Abstracts

The report covers the analysis and forecast of the healthcare supply chain management market on global as well as regional level. The study provides historic data of 2016 along with the forecast for the period between 2017 and 2025 based on revenue (US\$ Mn).

The study provides a detailed view of the healthcare supply chain management market, by segmenting it based on product type, by time span, by end-user, by operation, by internal and external factors and regional demand. Virtual centralization of the supply chain to minimize the cost and time factor is one of the key factor fueling the growth of the market. Availability management, supply management, request management, and problem management are some of the few basic processes that can be managed by healthcare supply chain management. High demand of product availability at the right time, and at a right place in various healthcare sectors, creates a huge market opportunity for supply chain management market during the forecasted years.

Regional segmentation includes the current and forecast demand for North America,

Europe, Asia Pacific, Middle East and Africa and Latin America. The segmentation also includes by product type, by time span, end-user, operation, internal and external factors in all regions. These include different business strategies adopted by the leading players and their recent developments.

A comprehensive analysis of the market dynamics that is inclusive of market drivers, restraints, and opportunities is part of the report. Additionally, the report includes potential opportunities in the healthcare supply chain management market at the global and regional levels. Market dynamics are the factors which impact the market growth, so their analysis helps understand the ongoing trends of the global market. Therefore, the report provides the forecast of the global market for the period from 2017 to 2025, along with offering an inclusive study of the healthcare supply chain management market.

The report provides the size of the healthcare supply chain management market in 2017 and the forecast for the next nine years up to 2025. The size of the global health care supply chain market is provided in terms of revenue. Market revenue is defined in US\$ Mn. The market dynamics prevalent in North America, Europe, Asia Pacific, Middle East and Africa and Latin America has been taken into account in estimating the growth of the global market.

Market estimates for this study have been based on revenue being derived through regional pricing trends. The healthcare supply chain management market has been analyzed based on expected demand. We have used the bottom-up approach to estimate the global revenue of the healthcare supply chain management market, split into regions. Based on, product type, time span, operation, end-user, and internal and external factors we have summed up the individual revenues from all the regions to achieve the global revenue for healthcare supply chain market. Companies were considered for the market share analysis, based on their innovation and application and revenue generation.

The report covers a detailed competitive outlook that includes the market share and company profiles of key players operating in the global market. Key players profiled in the report include Oracle corporation, Advocate healthcare, Gesinger health system, SAP AG Group and few to be named.

The global Healthcare supply chain management market has been segmented into:

Global Healthcare supply chain management Market: By Product type
