Abstracts

Executive Summary

The In-Vitro Diagnostics (IVD) industry endured the impact of the global recession, with key players introducing more efficient and effective devices. The growth in the Asian region is driving the growth of the global IVD market. Within Asia, the IVD market is dominated by China and India, where factors such as rising awareness, increased patient self testing and economic affluence are supporting the growth of the IVD sector. The prevalence of chronic and infectious diseases in the region has led to the increased focus of the governments on improving the healthcare facilities.

The segments expected to witness high growth in the Asia IVD market are molecular diagnostics, point-of-care tests and self-monitoring blood glucose. However, the industry is struggling with challenges such as high R&D costs, quality disparities in the region, complex technology and regulatory issues.
