Abstracts

Agrochemicals (also called agricultural chemicals) defines a wide range of specifically engineered chemicals, such as pesticides, insecticides, fungicides, and others that effectively enhance the crop productivity by increasing soil fertility and protecting the crops against pests and weeds. They play a crucial role in agriculture, as they improve crop performance, increase crop yields, and control pests and weeds that impede plant growth. The agrochemicals market in Europe in terms of revenue is set to grow by US\$ 7 billion during 2021-2027, growing at a compound annual growth rate (CAGR) of 2.9% during the forecast period, according to data and analytics company StrategyHelix.

The report provides up-to-date market size data for period 2017-2020 and forecast to 2027 covering key market aspects like sales value and volume for agrochemicals. The Europe agrochemicals market is segmented on the basis of type. By type, it is categorized into fertilizer (synthetic fertilizers, bio fertilizers), and pesticide (insecticides, herbicides, fungicides, others). The fertilizer segment held the largest market share in 2020. However, the pesticide segment is expected to witness the highest CAGR during the forecast period.
