Abstracts

The Global Third-party logistics market is spurring the market growth in the wake of making safely and timely delivering of goods. The global third-party logistics market has the potential to grow with USD 1785.24 billion with bolstering CAGR in the forecast period from 2020-2027. The integration model of the third-party logistics information platform ushered in a great opportunity for development. Also, emerging globalization, industrialization, and the prevalence of the internet are propelling the demand for the 3PL market.

The essence of logistics services is to create a third profit source by reducing logistics costs. The service objects of third-party logistics are numerous enterprises and goods. The third-party logistics service providers gather many scattered products, process a large amount of logistics information through the information technology system, coordinate and optimize the distribution route, and effectively reduce the vehicle empty load rate.

Third-party logistics has the characteristics of contractualization, and it regulates the relationship between logistics operators and logistics consumers through the form of contracts. The demand for third-party logistics includes not only the traditional logistics essential functions such as warehousing and transportation but also for various value-added services. The need for 3PL can help maintain the balance between supply and demand of 3PL and improve the efficiency and benefit of social logistics activities.
