Abstracts

Private LTE networks are a well-established market and have been around for more than a decade, albeit as a niche segment of the wider cellular infrastructure segment – iNET's (Infrastructure Networks) 700 MHz LTE network in the Permian Basin, Tampnet's offshore 4G infrastructure in the North Sea, Rio Tinto's private LTE network for its Western Australia mining operations and other initial installations date back to the early 2010s. However, in most national markets, private cellular networks or NPNs (Non-Public Networks) based on the 3GPP-defined 5G standard are just beginning to move beyond PoC (Proof-of-Concept) trials and small-scale deployments to production-grade implementations of standalone 5G networks, which are laying the foundation for Industry 4.0 and advanced application scenarios.

Compared to LTE technology, private 5G networks – also referred to as 5G MPNs (Mobile Private Networks), 5G campus networks, local 5G or e-Um 5G systems depending on geography – can address far more demanding performance requirements in terms of throughput, latency, reliability, availability and connection density. In particular, 5G's URLLC (Ultra-Reliable, Low-Latency Communications) and mMTC (Massive Machine-Type Communications) capabilities, along with a future-proof transition path to 6G networks in the 2030s, have positioned it as a viable alternative to physically wired connections for industrial-grade communications between machines, robots and control systems. Furthermore, despite its relatively higher cost of ownership, 5G's wider coverage radius per radio node, scalability, determinism, security features and mobility support have stirred strong interest in its potential as a replacement for interference-prone unlicensed wireless technologies in IIoT (Industrial IoT) environments, where the number of connected sensors and other endpoints is expected to increase significantly over the coming years.

It is worth noting that China is an outlier and the most mature national market thanks to state-funded directives aimed at accelerating the adoption of 5G connectivity in industrial settings such as factories, warehouses, mines, power plants, substations, oil and gas facilities and ports. To provide some context, the largest private 5G installations in China can comprise hundreds to even thousands of dedicated RAN (Radio Access Network) nodes supported by on-premise or edge cloud-based core network functions depending on specific latency, reliability and security requirements. For example, home appliance manufacturer Midea's Jingzhou industrial park hosts 2,500 indoor and outdoor 5G NR access points to connect workers, machines, robots and vehicles across an area of approximately 104 acres, steelmaker WISCO (Wuhan Iron & Steel Corporation) has installed a dual-layer private 5G network – spanning 85 multi-sector macrocells and 100 small cells – to remotely operate heavy machinery at its steel plant in Wuhan (Hubei), and Fujian-based manufacturer Wanhua Chemical has recently built a customized wireless network that will serve upwards of 8,000 5G RedCap (Reduced Capability) devices, primarily surveillance cameras and IoT sensors.

As end user organizations in the United States, Germany, France, Japan, South Korea, Taiwan and other countries ramp up their digitization and automation initiatives, private 5G networks are progressively being implemented to support use cases as diverse as wirelessly connected machinery for the rapid reconfiguration of production lines, distributed PLC (Programmable Logic Controller) environments, AMRs (Autonomous Mobile Robots) and AGVs (Automated Guided Vehicles) for intralogistics, AR (Augmented Reality)-assisted guidance and troubleshooting, machine vision-based quality control, wireless software flashing of manufactured vehicles, remote-controlled cranes, unmanned mining equipment, BVLOS (Beyond Visual Line-of-Sight) operation of drones, digital twin models of complex industrial systems, ATO (Automatic Train Operation), video analytics for railway crossing and station platform safety, remote visual inspections of aircraft engine parts, real-time collaboration for flight line maintenance operations, XR (Extended Reality)-based military training, virtual visits for parents to see their infants in NICUs (Neonatal Intensive Care Units), live broadcast production in locations not easily accessible by traditional solutions, operations-critical communications during major sporting events, and optimization of cattle fattening and breeding for Wagyu beef production.

Despite prolonged teething problems in the form of a lack of variety of non-smartphone devices, high 5G IoT module costs due to low shipment volumes, limited competence of end user organizations in cellular wireless systems and conservatism with regards to new technology, early adopters are affirming their faith in the long-term potential of private 5G by investing in networks built independently using new shared and local area

licensed spectrum options, in collaboration with private network specialists or via traditional mobile operators. Some private 5G installations have progressed to a stage where practical and tangible benefits – particularly efficiency gains, cost savings and worker safety – are becoming increasingly evident. Notable examples include but are not limited to:

Tesla's private 5G implementation on the shop floor of its Gigafactory Berlin-Brandenburg plant in Brandenburg, Germany, has helped in overcoming up to 90 percent of the overcycle issues for a particular process in the factory's GA (General Assembly) shop. The electric automaker is integrating private 5G network infrastructure to address high-impact use cases in production, intralogistics and quality operations across its global manufacturing facilities.

John Deere is steadily progressing with its goal of reducing dependency on wired Ethernet connections from 70% to 10% over the next five years by deploying private 5G networks at its industrial facilities in the United States, South America and Europe. In a similar effort, automotive aluminum die-castings supplier IKD has replaced 6 miles of cables connecting 600 pieces of machinery with a private 5G network, thereby reducing cable maintenance costs to near zero and increasing the product yield rate by ten percent.

Lufthansa Technik's 5G campus network at its Hamburg facility has removed the need for its civil aviation customers to physically attend servicing by providing reliable, high-resolution video access for virtual parts inspections and borescope examinations at both of its engine overhaul workshops. Previous attempts to implement virtual inspections using unlicensed Wi-Fi technology proved ineffective due to the presence of large metal structures.

The EWG (East-West Gate) Intermodal Terminal's private 5G network has increased productivity from 23-25 containers per hour to 32-35 per hour and reduced the facility's personnel-related operating expenses by 40 percent while eliminating the possibility of crane operator injury due to remote-controlled operation with a latency of less than 20 milliseconds.

The Liverpool 5G Create network in the inner city area of Kensington has demonstrated significant cost savings potential for digital health, education and social care services, including an astonishing \$10,000 drop in yearly expenditure per care home resident through a 5G-connected fall prevention system and a \$2,600 reduction in WAN (Wide Area Network) connectivity charges per GP

(General Practitioner) surgery – which represents \$220,000 in annual savings for the United Kingdom's NHS (National Health Service) when applied to 86 surgeries in Liverpool.

NEC Corporation has improved production efficiency by 30 percent through the introduction of a local 5G-enabled autonomous transport system for intralogistics at its new factory in Kakegawa (Shizuoka Prefecture), Japan. The manufacturing facility's on-premise 5G network has also resulted in an elevated degree of freedom in terms of the factory floor layout, thereby allowing NEC to flexibly respond to changing customer needs, market demand fluctuations and production adjustments.

A local 5G installation at Ushino Nakayama's Osumi farm in Kanoya (Kagoshima Prefecture), Japan, has enabled the Wagyu beef producer to achieve labor cost savings of more than 10 percent through reductions in accident rates, feed loss, and administrative costs. The 5G network provides wireless connectivity for AI (Artificial Intelligence)-based image analytics and autonomous patrol robots.

CJ Logistics has achieved a 20 percent productivity increase at its Ichiri center in Icheon (Gyeonggi), South Korea, following the adoption of a private 5G network to replace the 40,000 square meter warehouse facility's 300 Wi-Fi access points for Industry 4.0 applications, which experienced repeated outages and coverage issues.

Delta Electronics – which has installed private 5G networks for industrial wireless communications at its plants in Taiwan and Thailand – estimates that productivity per direct labor and output per square meter have increased by 69% and 75% respectively following the implementation of 5G-connected smart production lines.

An Open RAN-compliant standalone private 5G network in Taiwan's Pingtung County has facilitated a 30 percent reduction in pest-related agricultural losses and a 15 percent boost in the overall revenue of local farms through the use of 5G-equipped UAVs (Unmanned Aerial Vehicles), mobile robots, smart glasses and AI-enabled image recognition.

JD Logistics – the supply chain and logistics arm of online retailer JD.com – has achieved near-zero packet loss and reduced the likelihood of connection

timeouts by an impressive 70 percent since migrating AGV communications from unlicensed Wi-Fi systems to private 5G networks at its logistics parks in Beijing and Changsha (Hunan), China.

Baosteel – a business unit of the world's largest steelmaker China Baowu Steel Group – credits its 43-site private 5G deployment at two neighboring factories with reducing manual quality inspections by 50 percent and achieving a steel defect detection rate of more than 90 percent, which equates to \$7 Million in annual cost savings by reducing lost production capacity from 9,000 tons to 700 tons.

Dongyi Group Coal Gasification Company ascribes a 50 percent reduction in manpower requirements and a 10 percent increase in production efficiency – which translates to more than \$1 Million in annual cost savings – at its Xinyan coal mine in Lvliang (Shanxi), China, to private 5G-enabled digitization and automation of underground mining operations.

Sinopec's (China Petroleum & Chemical Corporation) explosion-proof 5G network at its Guangzhou oil refinery in Guangdong, China, has reduced accidents and harmful gas emissions by 20% and 30% respectively, resulting in an annual economic benefit of more than \$4 Million. The solution is being replicated across more than 30 refineries of the energy giant.

Since adopting a hybrid public-private 5G network to enhance the safety and efficiency of urban rail transit operations, the Guangzhou Metro rapid transit system has reduced its maintenance costs by approximately 20 percent using 5G-enabled digital perception applications for the real-time identification of water logging and other hazards along railway tracks.

Some of the most technically advanced features of 5G Advanced – 5G's next evolutionarily phase – are also being trialed over private wireless installations. Among other examples, Chinese automaker Great Wall Motor is using an indoor 5G Advanced network for time-critical industrial control within a car roof production line as part of an effort to prevent wire abrasion in mobile application scenarios, which results in production interruptions with an average downtime of 60 hours a year.

In addition, against the backdrop of geopolitical trade tensions and sanctions that have restricted established telecommunications equipment suppliers from operating in

specific countries, private 5G networks have emerged as a means to test domestically produced 5G network infrastructure products in controlled environments prior to large-scale deployments or vendor swaps across national or regional public mobile networks. For instance, Russian industrial groups are trialing private 5G networks in pilot zones within their production sites, using indigenously built 5G equipment operating in Band n79 (4.8-4.9 GHz) spectrum.

To capitalize on the long-term potential of private 5G, a number of new alternative suppliers have also developed 5G infrastructure offerings tailored to the specific needs of industrial applications. For example, satellite communications company Globalstar has launched a 3GPP Release 16-compliant multipoint terrestrial RAN system that is optimized for dense private wireless deployments in Industry 4.0 automation environments while German engineering conglomerate Siemens has developed an in-house private 5G network solution for use at its own plants as well as those of industrial customers.

SNS Telecom & IT estimates that annual investments in private 5G networks for vertical industries will grow at a CAGR of approximately 42% between 2024 and 2027, eventually accounting for nearly \$3.5 Billion by the end of 2027. Although much of this growth will be driven by highly localized 5G networks covering geographically limited areas for Industry 4.0 applications in manufacturing and process industries, sub-1 GHz wide area critical communications networks for public safety, utilities and railway communications are also anticipated to begin their transition from LTE, GSM-R and other legacy narrowband technologies to 5G towards the latter half of the forecast period, as 5G Advanced becomes a commercial reality. Among other features for mission-critical networks, 3GPP Release 18 – which defines the first set of 5G Advanced specifications – adds support for 5G NR equipment operating in dedicated spectrum with less than 5 MHz of bandwidth, paving the way for private 5G networks operating in sub-500 MHz, 700 MHz, 850 MHz and 900 MHz bands for public safety broadband, smart grid modernization and FRMCS (Future Railway Mobile Communication System).

The “Private 5G Networks: 2024 – 2030 – Opportunities, Challenges, Strategies & Forecasts” report presents an in-depth assessment of the private 5G network market, including the value chain, market drivers, barriers to uptake, enabling technologies, operational and business models, vertical industries, application scenarios, key trends, future roadmap, standardization, spectrum availability and allocation, regulatory landscape, case studies, ecosystem player profiles and strategies. The report also presents global and regional market size forecasts from 2024 to 2030. The forecasts

cover three infrastructure submarkets, 16 vertical industries and five regional markets.

The report comes with an associated Excel datasheet suite covering quantitative data from all numeric forecasts presented in the report, as well as a database of over 7,000 global private cellular engagements – including more than 2,200 private 5G installations – as of Q2'2024.

Contents

1 CHAPTER 1: INTRODUCTION

- 1.1 Executive Summary
- 1.2 Topics Covered
- 1.3 Forecast Segmentation
- 1.4 Key Questions Answered
- 1.5 Key Findings
- 1.6 Summary of Private 5G Engagements
- 1.7 Methodology
- 1.8 Target Audience

2 CHAPTER 2: AN OVERVIEW OF PRIVATE 5G NETWORKS

- 2.1 An Introduction to the 3GPP-Defined 5G Standard
 - 2.1.1 What is 5G?
 - 2.1.2 5G Service Profiles
 - 2.1.2.1 eMBB (Enhanced Mobile Broadband)
 - 2.1.2.2 URLLC (Ultra-Reliable, Low-Latency Communications)
 - 2.1.2.3 mMTC/mIoT (Massive Machine-Type Communications/Internet of Things)
 - 2.1.3 5G Advanced & the Evolution to 6G
 - 2.1.4 The Significance of Vertical Industries in the 5G Era
- 2.2 Why Utilize 5G for Private Wireless Networks?
 - 2.2.1 Performance, Mobility, Reliability & Security Characteristics
 - 2.2.2 Ability to Address Both Wide Area & Localized Coverage Needs
 - 2.2.3 Variety of Frequency Bands, Bandwidth Flexibility & Spectral Efficiency
 - 2.2.4 Interworking With Public Mobile Networks & Non-3GPP Technologies
 - 2.2.5 3GPP Support for Industrial-Grade & Mission-Critical Applications
 - 2.2.6 Future-Proof Transition Path Towards 6G Networks
 - 2.2.7 Thriving Ecosystem of Chipsets, Devices & Network Equipment
 - 2.2.8 Economic Viability of Deployment & Operational Costs
- 2.3 Key Themes Influencing the Adoption of Private 5G Networks
 - 2.3.1 Industry 4.0-Driven Wireless Connectivity Requirements
 - 2.3.2 Critical Communications Broadband Evolution
 - 2.3.3 Localized Cellular Coverage for Enterprise Transformation Initiatives
 - 2.3.4 Neutral Hosting, Smart Cities, Community Broadband & Other Themes
- 2.4 Practical Aspects of Private 5G Networks
 - 2.4.1 5G Technology Deployment Modes

