The study will be available in electronic form, after an order is received, within 6 days.

The national target of 20% RES share in gross final energy consumption in Greece by 2020 has led to the adoption of certain development and environmental policies, which contributed to the increase of investor interest in photovoltaics.

This study was compiled by STOCHASIS Management Consultancy S.A. and aims to reflect the current state of the Photovoltaics in Greece and to examine its prospects, while presenting information on the european market.

More specifically, the first five chapters of the study feature information on the Photovoltaics, which refer to general characteristics, the institutional framework, the demand, the offer and the size of the industry. In the sixth chapter of the study we will present information on the relevant market internationally, with emphasis on EU-28. Finally, we will present the conclusions and the prospects of the market, as well as an annex with selected financial indicators of major enterprises.
