Abstracts

The study will be available in electronic form, after an order is received, within 6 days.

Competition is harsh, due to the large number of companies and the level of offered prices, as Greece has a low-bid procurement system.

The construction sector in the EU has shown continuous decline in recent years, with the exception of 2011, due to the economic crisis. The measures adopted to balance the member states' deficits and public debt have led to a decrease in public investments, greatly reducing construction activities.

This study was compiled by STOCHASIS Management Consultancy S.A. and aims to reflect the current state of the market of the construction companies (7th, 6th, 5th class) in Greece and to examine its prospects, while presenting information on the international market.

More specifically, the first five chapters of the study feature information on the construction companies (7th, 6th, 5th class), which refer to general characteristics, the institutional framework, the demand, the offer and the size of the industry. In the sixth chapter of the study we will present information on the relevant market internationally. Finally, we will present the conclusions and the prospects of the market, as well as an annex with selected financial indicators of the main companies.

Contents

SYNOPSIS

INTRODUCTION

1. GENERAL INFORMATION

- 1.1 Definition
- 1.2 Classification of Construction Companies

2. INSTITUTIONAL FRAMEWORK

3. DEMAND

- 3.1 Determinants of demand