- 2.4.1.1 NSA (Non-Standalone) 5G
- 2.4.1.2 SA (Standalone) 5G
- 2.4.2 Spectrum Options
 - 2.4.2.1 National Spectrum for Specific Applications
 - 2.4.2.1.1 Defense & PPDR (Public Protection & Disaster Relief)
 - 2.4.2.1.2 Utilities & Critical Infrastructure Industries
 - 2.4.2.1.3 Aviation, Maritime & Railway Communications
 - 2.4.2.1.4 Other Segments
 - 2.4.2.2 Local Area Licensed Spectrum
 - 2.4.2.2.1 Local Area Licenses for Enterprises & Vertical Users
 - 2.4.2.2.2 Local Leasing of Public Mobile Operator Frequencies
 - 2.4.2.2.3 ASA (Authorized Shared Access) & Light Licensing
 - 2.4.2.3 Unlicensed Spectrum
 - 2.4.2.3.1 Designated License-Exempt Bands
 - 2.4.2.3.2 Opportunistic Unlicensed Access
- 2.4.3 Network Size & Geographic Reach
 - 2.4.3.1 Wide Area Private Cellular Networks
 - 2.4.3.2 Medium-Scale Local Area Networks
 - 2.4.3.3 On-Premise Campus Networks
- 2.4.4 Operational Scenarios
 - 2.4.4.1 Isolated NPNs (Non-Public Networks)
 - 2.4.4.2 Public Mobile Operator-Integrated NPNs
 - 2.4.4.2.1 Dedicated Mobile Operator RAN Coverage
 - 2.4.4.2.2 Shared RAN With On-Premise Core
 - 2.4.4.2.3 Shared RAN & Control Plane
 - 2.4.4.2.4 NPNs Hosted By Public Networks
 - 2.4.4.3 Virtual Sliced Private Networks
 - 2.4.4.4 Hybrid Public-Private Networks
 - 2.4.4.5 Shared Core Private Networks
 - 2.4.4.6 Secure MVNO (Mobile Virtual Network Operator) Arrangements
 - 2.4.4.7 Other Approaches
- 2.4.5 Business Models
 - 2.4.5.1 Fully Independent Private Networks
 - 2.4.5.2 Service Provider-Managed Private Networks
 - 2.4.5.3 Hybrid Ownership, Management & Control
 - 2.4.5.4 Private NaaS (Network-as-a-Service)
 - 2.4.5.5 Other Business Models
- 2.5 The Value Chain of Private 5G Networks
 - 2.5.1 Semiconductor & Enabling Technology Specialists

2.5.2 Terminal OEMs (Original Equipment Manufacturers)

2.5.3 RAN, Core & Transport Infrastructure Suppliers

2.5.4 Service Providers

2.5.4.1 Critical Communications, Industrial, OT & IT System Integrators

2.5.4.2 Pure-Play Private 5G Network Operators

2.5.4.3 National Mobile Operators

2.5.4.4 MVNOs

2.5.4.5 Neutral Hosts

2.5.4.6 Towercos (Tower Companies)

2.5.4.7 Cloud & Edge Platform Providers

2.5.4.8 Fixed-Line Service Providers

2.5.4.9 Fiber Network Operators

2.5.4.10 Satellite Communications Service Providers

2.5.5 End User Organizations

2.5.6 Other Ecosystem Players

2.6 Market Drivers

2.6.1 Growing Demand for High-Bandwidth & Low-Latency Wireless Applications

2.6.2 Endorsement From the Industry 4.0 & Critical Communications Sectors

2.6.3 Limited Public Cellular Coverage in Indoor, Industrial & Remote Environments

2.6.4 Availability of Suitable Spectrum Options for Private Use

2.6.5 Guaranteed Connectivity & QoS (Quality-of-Service) Control

2.6.6 Greater Levels of Network Security & Data Privacy

2.6.7 Operators' & Vendors' Desire for New Revenue Sources

2.6.8 Government-Funded 5G Innovation Initiatives

2.7 Market Barriers

2.7.1 Cost & ROI (Return-On-Investment) Justification

2.7.2 Technical Complexities of Network Deployment & Operation

2.7.3 Integration With Existing Infrastructure & Applications

2.7.4 Limited Scale Effects Due to Lack of Spectrum Harmonization

2.7.5 Competition From Non-3GPP Technologies & Solutions

2.7.6 5G Terminal Equipment-Related Challenges

2.7.7 Skills Gap & Shortage of Proficient Engineers

2.7.8 Conservatism & Slow Pace of Change

3 CHAPTER 3: SYSTEM ARCHITECTURE & TECHNOLOGIES FOR PRIVATE 5G NETWORKS

3.1 Architectural Components of Private 5G Networks

3.2 UE (User Equipment)

- 3.2.1 Smartphones & Handportable Devices
- 3.2.2 Industrial-Grade Routers & Gateways
- 3.2.3 Mobile Hotspots & Vehicular Terminals
- 3.2.4 Fixed Wireless CPEs (Customer Premises Equipment)
- 3.2.5 Tablets & Notebook PCs
- 3.2.6 Smart Wearables
- 3.2.7 Cellular IoT Modules
- 3.2.8 Add-On Dongles
- 3.3 RAN (Radio Access Network)
 - 3.3.1 NG-RAN 5G NR Access Network
 - 3.3.1.1 gNBs 5G NR Base Stations
 - 3.3.1.2 en-gNBs Secondary Node 5G NR Base Stations
 - 3.3.1.3 ng-eNBs Next-Generation LTE Base Stations
 - 3.3.2 Architectural Components of gNB Base Stations
 - 3.3.2.1 RUs (Radio Units)
 - 3.3.2.2 Integrated Radio & Baseband Units
 - 3.3.2.3 DUs (Distributed Baseband Units)
 - 3.3.2.4 CUs (Centralized Baseband Units)
- 3.4 Mobile Core
 - 3.4.1 5GC (5G Core): Core Network for Standalone 5G Implementations
 - 3.4.1.1 Access, Mobility & Session Management
 - 3.4.1.1.1 AMF (Access & Mobility Management Function)
 - 3.4.1.1.2 SMF (Session Management Function)
 - 3.4.1.1.3 UPF (User Plane Function)
 - 3.4.1.2 Subscription & Data Management
 - 3.4.1.2.1 AUSF (Authentication Server Function)
 - 3.4.1.2.2 AAnF (AKMA Anchor Function)
 - 3.4.1.2.3 UDM (Unified Data Management)
 - 3.4.1.2.4 UDR (Unified Data Repository)
 - 3.4.1.2.5 UDSF (Unstructured Data Storage Function)
 - 3.4.1.2.6 UCMF (UE Radio Capability Management Function)
 - 3.4.1.2.7 5G-EIR (5G Equipment Identity Register)
 - 3.4.1.3 Policy & Charging
 - 3.4.1.3.1 PCF (Policy Control Function)
 - 3.4.1.3.2 CHF (Charging Function)
 - 3.4.1.4 Signaling & Routing
 - 3.4.1.4.1 SCP (Service Communication Proxy)
 - 3.4.1.4.2 SEPP (Security Edge Protection Proxy)
 - 3.4.1.4.3 BSF (Binding Support Function)

3.4.1.5 Network Resource Management

3.4.1.5.1 NEF (Network Exposure Function)

3.4.1.5.2 NRF (Network Repository Function)

3.4.1.5.3 NSSF (Network Slice Selection Function)

3.4.1.5.4 NSSAAF (Network Slice-Specific & SNPN Authentication-Authorization Function)

3.4.1.5.5 NSACF (Network Slice Admission Control Function)

3.4.1.6 Data Analytics & Automation

3.4.1.6.1 NWDAF (Network Data Analytics Function)

3.4.1.6.2 AnLF (Analytics Logical Function)

3.4.1.6.3 MTLF (Model Training Logical Function)

3.4.1.6.4 DCCF (Data Collection Coordination Function)

3.4.1.6.5 ADRF (Analytics Data Repository Function)

3.4.1.6.6 MFAF (Messaging Framework Adaptor Function)

3.4.1.7 Location Services

3.4.1.7.1 LMF (Location Management Function)

3.4.1.7.2 GMLC (Gateway Mobile Location Center)

3.4.1.8 Application Enablement

3.4.1.8.1 AFs (Application Functions)

3.4.1.8.2 SMSF (Short Message Service Function)

3.4.1.8.3 CBCF (Cell Broadcast Center Function)

3.4.1.8.4 5G DDNMF (5G Direct Discovery Name Management Function)

3.4.1.8.5 TSCTSF (Time-Sensitive Communication & Time Synchronization Function)

3.4.1.8.6 TSN AF (Time-Sensitive Networking Application Function)

3.4.1.8.7 EASDF (Edge Application Server Discovery Function)

3.4.1.9 Multicast-Broadcast Support

3.4.1.9.1 MB-SMF (Multicast-Broadcast SMF)

3.4.1.9.2 MB-UPF (Multicast-Broadcast UPF)

3.4.1.9.3 MBSF (Multicast-Broadcast Service Function)

3.4.1.9.4 MBSTF (Multicast-Broadcast Service Transport Function)

3.5 Transport Network

3.5.1 Fronthaul: RU-to-DU Transport

3.5.2 Midhaul: DU-to-CU Transport

3.5.3 Backhaul: RAN-to-Core Transport

3.5.4 Physical Transmission Mediums

3.5.4.1 Fiber & Wireline Transport Technologies

3.5.4.1.1 Owned, Lit & Dark Fiber

3.5.4.1.2 Ethernet & IP-Based Transport

- 3.5.4.1.3 WDM (Wavelength Division Multiplexing)
- 3.5.4.1.4 PON (Passive Optical Network)
- 3.5.4.1.5 OTN (Optical Transport Network)
- 3.5.4.1.6 DOCSIS, G.fast & Other Technologies
- 3.5.4.2 Microwave & mmWave (Millimeter Wave) Wireless Links
 - 3.5.4.2.1 Traditional Bands (6 42 GHz)
 - 3.5.4.2.2 V-Band (60 GHz)
 - 3.5.4.2.3 E-Band (70/80 GHz)
 - 3.5.4.2.4 W-Band (92 114.25 GHz)
 - 3.5.4.2.5 D-Band (130 174.8 GHz)
- 3.5.4.3 Satellite Communications
 - 3.5.4.3.1 GEO (Geostationary Earth Orbit)
 - 3.5.4.3.2 MEO (Medium Earth Orbit)
 - 3.5.4.3.3 LEO (Low Earth Orbit)
- 3.6 Services & Interconnectivity
 - 3.6.1 End User Application Services
 - 3.6.1.1 Generic Broadband, Messaging & IoT Services
 - 3.6.1.2 IMS Core: VoNR (Voice Over NR) & MMTel (Multimedia Telephony)
 - 3.6.1.3 5G MBS/5MBS (5G Multicast-Broadcast Services)
 - 3.6.1.4 Group Communications & MCS (Mission-Critical Services)
 - 3.6.1.5 IIoT (Industrial IoT), Cyber-Physical Control & Domain-Specific Connected Services
 - 3.6.1.6 ProSe (Proximity-Based Services) for Direct D2D (Device-to-Device)
 - Discovery & Communications
 - 3.6.1.7 Vehicular, Aviation, Maritime & Railway-Related Applications
 - 3.6.1.8 3GPP Service Frameworks for Vertical Industries
 - 3.6.1.8.1 CAPIF (Common API Framework)
 - 3.6.1.8.2 SEAL (Service Enabler Architecture Layer for Verticals)
 - 3.6.1.8.3 EDGEAPP (Architecture for Enabling Edge Applications)
 - 3.6.1.9 VAL (Vertical Application Layer) Enablers
 - 3.6.1.9.1 V2X (Vehicle-to-Everything)
 - 3.6.1.9.2 UAS (Uncrewed Aerial Systems)
 - 3.6.1.9.3 5GMARCH/MSGin5G (Messaging in 5G)
 - 3.6.1.9.4 FF (Factories of the Future)
 - 3.6.1.9.5 PINAPP (Personal IoT Networks), XR (Extended Reality) & Others
 - 3.6.2 Interconnectivity With 3GPP & Non-3GPP Networks
 - 3.6.2.1 3GPP Roaming & Service Continuity
 - 3.6.2.1.1 National & International Roaming
 - 3.6.2.1.2 Service Continuity Outside Network Footprint

3.6.2.2 Non-3GPP Network Integration

3.6.2.2.1 N3IWF (Non-3GPP Interworking Function)

3.6.2.2.2 TNGF (Trusted Non-3GPP Gateway Function)

3.6.2.2.3 TWIF (Trusted WLAN Interworking Function)

3.6.2.2.4 NSWOF (Non-Seamless WLAN Offload Function)

3.6.2.2.5 W-AGF (Wireline Access Gateway Function)

3.6.2.2.6 IWF (Interworking Function) for LMR (Land Mobile Radio)

3.6.2.2.7 ATSSS (Access Traffic Steering, Switching & Splitting)

3.7 Key Enabling Technologies & Concepts

3.7.1 3GPP Support for NPNs (Non-Public Networks)

