Abstracts

The report covers the analysis and forecast of the hyper-convergence data center market on global as well as regional level. The study provides historic data of 2016 along with the forecast for the period between 2017 and 2025 based on revenue (US\$ Mn).

The study provides a detailed view of the hyper-convergence data center market, by segmenting it based on by solutions, by application and regional demand. Growing focus of data center providers on introduction of IT services coupled with the rising initiatives of banking sectors towards development of data centers are some of the key drivers augmenting the growth of the global hyper- convergence data center market during the projection period of 2017-2025.

Regional segmentation includes the current and forecast demand for North America, Europe, Asia Pacific, Middle East and Africa and Latin America. The segmentation also includes by solutions and application in all regions. These include different business strategies adopted by the leading players and their recent developments.

A comprehensive analysis of the market dynamics that is inclusive of market drivers, restraints, and opportunities is part of the report. Additionally, the report includes

potential opportunities in the Hyper-convergence data center market at the global and regional levels. Market dynamics are the factors which impact the market growth, so their analysis helps understand the ongoing trends of the global market. Therefore, the report provides the forecast of the global market for the period from 2017 to 2025, along with offering an inclusive study of the hyper-convergence data center market.

The report provides the size of the hyper-convergence data center market in 2017 and the forecast for the next eight years up to 2025. The size of the global hyper-convergence data center market is provided in terms of revenue. Market revenue is defined in US\$ Mn. The market dynamics prevalent in North America, Europe, Asia Pacific, Middle East and Africa and Latin America has been taken into account in estimating the growth of the global market.

Market estimates for this study have been based on revenue being derived through regional pricing trends. The Hyper-convergence data center market has been analyzed based on expected demand. Bottom-up approach is done to estimate the global revenue of the hyper-convergence data center market, split into regions. Based on solutions and applications, the individual revenues from all the regions is summed up to achieve the global revenue for hyper-convergence data center. Companies were considered for the market share analysis, based on their innovation and application and revenue generation. In the absence of specific data related to the sales of hyper-convergence data center several privately held companies, calculated assumptions have been made in view of the company's penetration and regional presence.

The report covers a detailed competitive outlook that includes the market share and company profiles of key players operating in the global market. Key players profiled in the report include VMware Inc., Cisco Systems Inc., Intel Corporation, IBM Corporation, Equinix Inc., and Dell EMC among others.
