVELOPMENT OF GLOBAL ELECTRIC MACHINERY INDUSTRY

- 2.1 Overview of Global Electric Machinery Market
 - 2.1.1 Current Industry Status
 - 2.1.2 Energy Saving Measures
 - 2.1.3 Electric Machinery Mandatory Energy Efficiency Standard
 - 2.1.4 Energy Efficiency Labeling System
- 2.2. Global Leading Electric Machinery Manufacture Countries
 - 2.2.1 USA
 - 2.2.2 Germany
 - 2.2.3 Japan
- 2.3 Global Famous Electric Machinery Manufacturers and Their Investment in China
 - 2.3.1 ABB
 - 2.3.2 Siemens
 - 2.3.3 Hitachi
 - 2.3.4 Toshiba
 - 2.3.5 Mitsubishi

3. DEVELOPMENT OF CHINESE ELECTRIC MACHINERY INDUSTRY, 2008-2009

- 3.1 Analysis on Development Environment of Chinese Electric Machinery Industry
 - 3.1.1 Analysis on Macro Economic Environment
 - 3.1.2 Analysis on Government Policy Environment
- 3.2 Development of Chinese Electric Machinery Manufacturing Industry
 - 3.2.1 Current Status of Chinese Electric Machinery Market
 - 3.2.2 Productivity of Chinese Electric Machinery Industry
 - 3.2.3 Sales of Chinese Electric Machinery Industry
 - 3.2.4 Import and Export of Chinese Electric Machinery Industry
- 3.3 Technology Development in Chinese Electric Machinery Industry

- 3.3.1 Wind Power Generator Manufacturing Technology
- 3.3.2 Technology Level of Low Power Electric Machinery
- 3.3.3 Technology Development of Micro and Special Electric Machinery
- 3.4 Disparities between Chinese Level and International Advanced Level in the Electric Manufacturing Industry
 - 3.4.1 Technology Disparity
 - 3.4.2 Management Disparity
 - 3.4.3 Marketing Concept Disparity
 - 3.4.4 Environmental Protection Concept Disparity
- 3.5 Impacts of International Financial Crisis on Chinese Electric Machinery Industry
 - 3.5.1 Reduction in Foreign Investment
 - 3.5.2 Reduction in Demand
 - 3.5.3 Other Impacts
- 3.6 Analysis on Operation of Chinese Electric Machinery Industry, 2008-2009
 - 3.6.1 Capital Maintenance and Appreciation Ratio
 - 3.6.2 Asset-Liability Ratio
 - 3.6.3 Current Asset Turnover Ratio
 - 3.6.4 Product Sales Ratio
 - 3.6.5 Labor Productivity

4. CHINESE ELECTRIC MACHINERY MANUFACTURING INDUSTRIAL DISTRIBUTION AND STRUCTURE

- 4.1 Geographical Distribution of Chinese Electric Machinery Manufacturers
 - 4.1.1 Geographical Distribution
 - 4.1.2 Industrial Cluster
 - 4.1.3 Trend of Geographical Distribution
- 4.2 Analysis on Market Concentration of Chinese Electric Machinery Manufacturing Industry
 - 4.2.1 Market Concentration
 - 4.2.2 Market Structure Characteristics of Chinese Electric Machinery Industry
- 4.3 Analysis on Competence of Jiangsu Electric Machinery Industry
 - 4.3.1 Status in Chinese Electric Machinery Industry
 - 4.3.2 Competence
- 4.4. Analysis on Competence of Shandong Electric Machinery Industry
 - 4.4.1 Status in Chinese Electric Machinery Industry
 - 4.4.2 Competence
- 4.5 Analysis on Competence of Zhejiang Electric Machinery Industry
 - 4.5.1 Status in Chinese Electric Machinery Industry