3.7.1.1 Types of NPNs

3.7.1.1.1 SNPNs (Standalone NPNs)

3.7.1.1.2 PN-IPNs (Public Network-Integrated NPNs)

3.7.1.2 SNPN Identification & Selection

3.7.1.3 PN-IPN Resource Allocation & Isolation

3.7.1.4 CAG (Closed Access Group) for Cell Access Control

3.7.1.5 Mobility, Roaming & Service Continuity

3.7.1.6 Interworking Between SNPNs & Public Networks

3.7.1.7 UE Configuration & Subscription-Related Aspects

3.7.1.8 Other 3GPP-Defined Capabilities for NPNs

3.7.2 Mobile Broadband Evolution

3.7.2.1 Massive MIMO, Beamforming & Advanced Antenna Systems

3.7.2.2 Air Interface Design & Optimizations

3.7.2.3 CA (Carrier Aggregation) & Multi-Carrier Operations

3.7.2.4 Expansion Into Higher Frequency Spectrum Bands

3.7.3 Industry 4.0 & Cellular IoT

3.7.3.1 URLLC Techniques: High-Reliability & Low-Latency Enablers

3.7.3.2 5G LAN (Local Area Network)-Type Service

3.7.3.3 Integration With IEEE 802.1 TSN (Time-Sensitive Networking) Systems

3.7.3.4 Native 3GPP Framework for TSC (Time-Sensitive Communications)

3.7.3.5 Support for IETF DetNet (Deterministic Networking)

3.7.3.6 5G NR Light: RedCap (Reduced Capability) UE Type

3.7.3.7 eMTC, NB-IoT & mMTC: Wide Area & High-Density IoT Applications

3.7.4 Critical Communications

3.7.4.1 MCX (Mission-Critical PTT, Video & Data)

3.7.4.2 QPP (QoS, Priority & Preemption)

3.7.4.3 IOPS (Isolated Operation for Public Safety)

3.7.4.4 Cell Site & Infrastructure Hardening

3.7.4.5 HPUE (High-Power User Equipment)

- 3.7.4.6 Other UE-Related Functional Enhancements
- 3.7.5 High-Precision Positioning
 - 3.7.5.1 Assisted-GNSS (Global Navigation Satellite System)
 - 3.7.5.2 RAN-Based Positioning Techniques
 - 3.7.5.3 RAN-Independent Methods
- 3.7.6 Edge Computing
 - 3.7.6.1 Optimizing Latency, Service Performance & Backhaul Costs
 - 3.7.6.2 3GPP-Defined Features for Edge Computing Support
 - 3.7.6.3 Public vs. Private Edge Computing
- 3.7.7 Network Slicing
 - 3.7.7.1 Logical Partitioning of Network Resources
 - 3.7.7.2 3GPP Functions, Identifiers & Procedures for Slicing
 - 3.7.7.3 RAN Slicing
 - 3.7.7.4 Mobile Core Slicing
 - 3.7.7.5 Transport Network Slicing
 - 3.7.7.6 UE-Based Network Slicing Features
 - 3.7.7.7 Management & Orchestration Aspects
- 3.7.8 Network Sharing
 - 3.7.8.1 Service-Specific PLMN (Public Land Mobile Network) IDs
 - 3.7.8.2 DNN (Data Network Name)-Based Isolation
 - 3.7.8.3 GWCN (Gateway Core Network): Core Network Sharing
 - 3.7.8.4 MOCN (Multi-Operator Core Network): RAN & Spectrum Sharing
 - 3.7.8.5 MORAN (Multi-Operator RAN): RAN Sharing Without Spectrum Pooling
 - 3.7.8.6 DECOR (Dedicated Core) & eDECOR (Enhanced DECOR)
 - 3.7.8.7 Roaming in Non-Overlapping Service Areas
 - 3.7.8.8 Passive Sharing of Infrastructure Resources
- 3.7.9 E2E (End-to-End) Security
 - 3.7.9.1 UE Authentication Framework
 - 3.7.9.2 Subscriber Privacy
 - 3.7.9.3 Air Interface Confidentiality & Integrity
 - 3.7.9.4 Resilience Against Radio Jamming
 - 3.7.9.5 RAN, Core & Transport Network Security
 - 3.7.9.6 Security Aspects of Network Slicing
 - 3.7.9.7 Application Domain Protection
 - 3.7.9.8 Other Security Considerations
- 3.7.10 Shared & Unlicensed Spectrum
 - 3.7.10.1 DSS (Dynamic Spectrum Sharing): LTE & 5G NR Coexistence
 - 3.7.10.2 CBRS (Citizens Broadband Radio Service): Three-Tiered Sharing
 - 3.7.10.3 LSA (Licensed Shared Access) & eLSA (Evolved LSA): Two-Tiered Sharing

- 3.7.10.4 AFC (Automated Frequency Coordination): License-Exempt Sharing
- 3.7.10.5 Local Area Licensing of Shared Spectrum
- 3.7.10.6 5G NR-U (NR in Unlicensed Spectrum)
- 3.7.11 Rapidly Deployable 5G Network Systems
 - 3.7.11.1 NIB (Network-in-a-Box) Systems
 - 3.7.11.2 Vehicular COWs (Cells-on-Wheels)
 - 3.7.11.3 Aerial Cell Sites
 - 3.7.11.4 Maritime Cellular Platforms
- 3.7.12 Direct Communications & Coverage Expansion
 - 3.7.12.1 Sidelink for Direct Mode D2D Communications
 - 3.7.12.2 UE-to-Network & UE-to-UE Relays
 - 3.7.12.3 Indoor & Outdoor Small Cells
 - 3.7.12.4 DAS (Distributed Antenna Systems)
 - 3.7.12.5 IAB (Integrated Access & Backhaul)
 - 3.7.12.6 Mobile IAB: VMRs (Vehicle-Mounted Relays)
 - 3.7.12.7 NCRs (Network-Controlled Repeaters)
 - 3.7.12.8 NTN (Non-Terrestrial Networks)
 - 3.7.12.9 ATG/A2G (Air-to-Ground) Connectivity
- 3.7.13 Cloud-Native, Software-Driven & Open Networking
 - 3.7.13.1 Cloud-Native Technologies
 - 3.7.13.2 Microservices & SBA (Service-Based Architecture)
 - 3.7.13.3 Containerization of Network Functions
 - 3.7.13.4 NFV (Network Functions Virtualization)
 - 3.7.13.5 SDN (Software-Defined Networking)
 - 3.7.13.6 Cloud Compute, Storage & Networking Infrastructure
 - 3.7.13.7 APIs (Application Programming Interfaces)
 - 3.7.13.8 Open RAN & Core Architectures
- 3.7.14 Network Intelligence & Automation
 - 3.7.14.1 AI (Artificial Intelligence)
 - 3.7.14.2 Machine & Deep Learning
 - 3.7.14.3 Big Data & Advanced Analytics
 - 3.7.14.4 SON (Self-Organizing Networks)
 - 3.7.14.5 Intelligent Control, Management & Orchestration
 - 3.7.14.6 Support for Network Intelligence & Automation in 3GPP Standards

4 CHAPTER 4: KEY VERTICAL INDUSTRIES & APPLICATIONS

- 4.1 Cross-Sector & Enterprise Application Capabilities
 - 4.1.1 Mobile Broadband

- 4.1.2 FWA (Fixed Wireless Access)
- 4.1.3 Voice & Messaging Services
- 4.1.4 High-Definition Video Transmission
- 4.1.5 Telepresence & Video Conferencing
- 4.1.6 Multimedia Broadcasting & Multicasting
- 4.1.7 IoT (Internet of Things) Networking
- 4.1.8 Wireless Connectivity for Wearables
- 4.1.9 Untethered AR/VR/MR (Augmented, Virtual & Mixed Reality)
- 4.1.10 Real-Time Holographic Projections
- 4.1.11 Tactile Internet & Haptic Feedback
- 4.1.12 Precise Positioning & Tracking
- 4.1.13 Industrial Automation
- 4.1.14 Remote Control of Machines
- 4.1.15 Connected Mobile Robotics
- 4.1.16 Unmanned & Autonomous Vehicles
- 4.1.17 BVLOS (Beyond Visual Line-of-Sight) Operation of Drones
- 4.1.18 Data-Driven Analytics & Insights
- 4.1.19 Sensor-Equipped Digital Twins
- 4.1.20 Predictive Maintenance of Assets
- 4.2 Vertical Industries & Specific Application Scenarios
 - 4.2.1 Agriculture
 - 4.2.1.1 Intelligent Monitoring of Crop, Soil & Weather Conditions
 - 4.2.1.2 IoT & Advanced Analytics-Driven Yield Optimization
 - 4.2.1.3 Sensor-Based Smart Irrigation Control Systems
 - 4.2.1.4 Real-Time Tracking & Geofencing in Farms
 - 4.2.1.5 Livestock & Aquaculture Health Management
 - 4.2.1.6 Video-Based Remote Veterinary Inspections
 - 4.2.1.7 Unmanned Autonomous Tractors & Farm Vehicles
 - 4.2.1.8 Robots for Planting, Weeding & Harvesting
 - 4.2.1.9 5G-Equipped Agricultural Drones
 - 4.2.1.10 Connected Greenhouses & Vertical Farms
 - 4.2.2 Aviation
 - 4.2.2.1 Inflight Connectivity for Passengers & Cabin Crew
 - 4.2.2.2 Connected Airports for Enhanced Traveler & Visitor Experience
 - 4.2.2.3 Coordination of Ground Support Equipment, Vehicles & Personnel
 - 4.2.2.4 ATM (Air Traffic Management) for Drones & Urban Air Mobility Vehicles
 - 4.2.2.5 Wireless Upload of EFB (Electronic Flight Bag) & IFE (In-Flight Entertainment) Updates
 - 4.2.2.6 Aircraft Data Offload for Operational & Maintenance Purposes

- 4.2.2.7 Video Surveillance of Airport Surface & Terminal Areas
- 4.2.2.8 5G-Enabled Remote Inspection & Repair of Aircraft
- 4.2.2.9 Navigation, Weather & Other IoT Sensors
- 4.2.2.10 Smart Baggage Handling
- 4.2.2.11 Asset Awareness & Tracking
- 4.2.2.12 Passenger Flow & Resource Management
- 4.2.2.13 Automation of Check-In & Boarding Procedures
- 4.2.2.14 Intelligent Airport Service Robots
- 4.2.3 Broadcasting
 - 4.2.3.1 3GPP-Based PMSE (Program Making & Special Events)
 - 4.2.3.2 Live AV (Audio-Visual) Media Production Using NPNs
 - 4.2.3.3 Private 5G-Enabled Production in Remote Locations
 - 4.2.3.4 Network Slicing for Contribution Feeds
 - 4.2.3.5 Wire-Free Cameras & Microphones
 - 4.2.3.6 Multicast & Broadcast Content Distribution
- 4.2.4 Construction
 - 4.2.4.1 Wireless Connectivity for Construction Sites & Field Offices
 - 4.2.4.2 Instantaneous Access to Business-Critical Applications
 - 4.2.4.3 5G-Based Remote Control of Heavy Machinery
 - 4.2.4.4 Autonomous Mobile Robots for Construction
 - 4.2.4.5 IoT Sensor-Driven Maintenance of Equipment
 - 4.2.4.6 Video Surveillance & Analytics for Site Security
 - 4.2.4.7 Real-Time Visibility of Personnel, Assets & Materials
 - 4.2.4.8 Aerial Surveying & Monitoring of Construction Sites
- 4.2.5 Education
 - 4.2.5.1 Remote & Distance Learning Services
 - 4.2.5.2 Mobile Access to Academic Resources
 - 4.2.5.3 5G-Connected Smart Classrooms
 - 4.2.5.4 Automation of Administrative Tasks
 - 4.2.5.5 Personalized & Engaging Learning
 - 4.2.5.6 AR/VR-Based Immersive Lessons
 - 4.2.5.7 5G-Enabled Virtual Field Trips
 - 4.2.5.8 Educational Telepresence Robots
- 4.2.6 Forestry
 - 4.2.6.1 Wireless Connectivity for Forestry Operations & Recreation
 - 4.2.6.2 5G-Facilitated Teleoperation of Forestry Equipment
 - 4.2.6.3 Autonomous Harvesting & Milling Machinery
 - 4.2.6.4 Real-Time Tracking of Equipment, Vehicles & Personnel
 - 4.2.6.5 Cellular IoT Sensors for Biological & Environmental Monitoring

- 4.2.6.6 Wireless Cameras for Wildlife Observation, Conservation & Security
- 4.2.6.7 Early Wildfire Detection & Containment Systems
- 4.2.6.8 Drones for Search & Rescue Operations
- 4.2.7 Healthcare
 - 4.2.7.1 5G-Connected Smart Hospitals & Healthcare Facilities
 - 4.2.7.2 Wireless Transmission of Medical Imagery & Rich Datasets
 - 4.2.7.3 Real-Time Monitoring of Patients in Acute & Intensive Care
 - 4.2.7.4 Telehealth Video Consultations for Visual Assessment
 - 4.2.7.5 Connectivity for AI-Based Healthcare Applications
 - 4.2.7.6 AR Systems for Complex Medical Procedures
 - 4.2.7.7 Remote-Controlled Surgery & Examination
 - 4.2.7.8 Assisted Living & Rehabilitation Robotics
 - 4.2.7.9 Immersive VR-Based Medical & Surgical Training
 - 4.2.7.10 Connected Ambulances for EMS (Emergency Medical Services)
- 4.2.8 Manufacturing
 - 4.2.8.1 Untethered Connectivity for Production & Process Automation
 - 4.2.8.2 Wireless Motion Control & C2C (Control-to-Control) Communications
 - 4.2.8.3 Cellular-Equipped Mobile Control Panels
 - 4.2.8.4 Mobile Robots & AGVs (Automated Guided Vehicles)
 - 4.2.8.5 Autonomous Forklifts & Warehouse Robotics
 - 4.2.8.6 AR-Facilitated Factory Floor Operations
 - 4.2.8.7 Machine Vision-Based Quality Inspection
 - 4.2.8.8 Closed-Loop Process Control
 - 4.2.8.9 Process & Environmental Monitoring
 - 4.2.8.10 Precise Indoor Positioning for Asset Management
 - 4.2.8.11 Remote Access & Maintenance of Equipment
- 4.2.9 Military
 - 4.2.9.1 5G-Based Tactical Battlefield Communications
 - 4.2.9.2 Smart Military Bases & Command Posts
 - 4.2.9.3 ISR (Intelligence, Surveillance & Reconnaissance)
 - 4.2.9.4 Command & Control of Weapon Systems
 - 4.2.9.5 Remote Operation of Robotics & Unmanned Assets
 - 4.2.9.6 AR HUD (Heads-Up Display) Systems
 - 4.2.9.7 Wireless VR/MR-Based Military Training
 - 4.2.9.8 Perimeter Security & Force Protection
- 4.2.10 Mining
 - 4.2.10.1 Safety-Critical Communications in Remote Mining Environments
 - 4.2.10.2 Wireless Control of Drilling, Excavation & Related Equipment
 - 4.2.10.3 Automated Loading, Haulage & Train Operations

