## Abstracts

Air conditioning (AC) is a system used to cool down the temperature in an inside space by removing the existing heat and moisture from the room. It is essential to a comfortable home or work environment. The air conditioning market in Norway in terms of volume expanded by 19.6 percent, to 67 thousand units, in 2018 compared to the previous year, according to StrategyHelix.

The report provides up-to-date market size data covering key market aspects like volume for air conditioning. The Norway air conditioning market is segmented on the basis of type. By type, the air conditioning market in Norway has been segmented into room AC, commercial AC. According to the research, the room AC segment had the largest share in the air conditioning market in Norway.

The room AC market is further segmented into window air conditioners, and split air conditioners. StrategyHelix research indicates that the split air conditioners segment occupied the largest share of this market in 2018. Furthermore, the commercial AC market has been categorized into PAC air conditioners, and VRF air conditioners. In Norway, the PAC air conditioners segment made up the largest share of the air conditioning market.

The report is an invaluable resource for companies and organizations active in this industry. It provides a cohesive picture of the air conditioning market to help drive informed decision making for industry executives, policy makers, academic, and analysts.
