Abstracts

Incontinence - sometimes called urinary incontinence - is the inability to hold urine in the bladder. Urinary incontinence is not a disorder. It is actually a symptom of other conditions and has many possible causes. Urinary incontinence is twice as common in women as in men and affects at least 1 in 3 older women. According to StrategyHelix, the adult incontinence products market in Switzerland is projected to expand by a CAGR of 3.4% from 2021 through 2027. Rising demand for adult incontinence products from the geriatric population base, increasing acceptance of adult incontinence products are expected to boost the market growth in the coming years.

The report provides up-to-date market size data for period 2017-2020 and forecast to 2027 covering key market aspects like sales value for adult incontinence products. The Switzerland adult incontinence products market is segmented on the basis of product, and distribution channel. Based on product, the adult incontinence products market in Switzerland is categorized into light incontinence products, moderate & heavy incontinence products. The light incontinence products segment held the largest share of the Switzerland adult incontinence products market in 2020 and is anticipated to hold its share during the forecast period. On the basis of distribution channel, the adult incontinence products market in Switzerland has been segmented into hypermarkets, supermarkets, health & beauty stores, online retailing, others.