- 4.2.10.4 Video-Based Monitoring of Personnel & Assets
- 4.2.10.5 Underground Positioning & Geofencing
- 4.2.10.6 Smart Ventilation & Water Management
- 4.2.10.7 Real-Time Operational Intelligence
- 4.2.10.8 AR & VR for Mining Operations
- 4.2.11 Oil & Gas
 - 4.2.11.1 Wireless Connectivity for Remote Exploration & Production Sites
 - 4.2.11.2 Critical Voice & Data-Based Mobile Workforce Communications
 - 4.2.11.3 Push-to-Video & Telepresence Conferencing for Field Operations
 - 4.2.11.4 Cellular-Equipped Surveillance Cameras for Situational Awareness
 - 4.2.11.5 IoT Sensor-Enabled Remote Monitoring & Automation of Processes
 - 4.2.11.6 SCADA (Supervisory Control & Data Acquisition) Communications
 - 4.2.11.7 Location Services for Worker Safety & Asset Tracking
 - 4.2.11.8 AR Smart Helmets for Hands-Free Remote Assistance
 - 4.2.11.9 Predictive Maintenance of Oil & Gas Facilities
 - 4.2.11.10 Mobile Robots for Safety Hazard Inspections
- 4.2.12 Ports & Maritime Transport
 - 4.2.12.1 Critical Communications for Port Workers
 - 4.2.12.2 Automation of Port & Terminal Operations
 - 4.2.12.3 5G-Connected AGVs for Container Transport
 - 4.2.12.4 Remote-Controlled Cranes & Terminal Tractors
 - 4.2.12.5 Video Analytics for Operational Purposes
 - 4.2.12.6 Environmental & Condition Monitoring
 - 4.2.12.7 Port Traffic Management & Control
 - 4.2.12.8 AR & VR Applications for Port Digitization
 - 4.2.12.9 Unmanned Aerial Inspections of Port Facilities
 - 4.2.12.10 Private Cellular-Enabled Maritime Communications
 - 4.2.12.11 Wireless Ship-to-Shore Connectivity in Nearshore Waters
 - 4.2.12.12 5G-Facilitated Remote Steering of Unmanned Vessels
- 4.2.13 Public Safety
 - 4.2.13.1 Mission-Critical PTT Voice Communications
 - 4.2.13.2 Real-Time Video & High-Resolution Imagery
 - 4.2.13.3 Messaging, File Transfer & Presence Services
 - 4.2.13.4 Secure & Seamless Mobile Broadband Access
 - 4.2.13.5 Location-Based Services & Enhanced Mapping
 - 4.2.13.6 Multimedia CAD (Computer-Aided Dispatch)
 - 4.2.13.7 Massive-Scale Video Surveillance & Analytics
 - 4.2.13.8 Smart Glasses & AR Headgear for First Responders
 - 4.2.13.9 5G-Equipped Police, Firefighting & Rescue Robots

- 4.2.13.10 5G MBS/5MBS in High-Density Environments
- 4.2.13.11 Sidelink-Based Direct Mode Communications
- 4.2.14 Railways
 - 4.2.14.1 FRMCS (Future Railway Mobile Communication System)
 - 4.2.14.2 Train-to-Ground & Train-to-Train Connectivity
 - 4.2.14.3 Wireless Intra-Train Communications
 - 4.2.14.4 Rail Operations-Critical Voice, Data & Video Services
 - 4.2.14.5 ATO (Automatic Train Operation) & Traffic Management
 - 4.2.14.6 Video Surveillance for Operational Safety & Security
 - 4.2.14.7 Smart Maintenance of Railway Infrastructure
 - 4.2.14.8 Intelligent Management of Logistics Facilities
 - 4.2.14.9 Onboard Broadband Internet Access
 - 4.2.14.10 PIS (Passenger Information Systems)
 - 4.2.14.11 Smart Rail & Metro Station Services
- 4.2.15 Utilities
 - 4.2.15.1 Multi-Service FANs (Field Area Networks)
 - 4.2.15.2 Critical Applications for Field Workforce Communications
 - 4.2.15.3 AMI (Advanced Metering Infrastructure)
 - 4.2.15.4 DA (Distribution Automation) Systems
 - 4.2.15.5 Microgrid & DER (Distributed Energy Resource) Integration
 - 4.2.15.6 5G-Enabled VPPs (Virtual Power Plants)
 - 4.2.15.7 Low-Latency SCADA Applications for Utilities
 - 4.2.15.8 Teleprotection of Transmission & Distribution Grids
 - 4.2.15.9 Video Monitoring for Critical Infrastructure Protection
 - 4.2.15.10 Sensor-Based Detection of Water & Gas Leaks
 - 4.2.15.11 AR Information Overlays for Repairs & Maintenance
 - 4.2.15.12 Drone & Robot-Assisted Inspections of Utility Assets
 - 4.2.15.13 Local Wireless Connectivity for Remote & Offshore Facilities
- 4.2.16 Warehousing & Other Verticals

5 CHAPTER 5: SPECTRUM AVAILABILITY, ALLOCATION & USAGE

5.1 National & Local Area Licensed Spectrum

- 5.1.1 Low-Band (Sub-1 GHz)
 - 5.1.1.1 200 400 MHz
 - 5.1.1.2 410 & 450 MHz
 - 5.1.1.3 600 MHz
 - 5.1.1.4 700 MHz
 - 5.1.1.5 800 MHz

- 5.1.1.6 900 MHz
- 5.1.2 Mid-Band (1.6 GHz)
 - 5.1.2.1 1.4 GHz
 - 5.1.2.2 1.6 GHz
 - 5.1.2.3 1.8 GHz
 - 5.1.2.4 1.9 GHz
 - 5.1.2.5 2.1 GHz
 - 5.1.2.6 2.3 GHz
 - 5.1.2.7 2.4 GHz
 - 5.1.2.8 2.5 GHz
 - 5.1.2.9 2.6 GHz
 - 5.1.2.10 3.4 GHz
 - 5.1.2.11 3.5 GHz CBRS PAL Tier
 - 5.1.2.12 3.7-3.8 GHz
 - 5.1.2.13 3.8-4.2 GHz
 - 5.1.2.14 4.6-4.9 GHz
 - 5.1.2.15 Other Bands
- 5.1.3 High-Band mmWave (Millimeter Wave)
 - 5.1.3.1 26 GHz
 - 5.1.3.2 28 GHz
 - 5.1.3.3 37 GHz
 - 5.1.3.4 Other Bands
- 5.2 License-Exempt (Unlicensed) Spectrum
 - 5.2.1 Sub-1 GHz Bands (470-790/800/900 MHz)
 - 5.2.2 1.8 GHz DECT Guard Band
 - 5.2.3 1.9 GHz sXGP Band
 - 5.2.4 2.4 GHz (2,400-2,483.5 MHz)
 - 5.2.5 3.5 GHz CBRS GAA Tier
 - 5.2.6 5 GHz (5,150-5,925 MHz)
 - 5.2.7 6 GHz (5,925-7,125 MHz)
 - 5.2.8 60 GHz (57-71 GHz)
 - 5.2.9 Other Bands
- 5.3 North America
 - 5.3.1 United States
 - 5.3.2 Canada
- 5.4 Asia Pacific
 - 5.4.1 Australia
 - 5.4.2 New Zealand
 - 5.4.3 China

5.4.4 Hong Kong

5.4.5 Taiwan

5.4.6 Japan

5.4.7 South Korea

5.4.8 Singapore

5.4.9 Malaysia

5.4.10 Indonesia

5.4.11 Philippines

5.4.12 Thailand

5.4.13 Vietnam

5.4.14 Laos

5.4.15 Myanmar

5.4.16 India

5.4.17 Pakistan

5.4.18 Rest of Asia Pacific

5.5 Europe

5.5.1 United Kingdom

5.5.1.1 Great Britain

5.5.1.2 Northern Ireland

5.5.2 Republic of Ireland

5.5.3 France

5.5.4 Germany

5.5.5 Belgium

5.5.6 Netherlands

5.5.7 Switzerland

5.5.8 Austria

5.5.9 Italy

5.5.10 Spain

5.5.11 Portugal

5.5.12 Sweden

5.5.13 Norway

5.5.14 Denmark

5.5.15 Finland

5.5.16 Estonia

5.5.17 Czech Republic

5.5.18 Poland

5.5.19 Ukraine

5.5.20 Turkiye

5.5.21 Cyprus

- 5.5.22 Greece
- 5.5.23 Bulgaria
- 5.5.24 Romania
- 5.5.25 Hungary
- 5.5.26 Slovenia
- 5.5.27 Croatia
- 5.5.28 Russia
- 5.5.29 Belarus
- 5.5.30 Rest of Europe
- 5.6 Middle East & Africa
 - 5.6.1 Saudi Arabia
 - 5.6.2 United Arab Emirates
 - 5.6.3 Qatar
 - 5.6.4 Oman
 - 5.6.5 Bahrain
 - 5.6.6 Kuwait
 - 5.6.7 Iraq
 - 5.6.8 Jordan
 - 5.6.9 Israel
 - 5.6.10 Egypt
 - 5.6.11 Algeria
 - 5.6.12 Morocco
 - 5.6.13 Tunisia
 - 5.6.14 South Africa
 - 5.6.15 Botswana
 - 5.6.16 Zambia
 - 5.6.17 Kenya
 - 5.6.18 Ethiopia
 - 5.6.19 Angola
 - 5.6.20 Republic of the Congo
 - 5.6.21 Gabon
 - 5.6.22 Nigeria
 - 5.6.23 Uganda
 - 5.6.24 Ghana
 - 5.6.25 Senegal
 - 5.6.26 Rest of the Middle East & Africa
- 5.7 Latin & Central America
 - 5.7.1 Brazil
 - 5.7.2 Mexico

- 5.7.3 Argentina
- 5.7.4 Colombia
- 5.7.5 Chile
- 5.7.6 Peru
- 5.7.7 Ecuador
- 5.7.8 Bolivia
- 5.7.9 Dominican Republic
- 5.7.10 Barbados
- 5.7.11 Trinidad & Tobago
- 5.7.12 Suriname
- 5.7.13 Rest of Latin & Central America

6 CHAPTER 6: STANDARDIZATION, REGULATORY & COLLABORATIVE INITIATIVES

6.1 3GPP (Third Generation Partnership Project)

6.1.1 Release 15: 5G eMBB Capabilities, Introduction of Network Slicing & New Operating Bands

6.1.2 Release 16: 3GPP Support for NPNs, 5G URLLC, TSN, NR-U & Vertical Application Enablers

6.1.3 Release 17: NPN Enhancements, Edge Computing, TSC, Expansion of IIoT Features, RedCap & NTN Connectivity

6.1.4 Release 18: 5G Advanced, Further NPN Refinements, DetNet, Intelligent Automation, Spectrum Flexibility & XR Services

6.1.5 Releases 19, 20, 21 & Beyond: Succession From 5G Advanced to the 6G Evolution

6.2 450 MHz Alliance

6.2.1 Promoting 3GPP Technologies in the 380 470 MHz Frequency Range

6.3 5G-ACIA (5G Alliance for Connected Industries and Automation)

6.3.1 Maximizing the Applicability of 5G Technology in the Industrial Domain

6.4 5GAIA (5G Applications Industry Array)

6.4.1 Advancing the Development of China's 5G Applications Industry

6.5 5G Campus Network Alliance

6.5.1 Supporting the Market Development of 5G Campus Networks in Germany

6.6 5GDNA (5G Deterministic Networking Alliance)

6.6.1 Industry Collaboration & Promotion of 5GDN (5G Deterministic Networking)

6.7 5GFF (5G Future Forum)

6.7.1 Accelerating the Delivery of 5G MEC (Multi-Access Edge Computing) Solutions

6.8 5G Forum (South Korea)

- 6.8.1 Expanding Convergence Between 5G Technology & Vertical Industries
- 6.9 5G Health Association
 - 6.9.1 Interfacing 5G-Based Connectivity & Healthcare Applications
- 6.10 5G-MAG (5G Media Action Group)
 - 6.10.1 5G-Based NPNs in Media Production
- 6.11 5GMF (Fifth Generation Mobile Communication Promotion Forum, Japan)
 - 6.11.1 Initiatives Related to Local 5G Networks in Japan
- 6.12 5GSA (5G Slicing Association)
 - 6.12.1 Addressing Vertical Industry Requirements for 5G Network Slicing
- 6.13 6G-IA (6G Smart Networks and Services Industry Association)
 - 6.13.1 Private 5G-Related Projects & Activities
- 6.14 AGURRE (Association of Major Users of Operational Radio Networks, France)
 - 6.14.1 Spectrum Access, Regulatory Framework & Industrial Ecosystem for Private Mobile Networks
- 6.15 APCO (Association of Public-Safety Communications Officials) International
 - 6.15.1 Public Safety 5G-Related Advocacy Efforts
- 6.16 ATIS (Alliance for Telecommunications Industry Solutions)
 - 6.16.1 Deployment & Operational Requirements of 5G-Based NPNs
 - 6.16.2 Shared HNI & IBN Administration for CBRS Spectrum
 - 6.16.3 Other Private 5G-Related Initiatives
- 6.17 BTG (Dutch Association of Large-Scale ICT & Telecommunications Users)
 - 6.17.1 KMBG (Dutch Critical Mobile Broadband Users) Expert Group
- 6.18 B-TrunC (Broadband Trunking Communication) Industry Alliance
 - 6.18.1 B-TrunC Standard for 3GPP-Based Critical Communications
- 6.19 CAMET (China Association of Metros)
 - 6.19.1 Adoption of 3GPP Networks for Urban Rail Transit Systems
- 6.20 CEPT (European Conference of Postal and Telecommunications Administrations)
 - 6.20.1 Common Spectrum Policies for Local 5G, PPDR Broadband & FRMCS
- 6.21 DSA (Dynamic Spectrum Alliance)
 - 6.21.1 Promoting Unlicensed & Dynamic Access to Spectrum
- 6.22 Electricity Canada (Canadian Electricity Association)
 - 6.22.1 PVNO & Dedicated Spectrum for Smart Grid Communications
- 6.23 ENTELEC (Energy Telecommunications and Electrical Association)
 - 6.23.1 Policy Advocacy & Other Private 5G-Related Activities
- 6.24 EPRI (Electric Power Research Institute)
 - 6.24.1 Research & Guidelines in Support of 3GPP-Based Utility Communications
- 6.25 ERA (European Union Agency for Railways)
 - 6.25.1 Evolution of Railway Radio Communication Project
- 6.26 ETSI (European Telecommunications Standards Institute)

