Abstracts

The report covers the analysis and forecast of a bio polymers market on global as well as regional level. The study provides historic data of 2016 along with the forecast for the period between 2017 and 2025 based on revenue (US\$ Mn).

The study provides a detailed view of the bio polymers market, by segmenting it based on by product type, by application, by end-user, and regional demand. Increasing adoption of bio polymers product in consumer product, packaging, agriculture and pharmaceutical sector is one of the key factor fueling the growth of the market. Sustainable in nature as it is collected from living organisms, less environment pollution is some of the few basic processes that can be managed by bio polymers. High demand of organic products and services in various industrial sectors, creates a huge market opportunity for bio polymers market during the forecasted period.

Regional segmentation includes the current and forecast demand for North America, Europe, Asia Pacific, Middle East and Africa and Latin America. The segmentation also includes by product type, application, types, and end-user of a product in all regions. These include different business strategies adopted by the leading players and their

recent developments.

A comprehensive analysis of the market dynamics that is inclusive of market drivers, restraints, and opportunities is part of the report. Additionally, the report includes potential opportunities in the bio polymers market at the global and regional levels. Market dynamics are the factors which impact the market growth, so their analysis helps understand the ongoing trends of the global market. Therefore, the report provides the forecast of the global market for the period from 2017 to 2025, along with offering an inclusive study of the bio polymers market.

The report provides the size of the bio polymers market in 2017 and the forecast for the next nine years up to 2025. The size of the global bio polymers market is provided in terms of revenue. Market revenue is defined in US\$ Mn. The market dynamics prevalent in North America, Europe, Asia Pacific, Middle East and Africa and Latin America has been taken into account in estimating the growth of the global market.

Market estimates for this study have been based on revenue being derived through regional pricing trends. The bio polymers market has been analyzed based on expected demand. We have used the bottom-up approach to estimate the global revenue of the bio polymers market, split into regions. Based on, material, types, application, and product we have summed up the individual revenues from all the regions to achieve the global revenue for bio polymers market. Companies were considered for the market share analysis, based on their innovation and application and revenue generation. In the absence of specific data related to the sales of bio polymers product several privately held companies, calculated assumptions have been made in view of the company's penetration and regional presence.

The report covers a detailed competitive outlook that includes the market share and company profiles of key players operating in the global market. Key players profiled in the report include BASF, Naturework, Novamont, Arkema Inc. and few to be named.

The global bio polymers market has been segmented into:

Global Bio Polymers Market: By Product Type

Biodegradable polyesters

Polyhydroxyalkanoate (PHA)

Poly lactic acid (PLA)

Others

Global Bio Polymers Market: By End-User

Consumer goods sector

Horticulture

Packaging

Others

Global Bio Polymers Market: By Application

Food Industry

Textile industry

Pharmaceutical

Others

Global Bio Polymers Market: By Geography

North America

U.S.

Canada

Mexico

Europe

U.K.

France

Germany

Italy

Rest of Europe

Asia Pacific

India

China

Japan

Rest of Asia Pacific

Middle East and Africa