4.5.2 Competence

5. MAIN CHINESE ELECTRIC MACHINERY PRODUCTS, 2008-2009

5.1 Electric Generator and Generator Set

5.1.1 Production

5.1.2 Sales

5.1.3 Export

5.2 Electric Motor

5.2.1 Production

5.2.2 Sales

5.2.3 Export

5.3 Micro Motor

5.3.1 Production

5.3.2 Sales

5.3.3 Export

6. ANALYSIS ON RELEVANT INDUSTRIES OF CHINESE ELECTRIC MACHINERY INDUSTRY CHAIN

6.1 Analysis on Upstream Raw Materials

6.1.1 Steel

6.1.2 Silicon Steel Sheet

6.1.3 Copper

6.2 Analysis on Downstream Industries

6.2.1 Electric Power Industry

6.2.2 Petrochemical Equipment Industry

6.2.3 Metallurgy Industry

6.2.4 Textile Industry

6.2.5 Ship Industry

6.3 Analysis on Downstream Demands for Low Power Electric Motors

6.3.1 Electric Motor for Household Appliances

6.3.2 Electric Motor for Automobile

6.3.3 Office Automation and Computer Peripheral Equipment

6.3.4 Electric Motor and Electric Tools for Numerical Control Machine

6.3.5 Special Processing Machinery for the Information Industry

7. ANALYSIS ON LEADING ELECTRIC MACHINERY MANUFACTURERS IN CHINA

7.1. Analysis on Market Shares of Leading Electric Machinery Manufacturers in China

7.1.1 Overview of Manufacturers

7.1.2 Market Shares of Leading Manufacturers

7.2 Harbin Electric Machinery Co., Ltd

7.2.1 Overview

7.2.2 Operation

7.2.3 Technology

7.3 Dongguan Huaqiang Sanyo Motor Co., Ltd

7.4 Wolong Holding Group Co., Ltd

7.5 Shanghai Turbogenerator Co., Ltd

7.6 Xiangtan Electric Manufacturing Group

7.7 Shanghai Electric Group Shanghai Electric Machinery Co., Ltd

7.8 Goldwind Science and Technology Co., Ltd

7.9 Japan Electrical Product (Dalian) Co., Ltd

7.10 Gamesa Wind (Tianjin) Co., Ltd

7.11 Dongfang Electric Machinery Company of Dongfang Electric Corporation

8. ANALYSIS ON DEVELOPMENT OF CHINESE ELECTRIC MACHINERY INDUSTRY, 2010-2011

8.1 Analysis on Development Trend of Chinese Electric Machinery Market

8.1.1 Prediction on Supply

8.1.2 Prediction on Demand

8.1.3 Prediction on Foreign Trade

8.2 Technology Development Direction of Chinese Electric Machinery Industry

8.2.1 Overall Technology Development Trend

8.2.2 Technology Development Trend of Wind Power Generator Set

8.2.3 Technology Development Trend of Small Electric Machinery

8.2.4 Technology Development Trend of Micro Motor

9. ANALYSIS ON INVESTMENT IN CHINESE ELECTRIC MACHINERY INDUSTRY, 2010-2011

9.1 Analysis on Investment Environment

9.1.1 Investment in the Industry

9.1.2 Investment Prospect

9.2 Analysis on Investment Risks

9.2.1 Policy Risk

9.2.2 Market Risk

9.2.3 Operation Risk

9.3 Analysis on Investment Opportunities in Chinese Electric Machinery Industry

Selected Charts

SELECTED CHARTS

Chart Chinese Electric Machinery Market Scales, 2004-2009

Chart Chinese Electric Machinery Market Concentration, 2001-2008

Chart Changes in Labor Productivity of Chinese Electric Machinery Industry, 2001-2008

Chart Chinese Electric Generator and Generator Set Market Scale, 2004-2008

Chart Chinese Water-turbine Generator Set Production, 2004-2008

Chart Chinese Steam Turbine Generator Production, 2004-2008

Chart Chinese Electric Motor Market Scales, 2004-2009

Chart Operation of Harbin Electric Machinery Co., Ltd, 2004-2008

Chart Operation of Dongfang Electric Machinery Company of Dongfang Electric Corporation, 2004-2008

Chart Prediction on Market Scale of Chinese Electric Machinery Industry, 2010-2014

Chart Prediction on Export Value of Chinese Electric Machinery Market, 2010-2014