6.26.1 Technical Specifications for FRMCS, PPDR Broadband, MCX & TETRA-3GPP Interworking

6.26.2 Other Work Relevant to Private 5G Networks

6.27 EU-Rail (Europe's Rail Joint Undertaking)

6.27.1 FRMCS-Related Research & Innovation Activities

6.28 EUTC (European Utilities Telecom Council)

6.28.1 Addressing 5G-Related Requirements for European Utilities

6.29 EUWENA (European Users of Enterprise Wireless Networks Association)

6.29.1 Catalyzing the Wider Adoption of 3GPP-Based Private Networks

6.30 EWA (Enterprise Wireless Alliance)

6.30.1 Supporting the Private Wireless Industry in the United States

6.31 free5GC

6.31.1 Open-Source 5GC Software

6.32 GSA (Global Mobile Suppliers Association)

6.32.1 Advocacy for Private Mobile Networks

6.33 GSMA (GSM Association)

6.33.1 Guidelines for 5G Private & Dedicated Networks

6.34 GUTMA (Global UTM Association)

6.34.1 ACJA (Aerial Connectivity Joint Activity) Initiative

6.35 ITU (International Telecommunication Union)

6.35.1 International & Regional Harmonization of 5G Spectrum

6.35.2 Defining the Role of IMT-2020 to Support Vertical Applications

6.36 JOTS (Joint Operators Technical Specification) Forum

6.36.1 NHIB (Neutral Host In-Building) Specification

6.37 JRC (Joint Radio Company)

6.37.1 Supporting 5G-Based Smart Grid Initiatives

6.38 KRRRI (Korea Railroad Research Institute)

6.38.1 Functional Testing & Certification of 3GPP-Based Railway Communications Systems

6.39 LF (Linux Foundation)

6.39.1 Magma Mobile Core Software Platform

6.39.2 LF Networking's 5G Super Blueprint

6.39.3 LF Edge's Akraino Private 5G ICN (Integrated Cloud-Native) Blueprint

6.39.4 Other Projects Relevant to Private 5G Networks

6.40 MFA (Alliance for Private Networks)

6.40.1 Uni5G Technology Blueprints for Private 5G Networks

6.40.2 Network Identifier Program Supporting Private & Neutral Host Networks

6.41 MSSA (Mobile Satellite Services Association)

6.41.1 Advancing the Global Direct-to-Device NTN Ecosystem

- 6.42 NGA (Next G Alliance)
 - 6.42.1 Building the Foundation for North American Leadership in 6G
- 6.43 NGMN (Next-Generation Mobile Networks) Alliance
 - 6.43.1 Work Related to Private 5G & Network Slicing
- 6.44 NSC (National Spectrum Consortium)
 - 6.44.1 Enhancing Spectrum Superiority & 5G Capabilities for Federal Users
- 6.45 OCP (Open Compute Project) Foundation
 - 6.45.1 Initiatives Aimed at Open Designs for Telco Hardware
- 6.46 one6G Association
 - 6.46.1 Driving 6G Innovation & Development Across Vertical Industries
- 6.47 ONF (Open Networking Foundation)
 - 6.47.1 Aether Private 5G Connected Edge Platform
 - 6.47.2 SD-RAN, SD-Core, OMEC & Other Relevant Projects
- 6.48 OnGo Alliance
 - 6.48.1 Promoting 5G OnGo Wireless Network Technology
 - 6.48.2 Technical Specifications & Guidelines for 5G NR-Based CBRS Networks
 - 6.48.3 Product Certification Program Supporting Multi-Vendor Interoperability
- 6.49 OPC Foundation
 - 6.49.1 OPC UA (Unified Architecture) Over 5G for Industry 4.0 Applications
- 6.50 Open RAN Policy Coalition
 - 6.50.1 Promoting Policies to Drive the Adoption of Open RAN
- 6.51 Open5GCore
 - 6.51.1 Vendor-Independent 5GC Implementation
- 6.52 Open5GS & NextEPC
 - 6.52.1 Open-Source 5GC & EPC Software
- 6.53 OpenInfra (Open Infrastructure) Foundation
 - 6.53.1 StarlingX Software Stack for Ultra-Low Latency Edge Applications
 - 6.53.2 OpenStack Cloud Software & Other Projects
- 6.54 O-RAN Alliance
 - 6.54.1 O-RAN Architecture Specifications
 - 6.54.2 O-RAN SC (Software Community)
 - 6.54.3 Testing & Integration Support
- 6.55 OSA (OpenAirInterface Software Alliance)
 - 6.55.1 OAI (OpenAirInterface) 5G RAN, Core & MOSAIC5G Projects
- 6.56 PIA (PSBN Innovation Alliance)
 - 6.56.1 PSBN (Public Safety Broadband Network) Governance in Canada's Ontario Province
- 6.57 PMeV (German Professional Mobile Radio Association)
 - 6.57.1 Professional Broadband & 5G Campus Network-Related Activities

- 6.58 PSBTA (Public Safety Broadband Technology Association)
 - 6.58.1 Public Safety 5G-Related Activities
- 6.59 PSCE (Public Safety Communication Europe)
 - 6.59.1 Public Safety Broadband-Related Standardization Activities
 - 6.59.2 BroadX Projects: Pan-European Interoperable Mobile Broadband System for Public Safety
- 6.60 Safe-Net Forum
 - 6.60.1 Technical & Policy Guidance for 3GPP-Based Critical Communications Networks
- 6.61 SCF (Small Cell Forum)
 - 6.61.1 Reference Blueprints for Private 5G Networks
 - 6.61.2 Neutral Hosting, Edge Computing & Other Relevant Work
- 6.62 Seamless Air Alliance
 - 6.62.1 Leading Global Standards for Inflight Connectivity
- 6.63 SimpleRAN
 - 6.63.1 Ensuring Interoperability & Transparency in the vRAN Ecosystem
- 6.64 srsRAN Project
 - 6.64.1 Open-Source 5G Software Suite
- 6.65 TCA (Trusted Connectivity Alliance)
 - 6.65.1 5G SIM/eSIM Recommendations for Private Networks
- 6.66 TCCA (The Critical Communications Association)
 - 6.66.1 CCBG (Critical Communications Broadband Group)
 - 6.66.2 BIG (Broadband Industry Group)
 - 6.66.3 SCADA, Smart Grid & IoT Group
 - 6.66.4 Future Technologies Group
- 6.67 techUK
 - 6.67.1 SPF (Spectrum Policy Forum)
- 6.68 TIA (Telecommunications Industry Association)
 - 6.68.1 Defining Requirements for LMR-3GPP Interworking & Critical Broadband Capabilities
- 6.69 TIP (Telecom Infra Project)
 - 6.69.1 5G Private Networks Solution Group
 - 6.69.2 Neutral Host NaaS Solution Group
 - 6.69.3 OpenRAN & Open Core Network Groups
 - 6.69.4 Other Relevant Product & Solution Groups
- 6.70 TTA (Telecommunications Technology Association, South Korea)
 - 6.70.1 Standardization Efforts for 3GPP-Based Public Safety, Railway & Maritime Communications
- 6.71 U.S. NIST (National Institute of Standards and Technology)

- 6.71.1 Public Safety Broadband & 5G-Related R&D Initiatives
- 6.72 U.S. NPSTC (National Public Safety Telecommunications Council)
 - 6.72.1 Leadership for LMR-3GPP Interworking & Public Safety Broadband Communications
- 6.73 U.S. NTIA (National Telecommunications and Information Administration)
 - 6.73.1 Wireless Innovation & Supply Chain Security
- 6.74 UBBA (Utility Broadband Alliance)
 - 6.74.1 Championing the Advancement of Private Broadband Networks for Utilities
- 6.75 UIC (International Union of Railways)
 - 6.75.1 FRMCS Program for the Replacement of GSM-R Networks
- 6.76 UK5G Innovation Network
 - 6.76.1 Promoting Private 5G Adoption Projects, Testbeds & Trials
- 6.77 UNIFE (The European Rail Supply Industry Association)
 - 6.77.1 UNITEL Committee: Development & Implementation of FRMCS
- 6.78 UTC (Utilities Technology Council)
 - 6.78.1 Private 5G-Related Advocacy, Technology Development & Policy Efforts
- 6.79 UTCAL (Utilities Telecom & Technology Council America Latina)
 - 6.79.1 Promoting Private 5G Networks for Latin American Utilities
- 6.80 VDMA (German Mechanical and Plant Engineering Association)
 - 6.80.1 Guidelines for 5G in Mechanical & Plant Engineering
- 6.81 WBA (Wireless Broadband Alliance)
 - 6.81.1 5G & Wi-Fi Convergence in Private 5G Networks
 - 6.81.2 OpenRoaming for Private 5G
- 6.82 WhiteSpace Alliance
 - 6.82.1 Promoting the Use of 3GPP, IEEE & IETF Standards for TVWS Spectrum
- 6.83 WInnForum (Wireless Innovation Forum)
 - 6.83.1 CBRS Standards for the Implementation of FCC Rulemaking
 - 6.83.2 6 GHz Unlicensed Sharing & Other Committees
- 6.84 XGP (eXtended Global Platform) Forum
 - 6.84.1 Development & Promotion of the sXGP Unlicensed Service
- 6.85 Others
 - 6.85.1 Vendor-Led Private 5G Alliances
 - 6.85.2 National Government Agencies & Regulators
 - 6.85.3 Regional & Country-Specific Associations
 - 6.85.4 Global Industry Initiatives & Organizations

7 CHAPTER 7: CASE STUDIES OF PRIVATE 5G NETWORKS

7.1 ABP (Associated British Ports): Shared Access License-Enabled Private 5G

Network for Port of Southampton

- 7.1.1 Operational Model
- 7.1.2 Spectrum Type
- 7.1.3 Integrators & Suppliers
- 7.1.4 Deployment Summary

7.2 Adif AV (Alta Velocidad): Private 5G Infrastructure for Wireless Access in Strategic Logistics Terminals

- 7.2.1 Operational Model
- 7.2.2 Spectrum Type
- 7.2.3 Integrators & Suppliers
- 7.2.4 Deployment Summary

7.3 Agnico Eagle Mines: Streamlining Mining Operations With Industrial-Grade Private 5G Networks

- 7.3.1 Operational Model
- 7.3.2 Spectrum Type
- 7.3.3 Integrators & Suppliers
- 7.3.4 Deployment Summary

7.4 Airbus: Multi-Campus Private Cellular Network for Aircraft Manufacturing Facilities Across Europe

- 7.4.1 Operational Model
- 7.4.2 Spectrum Type
- 7.4.3 Integrators & Suppliers
- 7.4.4 Deployment Summary

7.5 ANA (All Nippon Airways): Local 5G-Powered Digital Transformation of Aviation Training

- 7.5.1 Operational Model
- 7.5.2 Spectrum Type
- 7.5.3 Integrators & Suppliers
- 7.5.4 Deployment Summary

7.6 ArcelorMittal: 5G Steel Project for Industrial Digitization & Automation

- 7.6.1 Operational Model
- 7.6.2 Spectrum Type
- 7.6.3 Integrators & Suppliers
- 7.6.4 Deployment Summary

7.7 ASE Group: 28 GHz mmWave 5G Network for Semiconductor Manufacturing

- 7.7.1 Operational Model
- 7.7.2 Spectrum Type
- 7.7.3 Integrators & Suppliers
- 7.7.4 Deployment Summary

7.8 ASN (Alcatel Submarine Networks): Private 5G Networks for Calais & Greenwich Production Sites

- 7.8.1 Operational Model
- 7.8.2 Spectrum Type
- 7.8.3 Integrators & Suppliers
- 7.8.4 Deployment Summary

7.9 BAM Nuttall: Accelerating Innovation at Construction Sites With Private 5G Networks

- 7.9.1 Operational Model
- 7.9.2 Spectrum Type
- 7.9.3 Integrators & Suppliers
- 7.9.4 Deployment Summary

7.10 Barcelona Port Authority: Standalone Private 5G Network for 500 Tenant Companies

- 7.10.1 Operational Model
- 7.10.2 Spectrum Type
- 7.10.3 Integrators & Suppliers
- 7.10.4 Deployment Summary

7.11 BASF: 5G Campus Networks for Real-Time Wireless Connectivity in Chemical Production Sites

- 7.11.1 Operational Model
- 7.11.2 Spectrum Type
- 7.11.3 Integrators & Suppliers
- 7.11.4 Deployment Summary

7.12 BBC (British Broadcasting Corporation): Portable 5G-Based NPN Solution for News Contribution

- 7.12.1 Operational Model
- 7.12.2 Spectrum Type
- 7.12.3 Integrators & Suppliers
- 7.12.4 Deployment Summary

7.13 BHP: Transitioning From Private LTE to Standalone 5G Networks for Advanced Digitization & Automation

- 7.13.1 Operational Model
- 7.13.2 Spectrum Type
- 7.13.3 Integrators & Suppliers
- 7.13.4 Deployment Summary

7.14 BlackRock: On-Premise Private 5G Network Installation for New York Global Headquarters

- 7.14.1 Operational Model

- 7.14.2 Spectrum Type
- 7.14.3 Integrators & Suppliers
- 7.14.4 Deployment Summary
- 7.15 BMW Group: Private 5G Networks for Autonomous Intralogistics in Production Plants
 - 7.15.1 Operational Model
 - 7.15.2 Spectrum Type
 - 7.15.3 Integrators & Suppliers
 - 7.15.4 Deployment Summary
- 7.16 Boston Children's Hospital: Scalable Hybrid Public-Private 5G Network for Connected Healthcare
 - 7.16.1 Operational Model
 - 7.16.2 Spectrum Type
 - 7.16.3 Integrators & Suppliers
 - 7.16.4 Deployment Summary
- 7.17 BT Media & Broadcast: Private 5G Networks for Live Sports Content Production
 - 7.17.1 Operational Model
 - 7.17.2 Spectrum Type
 - 7.17.3 Integrators & Suppliers
 - 7.17.4 Deployment Summary
- 7.18 Cal Poly (California Polytechnic State University): Converged Public-Private 5G Network
 - 7.18.1 Operational Model
 - 7.18.2 Spectrum Type
 - 7.18.3 Integrators & Suppliers
 - 7.18.4 Deployment Summary
- 7.19 China National Coal Group: Multi-Band 700 MHz & 2.6 GHz Private 5G Network for Dahaize Coal Mine
 - 7.19.1 Operational Model
 - 7.19.2 Spectrum Type
 - 7.19.3 Integrators & Suppliers
 - 7.19.4 Deployment Summary
- 7.20 CJ Logistics: Bolstering Fulfillment Center Productivity Using Private 5G Network
 - 7.20.1 Operational Model
 - 7.20.2 Spectrum Type
 - 7.20.3 Integrators & Suppliers
 - 7.20.4 Deployment Summary
- 7.21 Cleveland Clinic: Private 5G Network for Mentor Hospital
 - 7.21.1 Operational Model

