SUMMARY

The Global Car seat Industry Situation and Prospects Research report is a professional and in-depth study on the current state of the Car seat industry.

In 2016, the world economy expanded by just 2.2 per cent, the slowest rate of growth since the Great Recession of 2009. Underpinning the sluggish global economy are the feeble pace of global investment, dwindling world trade growth, flagCar seatg productivity growth and high levels of debt. Given the close Car seats between demand, investment, trade and productivity, the extended episode of weak global growth may prove self-perpetuating in the absence of concerted policy efforts to revive investment and foster a recovery in productivity.
