Abstracts

Air conditioning (AC) is a system used to cool down the temperature in an inside space by removing the existing heat and moisture from the room. It is essential to a comfortable home or work environment. According to StrategyHelix, the air conditioning market in Malaysia in terms of volume expanded by 3.3 percent, to 1,002 thousand units, in 2018 compared to the previous year.

The report provides up-to-date market size data covering key market aspects like volume for air conditioning. The Malaysia air conditioning market is segmented on the basis of type. Based on type, the air conditioning market in Malaysia is categorized into room AC, commercial AC. The room AC segment held the largest share of the Malaysia air conditioning market in 2018 and is anticipated to hold its share during the forecast period.

The room AC market is further segmented into window air conditioners, and split air conditioners. In 2018, the split air conditioners segment made up the largest share of the air conditioning market. Furthermore, the commercial AC market has been categorized into PAC air conditioners, and VRF air conditioners. Among these, the PAC air conditioners segment was accounted for the largest share of the market in 2018.

The report is an invaluable resource for companies and organizations active in this industry. It provides a cohesive picture of the air conditioning market to help drive informed decision making for industry executives, policy makers, academic, and analysts.