7.21.2 Spectrum Type

7.21.3 Integrators & Suppliers

7.21.4 Deployment Summary

7.22 Cologne Bonn Airport: Revolutionizing Internal Operations With Private 5G Campus Network

7.22.1 Operational Model

7.22.2 Spectrum Type

7.22.3 Integrators & Suppliers

7.22.4 Deployment Summary

7.23 COMAC (Commercial Aircraft Corporation of China): 5G-Connected Intelligent Aircraft Manufacturing Factories

7.23.1 Operational Model

7.23.2 Spectrum Type

7.23.3 Integrators & Suppliers

7.23.4 Deployment Summary

7.24 CSG (China Southern Power Grid): Harnessing Private Cellular Systems & 5G Network Slicing for Smart Grid Operations

7.24.1 Operational Model

7.24.2 Spectrum Type

7.24.3 Integrators & Suppliers

7.24.4 Deployment Summary

7.25 DB (Deutsche Bahn): Digitizing & Automating Rail Operations With 5G-Based FRMCS

7.25.1 Operational Model

7.25.2 Spectrum Type

7.25.3 Integrators & Suppliers

7.25.4 Deployment Summary

7.26 Delta Electronics: Private 5G Networks for Manufacturing Facilities in Taiwan & Thailand

7.26.1 Operational Model

7.26.2 Spectrum Type

7.26.3 Integrators & Suppliers

7.26.4 Deployment Summary

7.27 District of Ban Chang: 26 GHz mmWave Private 5G Network for Smart City Services

7.27.1 Operational Model

7.27.2 Spectrum Type

7.27.3 Integrators & Suppliers

7.27.4 Deployment Summary

7.28 Dongyi Group Coal Gasification Company: Hybrid Public-Private Network for Xinyan Coal Mine

7.28.1 Operational Model

7.28.2 Spectrum Type

7.28.3 Integrators & Suppliers

7.28.4 Deployment Summary

7.29 EHIME CATV: Gigabit-Grade FWA Service Using 28 GHz Local 5G Network

7.29.1 Operational Model

7.29.2 Spectrum Type

7.29.3 Integrators & Suppliers

7.29.4 Deployment Summary

7.30 Estonian Ministry of Defense: Private 5G Network for CR14 (Cyber Range 14)

7.30.1 Operational Model

7.30.2 Spectrum Type

7.30.3 Integrators & Suppliers

7.30.4 Deployment Summary

7.31 EUROGATE: 5G Campus Networks for the Digitization of Port Logistics

7.31.1 Operational Model

7.31.2 Spectrum Type

7.31.3 Integrators & Suppliers

7.31.4 Deployment Summary

7.32 EWG (East-West Gate) Intermodal Terminal: Private 5G Network for Smart Railway Logistics

7.32.1 Operational Model

7.32.2 Spectrum Type

7.32.3 Integrators & Suppliers

7.32.4 Deployment Summary

7.33 Ferrovial: Standalone Private 5G Network for Silvertown Tunnel Project

7.33.1 Operational Model

7.33.2 Spectrum Type

7.33.3 Integrators & Suppliers

7.33.4 Deployment Summary

7.34 Fiskarheden: Local 3.7 GHz License-Based Private 5G Network for Transtrand Sawmill

7.34.1 Operational Model

7.34.2 Spectrum Type

7.34.3 Integrators & Suppliers

7.34.4 Deployment Summary

7.35 Frankfurt University Hospital: Dedicated 5G Network for Secure Medical

Messaging & Remote Diagnostics

7.35.1 Operational Model

7.35.2 Spectrum Type

7.35.3 Integrators & Suppliers

7.35.4 Deployment Summary

7.36 Fraport: Private 5G Campus Network for Future-Oriented Operations at Frankfurt Airport

7.36.1 Operational Model

7.36.2 Spectrum Type

7.36.3 Integrators & Suppliers

7.36.4 Deployment Summary

7.37 Fujitsu: Japan's First 5G Network Installation Based on 28 GHz Local 5G Spectrum

7.37.1 Operational Model

7.37.2 Spectrum Type

7.37.3 Integrators & Suppliers

7.37.4 Deployment Summary

7.38 Gerdau: Private 5G Network for Ouro Branco Steel Production Plant

7.38.1 Operational Model

7.38.2 Spectrum Type

7.38.3 Integrators & Suppliers

7.38.4 Deployment Summary

7.39 Gogo Business Aviation: 5G A2G Wireless Network for Inflight Connectivity

7.39.1 Operational Model

7.39.2 Spectrum Type

7.39.3 Integrators & Suppliers

7.39.4 Deployment Summary

7.40 Guangzhou Metro: 5G + Smart Metro Project for Urban Rail Transit

7.40.1 Operational Model

7.40.2 Spectrum Type

7.40.3 Integrators & Suppliers

7.40.4 Deployment Summary

7.41 Hanshin Electric Railway: Capitalizing on Local 5G for Safer & Efficient Railway Operations

7.41.1 Operational Model

7.41.2 Spectrum Type

7.41.3 Integrators & Suppliers

7.41.4 Deployment Summary

7.42 Helios Park Hospital: Enhancing Medical System Efficiency With Standalone 5G

Campus Network

7.42.1 Operational Model

7.42.2 Spectrum Type

7.42.3 Integrators & Suppliers

7.42.4 Deployment Summary

7.43 Hip Hing Engineering: Dedicated 5G Network for Kai Tak Sports Park

7.43.1 Operational Model

7.43.2 Spectrum Type

7.43.3 Integrators & Suppliers

7.43.4 Deployment Summary

7.44 Hiroshima Gas: Local 5G-Powered Safety Operations at Hatsukaichi LNG

Terminal

7.44.1 Operational Model

7.44.2 Spectrum Type

7.44.3 Integrators & Suppliers

7.44.4 Deployment Summary

7.45 HKIA (Hong Kong International Airport): 28 GHz Public-Private 5G Infrastructure Project

7.45.1 Operational Model

7.45.2 Spectrum Type

7.45.3 Integrators & Suppliers

7.45.4 Deployment Summary

7.46 Hoban Construction: 4.7 GHz Private 5G Network for Apartment Complex Worksite

7.46.1 Operational Model

7.46.2 Spectrum Type

7.46.3 Integrators & Suppliers

7.46.4 Deployment Summary

7.47 Hsinchu City Fire Department: Satellite-Backhauled Private 5G Network for PPDR Communications

7.47.1 Operational Model

7.47.2 Spectrum Type

7.47.3 Integrators & Suppliers

7.47.4 Deployment Summary

7.48 Hutchison Ports: Driving the Digitization & Automation of Ports Through Private 5G Networks

7.48.1 Operational Model

7.48.2 Spectrum Type

7.48.3 Integrators & Suppliers

7.48.4 Deployment Summary

7.49 Inventec Corporation: Standalone Private 5G Network for Taoyuan Guishan Plant

7.49.1 Operational Model

7.49.2 Spectrum Type

7.49.3 Integrators & Suppliers

7.49.4 Deployment Summary

7.50 IRFU (Irish Rugby Football Union): Enabling Fast In-Play Data Analysis With Private 5G Network

7.50.1 Operational Model

7.50.2 Spectrum Type

7.50.3 Integrators & Suppliers

7.50.4 Deployment Summary

7.51 Jacto: Private 5G Network for Paulopolis Agricultural Machinery Manufacturing Plant

7.51.1 Operational Model

7.51.2 Spectrum Type

7.51.3 Integrators & Suppliers

7.51.4 Deployment Summary

7.52 JBG SMITH Properties: National Landing Private 5G Infrastructure Platform

7.52.1 Operational Model

7.52.2 Spectrum Type

7.52.3 Integrators & Suppliers

7.52.4 Deployment Summary

7.53 JD Logistics: Migrating AGV Communications From Wi-Fi to Private 5G Networks

7.53.1 Operational Model

7.53.2 Spectrum Type

7.53.3 Integrators & Suppliers

7.53.4 Deployment Summary

7.54 John Deere: Employing Private 5G Networks to Unshackle Industrial Facilities From Cables

7.54.1 Operational Model

7.54.2 Spectrum Type

7.54.3 Integrators & Suppliers

7.54.4 Deployment Summary

7.55 Kansai Electric Power: Enhancing Power Station & Wind Farm Maintenance Using Local 5G Networks

7.55.1 Operational Model

7.55.2 Spectrum Type

7.55.3 Integrators & Suppliers

7.55.4 Deployment Summary

7.56 Kaohsiung City Police Department: Sliced Private 5G Network for Smart Patrol Cars

7.56.1 Operational Model

7.56.2 Spectrum Type

7.56.3 Integrators & Suppliers

7.56.4 Deployment Summary

7.57 Kawasaki Heavy Industries: Connecting Smart Factory Robotics With Local 5G Technology

7.57.1 Operational Model

7.57.2 Spectrum Type

7.57.3 Integrators & Suppliers

7.57.4 Deployment Summary

7.58 KEPCO (Korea Electric Power Corporation): Private 5G Networks for Substation Management

7.58.1 Operational Model

7.58.2 Spectrum Type

7.58.3 Integrators & Suppliers

7.58.4 Deployment Summary

7.59 Kumagai Gumi: Unleashing the Potential of Unmanned Construction Using Local 5G Networks

7.59.1 Operational Model

7.59.2 Spectrum Type

7.59.3 Integrators & Suppliers

7.59.4 Deployment Summary

7.60 Latvian Ministry of Defense: Camp Adazi 5G Testbed for Defense Innovations

7.60.1 Operational Model

7.60.2 Spectrum Type

7.60.3 Integrators & Suppliers

7.60.4 Deployment Summary

7.61 Lishui Municipal Emergency Management: 5G-Enabled Natural Disaster Management System

7.61.1 Operational Model

7.61.2 Spectrum Type

7.61.3 Integrators & Suppliers

7.61.4 Deployment Summary

7.62 Liverpool 5G Create Project: Standalone Private 5G Network for Digital Health, Education & Social Care

7.62.1 Operational Model

7.62.2 Spectrum Type

7.62.3 Integrators & Suppliers

7.62.4 Deployment Summary

7.63 Lufthansa Technik: Industrial-Grade 5G Campus Network for Hamburg Engine Shops

7.63.1 Operational Model

7.63.2 Spectrum Type

7.63.3 Integrators & Suppliers

7.63.4 Deployment Summary

7.64 Mercedes-Benz Group: World's First 5G Campus Network for Automotive Production

7.64.1 Operational Model

7.64.2 Spectrum Type

7.64.3 Integrators & Suppliers

7.64.4 Deployment Summary

7.65 Midea Group: 5G-Connected Factories for Washing Machine Manufacturing

7.65.1 Operational Model

7.65.2 Spectrum Type

7.65.3 Integrators & Suppliers

7.65.4 Deployment Summary

7.66 Mitsubishi Electric: Local 5G-Based Industrial Wireless System for Factory Automation

7.66.1 Operational Model

7.66.2 Spectrum Type

7.66.3 Integrators & Suppliers

7.66.4 Deployment Summary

7.67 Narita International Airport: Local 5G Network for Self-Driving Shuttle Buses & Critical Communications

7.67.1 Operational Model

7.67.2 Spectrum Type

7.67.3 Integrators & Suppliers

7.67.4 Deployment Summary

7.68 Navantia: Digital Transformation of Shipyard Operations Using Dedicated 5G Infrastructure & Edge Computing

7.68.1 Operational Model

7.68.2 Spectrum Type

7.68.3 Integrators & Suppliers

7.68.4 Deployment Summary

7.69 NEC Corporation: Improving Production Efficiency With Local 5G-Connected Autonomous Transport System

- 7.69.1 Operational Model
- 7.69.2 Spectrum Type
- 7.69.3 Integrators & Suppliers
- 7.69.4 Deployment Summary
- 7.70 NLMK Group: Digitizing Steel Production & Mining Operations With Private Wireless Networks
 - 7.70.1 Operational Model
 - 7.70.2 Spectrum Type
 - 7.70.3 Integrators & Suppliers
 - 7.70.4 Deployment Summary
- 7.71 Norwegian Armed Forces: Defense-Specific Network Slices & Tactical Private 5G Systems
 - 7.71.1 Operational Model
 - 7.71.2 Spectrum Type
 - 7.71.3 Integrators & Suppliers
 - 7.71.4 Deployment Summary
- 7.72 PCK Raffinerie: Accelerating Oil Refinery Digitization With 5G Campus Network
 - 7.72.1 Operational Model
 - 7.72.2 Spectrum Type
 - 7.72.3 Integrators & Suppliers
 - 7.72.4 Deployment Summary
- 7.73 Port of Tyne: Advancing Smart Port Transformation With Private 5G Network
 - 7.73.1 Operational Model
 - 7.73.2 Spectrum Type
 - 7.73.3 Integrators & Suppliers
 - 7.73.4 Deployment Summary
- 7.74 POSCO: Leveraging Private 5G to Link Autonomous Locomotives & Railway Control Systems
 - 7.74.1 Operational Model
 - 7.74.2 Spectrum Type
 - 7.74.3 Integrators & Suppliers
 - 7.74.4 Deployment Summary
- 7.75 PSA International: Private 5G Networks for Container Terminal Operations
 - 7.75.1 Operational Model
 - 7.75.2 Spectrum Type
 - 7.75.3 Integrators & Suppliers
 - 7.75.4 Deployment Summary
- 7.76 Ricoh: Embracing Digital Innovation in Production Operations With Local 5G Networks

