## Abstracts

The study will be available in electronic form, after an order is received, within 6 days.

This study was compiled by STOCHASIS Management Consultancy S.A. and aims to reflect the current state of the market of the mining and quarrying companies in Greece and to examine its prospects, while presenting information on the international market.

More specifically, the first five chapters of the study feature information on the mining and quarrying companies, which refer to general characteristics, the institutional framework, the demand, the offer and the size of the industry. In the sixth chapter of the study we will present information on the relevant market internationally, with emphasis on EU-27. Finally, we will present the conclusions and the prospects of the market, as well as an annex with selected financial indicators of major enterprises.

It is estimated that in 2014, the market (in value terms), of the examined products will present a minor increase compared to 2013, which will form at a range of approximately 2%. In 2015, further increase is forecasted, estimated at a more than double size compared to that of 2014/2013, on condition that the economic circumstances of the country will improve.
