Executive Summary

Internet based cloud computing assists in the sharing of technological resources, software and digital information. The cloud storage services are economical and have back up services as well as recovery systems. In contrast to physical storage, they need nearly zero maintenance.

Though in India this market is currently at its nascent stage, it is expected that by 2017, the market will be worth USD 1 billion. The key driver will be the increasing growth in the digital information space which will generate a noteworthy market opportunity for both cloud computing and storage. Research shows that consumers are now adopting a more trusting attitude towards the cloud services and many of them as well as enterprise users are choosing it.