7.76.1 Operational Model

7.76.2 Spectrum Type

7.76.3 Integrators & Suppliers

7.76.4 Deployment Summary

7.77 Robert Bosch: Automating & Digitizing Manufacturing Facilities With Private 5G Networks

7.77.1 Operational Model

7.77.2 Spectrum Type

7.77.3 Integrators & Suppliers

7.77.4 Deployment Summary

7.78 ROKN (Republic of Korea Navy): Secure Private 5G Network for Second Fleet Operations

7.78.1 Operational Model

7.78.2 Spectrum Type

7.78.3 Integrators & Suppliers

7.78.4 Deployment Summary

7.79 Ryder Cup Golf Competition: Integrated Private 5G/Wi-Fi Network for Fans & Staff

7.79.1 Operational Model

7.79.2 Spectrum Type

7.79.3 Integrators & Suppliers

7.79.4 Deployment Summary

7.80 Sao Martinho: Pioneering Smart Agribusiness Innovations With Private 5G Networks

7.80.1 Operational Model

7.80.2 Spectrum Type

7.80.3 Integrators & Suppliers

7.80.4 Deployment Summary

7.81 SCA (Svenska Cellulosa Aktiebolaget): Local 5G Connectivity for Timber Terminals & Paper Mills

7.81.1 Operational Model

7.81.2 Spectrum Type

7.81.3 Integrators & Suppliers

7.81.4 Deployment Summary

7.82 SGCC (State Grid Corporation of China): Sliced Public-Private 5G & 5.8 GHz Private NR-U Networks

7.82.1 Operational Model

7.82.2 Spectrum Type

7.82.3 Integrators & Suppliers

7.82.4 Deployment Summary

7.83 Siemens: Independently Developed Private 5G Infrastructure for Industry 4.0 Applications

7.83.1 Operational Model

7.83.2 Spectrum Type

7.83.3 Integrators & Suppliers

7.83.4 Deployment Summary

7.84 Sinopec (China Petroleum & Chemical Corporation): 5G + Smart Petrochemical Project

7.84.1 Operational Model

7.84.2 Spectrum Type

7.84.3 Integrators & Suppliers

7.84.4 Deployment Summary

7.85 SMC (Samsung Medical Center): On-Premise Private 5G Network for Medical Education

7.85.1 Operational Model

7.85.2 Spectrum Type

7.85.3 Integrators & Suppliers

7.85.4 Deployment Summary

7.86 Snam: Hybrid 5G MPN (Mobile Private Network) for 23 Plants

7.86.1 Operational Model

7.86.2 Spectrum Type

7.86.3 Integrators & Suppliers

7.86.4 Deployment Summary

7.87 SNCF (French National Railways): Enabling Rail Innovations With 5G Technology

7.87.1 Operational Model

7.87.2 Spectrum Type

7.87.3 Integrators & Suppliers

7.87.4 Deployment Summary

7.88 Swedish Armed Forces: Tactical 5G Bubbles for Secure Military Communications

7.88.1 Operational Model

7.88.2 Spectrum Type

7.88.3 Integrators & Suppliers

7.88.4 Deployment Summary

7.89 TBN (Trinity Broadcasting Network): Private 5G Network for Broadcast Studio

7.89.1 Operational Model

7.89.2 Spectrum Type

7.89.3 Integrators & Suppliers

7.89.4 Deployment Summary

7.90 Tianjin Port Group: On-Premise 5G Infrastructure for Intelligent & Automated Port

Operations

7.90.1 Operational Model

7.90.2 Spectrum Type

7.90.3 Integrators & Suppliers

7.90.4 Deployment Summary

7.91 Tokyo Metropolitan University: L5G (Local 5G) Project in Support of 'Future Tokyo' Strategy

7.91.1 Operational Model

7.91.2 Spectrum Type

7.91.3 Integrators & Suppliers

7.91.4 Deployment Summary

7.92 U.S. DOD (Department of Defense): Expanding 5G-Enabled Communications & Warfighting Capabilities

7.92.1 Operational Model

7.92.2 Spectrum Type

7.92.3 Integrators & Suppliers

7.92.4 Deployment Summary

7.93 UKD (University Hospital of Dusseldorf): Improving Patient Care & Saving Lives With 5G Campus Network

7.93.1 Operational Model

7.93.2 Spectrum Type

7.93.3 Integrators & Suppliers

7.93.4 Deployment Summary

7.94 Ushino Nakayama: Transforming Kagoshima Wagyu Beef Production With Local 5G Connectivity

7.94.1 Operational Model

7.94.2 Spectrum Type

7.94.3 Integrators & Suppliers

7.94.4 Deployment Summary

7.95 VA Palo Alto Health Care System: Campus-Wide Private 5G Network for Clinical Care Applications

7.95.1 Operational Model

7.95.2 Spectrum Type

7.95.3 Integrators & Suppliers

7.95.4 Deployment Summary

7.96 Volkswagen Group: Private 5G for Smart Manufacturing & Intelligent Vehicle Development

7.96.1 Operational Model

7.96.2 Spectrum Type

- 7.96.3 Integrators & Suppliers
- 7.96.4 Deployment Summary
- 7.97 VPA (Virginia Port Authority): Private 5G Connectivity for Semi-Automated Container Terminals
 - 7.97.1 Operational Model
 - 7.97.2 Spectrum Type
 - 7.97.3 Integrators & Suppliers
 - 7.97.4 Deployment Summary
- 7.98 West China Second University Hospital (Sichuan University): Enabling Smart Healthcare With Private 5G Network
 - 7.98.1 Operational Model
 - 7.98.2 Spectrum Type
 - 7.98.3 Integrators & Suppliers
 - 7.98.4 Deployment Summary
- 7.99 WISCO (Wuhan Iron & Steel Corporation): Dual-Layer 2.1 GHz & 3.5 GHz Private 5G Network for Steel Plant
 - 7.99.1 Operational Model
 - 7.99.2 Spectrum Type
 - 7.99.3 Integrators & Suppliers
 - 7.99.4 Deployment Summary
- 7.100 X Shore: Empowering Electric Boat Manufacturing With Private 5G Network
 - 7.100.1 Operational Model
 - 7.100.2 Spectrum Type
 - 7.100.3 Integrators & Suppliers
 - 7.100.4 Deployment Summary

8 CHAPTER 8: KEY ECOSYSTEM PLAYERS

- 8.1 10T Tech
- 8.2 1NCE
- 8.3 1oT
- 8.4 2TEST (Alkor-Communication)
- 8.5 3D-P (Epiroc)
- 8.6 450connect
- 8.7 4K Solutions
- 8.8 4RF
- 8.9 6Harmonics/6WiLInk
- 8.10 6WIND
- 8.11 7P (Seven Principles)

- 8.12 A Beep/Diga-Talk+
- 8.13 A1 Telekom Austria Group
- 8.14 A10 Networks
- 8.15 A5G Networks
- 8.16 AAEON Technology (ASUS ASUSTeK Computer)
- 8.17 Aarna Networks
- 8.18 ABB
- 8.19 ABEL Mobilfunk
- 8.20 ABiT Corporation
- 8.21 ABS
- 8.22 Abside Networks
- 8.23 Accedian
- 8.24 AccelerComm
- 8.25 Accelink Technologies
- 8.26 Accelleran
- 8.27 Accenture
- 8.28 Access Spectrum
- 8.29 Accton Technology Corporation
- 8.30 Accuver (InnoWireless)
- 8.31 ACE Technologies
- 8.32 AceTel (Ace Solutions)
- 8.33 Achronix Semiconductor Corporation
- 8.34 ACOME
- 8.35 Actelis Networks
- 8.36 Action Technologies (Shenzhen Action Technologies)
- 8.37 Actiontec Electronics
- 8.38 Active911
- 8.39 Actus Networks
- 8.40 Adax
- 8.41 Adcor Magnet Systems
- 8.42 ADI (Analog Devices, Inc.)
- 8.43 ADLINK Technology
- 8.44 ADRF (Advanced RF Technologies)
- 8.45 ADT
- 8.46 Adtran
- 8.47 Advanced Energy Industries
- 8.48 AdvanceTec Industries
- 8.49 Advantech
- 8.50 Advantech Wireless Technologies (Baylin Technologies)

- 8.51 Aegex Technologies
- 8.52 Aerial Applications
- 8.53 Aeris
- 8.54 Aerostar International
- 8.55 Aethertek
- 8.56 Affarii Technologies
- 8.57 Affirmed Networks (Microsoft Corporation)
- 8.58 AFL Global
- 8.59 AFRY
- 8.60 Agile (Agile Interoperable Solutions)
- 8.61 AGIS (Advanced Ground Information Systems)
- 8.62 AGM Mobile
- 8.63 AH NET (MVM NET)
- 8.64 AI-LINK
- 8.65 AINA Wireless
- 8.66 Airbus/SLC (Secure Land Communications)
- 8.67 Airfide Networks
- 8.68 Airgain
- 8.69 AirHop Communications
- 8.70 Airlinq
- 8.71 Airspan Networks
- 8.72 Airtower Networks
- 8.73 Airwavz Solutions
- 8.74 AIS (Advanced Info Service)
- 8.75 AiVader
- 8.76 Akamai Technologies
- 8.77 Akoustis Technologies
- 8.78 Alaxala Networks Corporation (Fortinet)
- 8.79 ALBEDO Telecom
- 8.80 albis-elcon (JET United Electronic Technology)
- 8.81 Alcadis
- 8.82 Alea (Leonardo)
- 8.83 Alef (Alef Edge)
- 8.84 Alepo
- 8.85 Alibaba Group
- 8.86 Aliniant
- 8.87 Allbesmart
- 8.88 Allen Vanguard Wireless
- 8.89 Allerio

- 8.90 Allied Telesis
- 8.91 Allot
- 8.92 Alpha Networks
- 8.93 Alpha Wireless
- 8.94 Alsatis Reseaux
- 8.95 Alstom
- 8.96 Altaeros
- 8.97 Altair Semiconductor (Sony Semiconductor Israel)
- 8.98 ALTAN Redes
- 8.99 Altice Group
- 8.100 ALVIS (Argentina)
- 8.101 AM Telecom
- 8.102 Amantya Technologies
- 8.103 Amarisoft
- 8.104 Amazon/AWS (Amazon Web Services)
- 8.105 Ambra Solutions-ECOTEL
- 8.106 AMD (Advanced Micro Devices)
- 8.107 Amdocs
- 8.108 America Movil
- 8.109 American Tower Corporation
- 8.110 AMI (American Megatrends International)
- 8.111 AMIT Wireless
- 8.112 Ampere Computing
- 8.113 Amphenol Corporation
- 8.114 Ampleon
- 8.115 Amtele Communication
- 8.116 Andesat
- 8.117 ANDRO Computational Solutions
- 8.118 Anktion (Fujian) Technology
- 8.119 Anokiwave
- 8.120 Anritsu
- 8.121 ANS Advanced Network Services (Charge Enterprises)
- 8.122 Antenna Company
- 8.123 Anterix
- 8.124 Antevia Networks
- 8.125 Antna Antenna Technology
- 8.126 Aorotech
- 8.127 Apple
- 8.128 APRESIA Systems

- 8.129 APSTAR (APT Satellite Company)
- 8.130 APT (Asia Pacific Telecom)
- 8.131 aql
- 8.132 Aquila (Suzhou Aquila Solutions)
- 8.133 Aqura Technologies (Telstra Purple)
- 8.134 Arabsat
- 8.135 Arcadyan Technology Corporation (Compal Electronics)
- 8.136 Archos
- 8.137 Arctic Semiconductor (Formerly SiTune Corporation)
- 8.138 Arete M
- 8.139 Argela
- 8.140 ArgoNET
- 8.141 Aria Networks
- 8.142 Arista Networks
- 8.143 Arkessa (Wireless Logic Group)
- 8.144 Arm
- 8.145 Armour Communications
- 8.146 Arqit Quantum
- 8.147 ArrayComm (Chengdu ArrayComm Wireless Technologies)
- 8.148 Arrcus
- 8.149 Artemis Networks
- 8.150 Artiza Networks
- 8.151 Aruba (HPE Hewlett Packard Enterprise)
- 8.152 Arukona
- 8.153 Asavie
- 8.154 ASELSAN
- 8.155 AsiaInfo Technologies
- 8.156 AsiaSat (Asia Satellite Telecommunications Company)
- 8.157 Askey Computer Corporation (ASUS ASUSTeK Computer)
- 8.158 ASOCS
- 8.159 Aspire Technology (NEC Corporation)
- 8.160 ASR Microelectronics
- 8.161 AST SpaceMobile
- 8.162 ASTELLA (Astella Technologies)
- 8.163 ASTRI (Hong Kong Applied Science and Technology Research Institute)
- 8.164 ASUS (ASUSTeK Computer)
- 8.165 Asylon
- 8.166 AT&T
- 8.167 Ataya

- 8.168 ATDI
- 8.169 ATEL (Asiatelco Technologies)
- 8.170 Atel Antennas
- 8.171 Atesio
- 8.172 Athonet (HPE Hewlett Packard Enterprise)
- 8.173 ATL A Test Lab (Eurofins E&E Electrical and Electronics)
- 8.174 Atlas Telecom
- 8.175 AtlasEdge (Liberty Global/DigitalBridge Group)
- 8.176 ATN International
- 8.177 Atos
- 8.178 Atrinet
- 8.179 Attabotics
- 8.180 AttoCore
- 8.181 Auden Techno
- 8.182 Auray Technology (Auden Techno)
- 8.183 Avanti Communications
- 8.184 Avari Wireless
- 8.185 AVI
- 8.186 Aviat Networks
- 8.187 Avidyne Corporation
- 8.188 AVIWEST (Haivision)
- 8.189 AVM
- 8.190 AW2S Advanced Wireless Solutions and Services (SERMA Group)
- 8.191 AWTG
- 8.192 AXESS Networks (HISPASAT)
- 8.193 Axians (VINCI Energies)
- 8.194 Axiata Group
- 8.195 Axione
- 8.196 Axis Communications
- 8.197 Axon
- 8.198 Axtel
- 8.199 Axxcelera Broadband Wireless (Axxcss Wireless Solutions)
- 8.200 Axxcss Wireless Solutions
- 8.201 Azcom Technology
- 8.202 Azetti Networks
- 8.203 B+B SmartWorx (Advantech)
- 8.204 BAE Systems
- 8.205 Baicells
- 8.206 Ball Aerospace

- 8.207 Ballast Networks
- 8.208 BandRich
- 8.209 BandwidthX
- 8.210 Barrett Communications (Motorola Solutions)
- 8.211 BATS Wireless (Broadband Antenna Tracking Systems)
- 8.212 BAYFU (Bayerische Funknetz)
- 8.213 Baylin Technologies
- 8.214 BBB (BB Backbone Corporation)
- 8.215 BBK Electronics
- 8.216 BCDVideo
- 8.217 Beam Semiconductor
- 8.218 Beamlink
- 8.219 BearCom
- 8.220 BEC Technologies (Billion Electric)
- 8.221 becon
- 8.222 Beeper Communications
- 8.223 Beijer Electronics Group
- 8.224 Belden
- 8.225 BelFone
- 8.226 Bell Canada
- 8.227 Bellantenna
- 8.228 Benetel
- 8.229 BesoVideo
- 8.230 Betacom
- 8.231 Bharti Airtel
- 8.232 BHE (Bonn Hungary Electronics)
- 8.233 BICS (Proximus)
- 8.234 BinnenBereik (NOVEC)
- 8.235 Bird Technologies
- 8.236 BISDN (Berlin Institute for Software Defined Networks)
- 8.237 Bittium
- 8.238 BK Technologies
- 8.239 Black & Veatch
- 8.240 Black Box
- 8.241 BlackBerry
- 8.242 Blackned
- 8.243 BLiNQ Networks (CCI Communication Components Inc.)
- 8.244 Blu Wireless
- 8.245 Blue Arcus Technologies

