Abstracts

The report covers the analysis and forecast of the biotechnology reagents market on global as well as regional level. The study provides historic data of 2017 along with the forecast for the period between 2017 and 2025 based on revenue (US\$ Billion).

The study provides a detailed view of the biotechnology reagents market, by segmenting it based on, technology, application, end-user and regional demand.

The technology based segment includes two kinds namely life science reagents market and analytical reagents market. the life science reagents market can be sub-segmented into in vitro diagnostics (IVD), cell culture, polymerase chain reaction (PCR) and expression and transfection; while the analytical reagents market can be sub segmented into electrophoresis, chromatography, mass spectrometry and flow cytometry.

Based on application, the global biotechnology reagents market can be classified into DNA and RNA analysis, gene expression, drug testing and protein synthesis and purification. On the other hand, based on end-user, the market can be segmented into

different research institutes, biotechnology companies, pharmaceuticals and diagnostic centers.

Regional segmentation includes the current and forecast demand for North America, Europe, Asia Pacific, Latin America and Middle East and Africa. Market dynamics for each region has been provided in the report.