- 8.246 Blue Wireless
- 8.247 Bluebird
- 8.248 Blueforce Development Corporation
- 8.249 BLUnet Schweiz (Axpo WZ-Systems)
- 8.250 Boeing/Aurora Flight Sciences
- 8.251 Boelink (Shanghai Boelink Communication Technology)
- 8.252 Boingo Wireless (DigitalBridge Group)
- 8.253 Boldyn Networks (Formerly BAI Communications)
- 8.254 Bombardier
- 8.255 Booz Allen Hamilton
- 8.256 Boston Dynamics
- 8.257 Bouygues Telecom
- 8.258 Boxchip
- 8.259 Branch Communications
- 8.260 BravoCom
- 8.261 Bredengen
- 8.262 Broadcom
- 8.263 BroadForward
- 8.264 Broadmobi Shanghai Broadmobi Communication Technology (Wutong Group)
- 8.265 Broadpeak
- 8.266 Broadtech
- 8.267 BSNL (Bharat Sanchar Nigam Limited)
- 8.268 BT Group
- 8.269 BTI Wireless
- 8.270 BubbleRAN
- 8.271 Bullitt Mobile
- 8.272 Bumicom Telecommunicatie
- 8.273 Bureau Veritas/7Layers
- 8.274 BVSystems (Berkeley Varitronics Systems)
- 8.275 BWT (BlueWaveTel)
- 8.276 BYD
- 8.277 B-Yond
- 8.278 C Spire
- 8.279 C Squared Systems
- 8.280 C3Spectra
- 8.281 CableFree (Wireless Excellence)
- 8.282 CableLabs
- 8.283 CACI International/LGS Innovations
- 8.284 Cadence Design Systems

- 8.285 CalAmp
- 8.286 CalChip Connect
- 8.287 Caliber Public Safety
- 8.288 Calix
- 8.289 Calnex Solutions
- 8.290 Caltta Technologies
- 8.291 Cambium Networks
- 8.292 Cambridge Consultants (Capgemini Invent)
- 8.293 CampusGenius
- 8.294 Canoga Perkins
- 8.295 Canonical
- 8.296 Capgemini Engineering
- 8.297 CapX Nederland
- 8.298 Carbyne
- 8.299 Casa Systems (Axyom & NetComm Portfolio)
- 8.300 CASIC (China Aerospace Science and Industry Corporation)
- 8.301 Casio Computer Company
- 8.302 Castor Marine
- 8.303 Catalyst Communications Technologies
- 8.304 Cavli Wireless
- 8.305 CBNG (Cambridge Broadband Networks Group)
- 8.306 CCI (Communication Components Inc.)
- 8.307 CCN (Cirrus Core Networks)
- 8.308 CCww (Communications Consultants Worldwide)
- 8.309 Cegeka
- 8.310 CeLa Link Corporation
- 8.311 Celfinet (Cyient)
- 8.312 CellAntenna Corporation
- 8.313 Cellcomm Solutions
- 8.314 Cellient
- 8.315 Celling 5G
- 8.316 CellMax Technologies (Rosenberger)
- 8.317 Cellnex Telecom
- 8.318 Cellwize (Qualcomm)
- 8.319 cellXica
- 8.320 cellXion
- 8.321 Celona
- 8.322 CelPlan Technologies
- 8.323 Centerline Communications

- 8.324 CENTRA Technology
- 8.325 CentralSquare Technologies
- 8.326 Ceragon Networks
- 8.327 Cerillion
- 8.328 CertusNet
- 8.329 CETC (China Electronics Technology Group Corporation)
- 8.330 CETIN Group
- 8.331 CEVA
- 8.332 CGI
- 8.333 Challenge Networks (Vocus)
- 8.334 Charter Communications
- 8.335 Cheerzing (Xiamen Cheerzing IoT Technology)
- 8.336 Chelton
- 8.337 Chemring Technology Solutions
- 8.338 Chengdu NTS
- 8.339 China All Access
- 8.340 China Mobile
- 8.341 China Satcom (China Satellite Communications)
- 8.342 China Telecom
- 8.343 China Unicom
- 8.344 Chunghwa Telecom
- 8.345 Cibicom
- 8.346 CICT China Information and Communication Technology Group (China Xinke Group)
- 8.347 Ciena Corporation
- 8.348 CIG (Cambridge Industries Group)
- 8.349 CIO (Connected IO)
- 8.350 Cirpack
- 8.351 Cisco Systems
- 8.352 Citymesh (Cegeka/DIGI Communications)
- 8.353 CitySwitch
- 8.354 CKH IOD (CK Hutchison)
- 8.355 Clavister
- 8.356 Clever Logic
- 8.357 CloudMinds
- 8.358 CMIoT (China Mobile IoT)
- 8.359 Cobham
- 8.360 COCUS
- 8.361 Codan Communications

- 8.362 Codium Networks
- 8.363 Cogisys
- 8.364 Cognizant
- 8.365 Cohere Technologies
- 8.366 Coherent (Formerly II-VI)
- 8.367 Coherent Logix
- 8.368 Coiler Corporation
- 8.369 Collinear Networks (EOS Electro Optic Systems)
- 8.370 Collins Aerospace (RTX Corporation)
- 8.371 Colt Technology Services
- 8.372 Com4 (Wireless Logic Group)
- 8.373 Comander (ANDRA)
- 8.374 Comarch
- 8.375 Comba Telecom
- 8.376 Combain Mobile
- 8.377 Comcast Corporation
- 8.378 Comcores
- 8.379 Comfone
- 8.380 COMLAB
- 8.381 CommAgility (E-Space)
- 8.382 CommandWear Systems
- 8.383 Commnet Wireless (ATN International)
- 8.384 Comms365
- 8.385 CommScope
- 8.386 Compal Electronics
- 8.387 Comprod
- 8.388 Comptek Technologies (Aero Wireless Group)
- 8.389 Comrod Communication Group
- 8.390 COMSovereign
- 8.391 Comtech Telecommunications Corporation
- 8.392 Comtest Wireless
- 8.393 Comtrend Corporation
- 8.394 Comviva (Tech Mahindra)
- 8.395 CONET Technologies
- 8.396 CONEXIO Corporation
- 8.397 CONGIV (ROBUR Industry Service Group)
- 8.398 Connect Tech
- 8.399 Connect44 Group
- 8.400 Connectivity Wireless Solutions (M/C Partners)

- 8.401 Consort Digital
- 8.402 Contela
- 8.403 Coolpad
- 8.404 CopaSAT
- 8.405 coreNOC
- 8.406 Cornerstone (CTIL)
- 8.407 Cornet Technology
- 8.408 Corning
- 8.409 Cortina Access
- 8.410 Cosemi Technologies
- 8.411 COSMOTE (OTE Group)
- 8.412 Council Rock
- 8.413 Coweaver
- 8.414 Cox Communications
- 8.415 Cradlepoint (Ericsson)
- 8.416 Creanord
- 8.417 CrisisGo
- 8.418 CROSSCALL

- 8.1823 Zhengkai Electronics (Jiangsu Zhengkai Electronics Technology) 2401
- 8.1824 ZILLNK 2402
- 8.1825 Zinwave (Wilson Electronics) 2403
- 8.1826 Zioncom 2404
- 8.1827 Zmtel (Shanghai Zhongmi Communication Technology) 2405
- 8.1828 ZT Systems 2406
- 8.1829 ZTE 2407
- 8.1830 Zyxel (Unizyx Holding Corporation) 2409

9 CHAPTER 9: MARKET SIZING & FORECASTS 2410

- 9.1 Global Outlook for Private 5G Networks 2410
- 9.2 Infrastructure Submarkets 2411
 - 9.2.1 5G NR RAN 2411
 - 9.2.1.1 Base Station RUs 2412
 - 9.2.1.2 DUs/CUs 2413
 - 9.2.2 5GC 2414

- 9.2.2.1 UPF 2415
- 9.2.2.2 Control Plane 2415
- 9.2.3 5G Transport 2416
 - 9.2.3.1 Fiber & Wireline 2416
 - 9.2.3.2 Microwave 2417
 - 9.2.3.3 Satellite Communications 2417
- 9.3 Cell Sizes 2418
 - 9.3.1 Indoor Small Cells 2419
 - 9.3.2 Outdoor Small Cells 2420
 - 9.3.3 Macrocells 2421
- 9.4 Frequency Ranges 2422
 - 9.4.1 Sub-6 GHz 2423
 - 9.4.2 mmWave 2424
- 9.5 End User Markets & Verticals 2425
 - 9.5.1 Vertical Industries 2425
 - 9.5.1.1 Agriculture 2427
 - 9.5.1.2 Aviation 2428
 - 9.5.1.3 Broadcasting 2429
 - 9.5.1.4 Construction 2430
 - 9.5.1.5 Education 2431
 - 9.5.1.6 Forestry 2432
 - 9.5.1.7 Healthcare 2433
 - 9.5.1.8 Manufacturing 2434
 - 9.5.1.9 Military 2435
 - 9.5.1.10 Mining 2436
 - 9.5.1.11 Oil & Gas 2437
 - 9.5.1.12 Ports & Maritime Transport 2438
 - 9.5.1.13 Public Safety 2439
 - 9.5.1.14 Railways 2440
 - 9.5.1.15 Utilities 2441
 - 9.5.1.16 Warehousing & Others 2442
 - 9.5.2 Offices, Buildings & Public Venues 2443
- 9.6 Regional Segmentation 2444
 - 9.6.1 North America 2444
 - 9.6.1.1 Infrastructure Submarkets 2444
 - 9.6.1.2 End User Markets & Verticals 2445
 - 9.6.2 Asia Pacific 2446
 - 9.6.2.1 Infrastructure Submarkets 2446
 - 9.6.2.2 End User Markets & Verticals 2447

- 9.6.3 Europe 2448
 - 9.6.3.1 Infrastructure Submarkets 2448
 - 9.6.3.2 End User Markets & Verticals 2449
- 9.6.4 Middle East & Africa 2450
 - 9.6.4.1 Infrastructure Submarkets 2450
 - 9.6.4.2 End User Markets & Verticals 2451
- 9.6.5 Latin & Central America 2452
 - 9.6.5.1 Infrastructure Submarkets 2452
 - 9.6.5.2 End User Markets & Verticals 2453

10 CHAPTER 10: CONCLUSION & STRATEGIC RECOMMENDATIONS 2455

- 10.1 Why is the Market Poised to Grow? 2455
- 10.2 Future Roadmap: 2024 2030 2457
 - 10.2.1 2024 2026: Continued Spending on Standalone Private 5G Networks 2457
 - 10.2.2 2027 2029: Widespread Adoption of Industrial-Grade 5G Advanced NPNs 2458
 - 10.2.3 2030 & Beyond: Towards Private 6G Connectivity for Future Applications 2458
- 10.3 Reviewing the Real-World Benefits of Private 5G Networks 2459
 - 10.3.1 Efficiency Gains 2459
 - 10.3.2 Cost Savings 2462
 - 10.3.3 Worker Safety 2465
- 10.4 Vendor & Solution Provider Landscape 2466
 - 10.4.1 Acquisitions, Consolidation & Partnerships 2466
 - 10.4.2 Industry 4.0 Connectivity Solutions From Alternative Private 5G Infrastructure Suppliers 2467
 - 10.4.3 Enabling the Testing of Domestically Produced 5G Network Equipment 2467
 - 10.4.4 National Mobile Operators Continue to Retain a Significant Presence 2467
 - 10.4.5 Emergence of New Classes of Private Network Service Providers 2468
 - 10.4.6 Opportunities for Global System Integrators & Hyperscalers 2468
 - 10.4.7 Startups Targeting Private 5G Security, Management & Orchestration Needs 2469
- 10.5 IIoT Remains the Central Driver for Private 5G Investments 2469
- 10.6 Reducing Reliance on Hard-Wired Cabling in Industrial & Enterprise Settings 2469
- 10.7 Driving the Convergence of IT & OT Domains With Industrial-Grade 5G Connectivity 2470
- 10.8 The Growing Role of 5G Network Slicing & Hybrid Public-Private Networks 2470
- 10.9 China Serving as a Proving Ground for Large-Scale Private 5G Projects 2471
- 10.10 Commercial Availability of Vertical Industry-Specific 3GPP Features 2471
- 10.11 5G Advanced Trials for Time-Sensitive Industrial Control Applications 2472

- 10.12 Spectrum Liberalization: Shared & Local Area Licensing Frameworks 2472
- 10.13 Mid-Band 5G NR RAN Installations Dominate the Market 2473
- 10.14 Prospects of Private 5G Networks in mmWave Spectrum 2473
- 10.15 Preliminary Deployments of 5G NR-U Technology 2474
- 10.16 Relationship Between Private 5G & Wi-Fi 6/6E/7 Systems 2474
- 10.17 Overlap With Neutral Host Networks for In-Building Coverage 2475
- 10.18 Synergies Between Private 5G Networks & Edge Computing 2475
- 10.19 Open RAN & vRAN (Virtualized RAN) Adoption in Private 5G Infrastructure 2476
- 10.20 SON & AI-Based Automation: Easing the Role of Enterprise IT Departments 2476
- 10.21 Satellite Backhaul & Direct-to-Device NTN Access for Coverage Extension 2477
- 10.22 Interconnectivity & Roaming in Private 5G Networks 2477
- 10.23 Strategic Recommendations 2478
 - 10.23.1 5G Equipment & Chipset Suppliers 2478
 - 10.23.2 System Integrators & Private Network Specialists 2478
 - 10.23.3 National Mobile Network Operators 2479
 - 10.23.4 End User Organizations & Vertical Industries 2480

I would like to order

Product name: Private 5G Networks: 2024 – 2030 – Opportunities, Challenges, Strategies & Forecasts

Product link: <https://marketpublishers.com/r/P2F68AC6FEE2EN.html>

Price: US\$ 2,500.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:

info@marketpublishers.com

Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page <https://marketpublishers.com/r/P2F68AC6FEE2EN.html>

To pay by Wire Transfer, please, fill in your contact details in the form below:

First name:
Last name:
Email:
Company:
Address:
City:
Zip code:
Country:
Tel:
Fax:
