Abstracts

According to StrategyHelix, the global 5g infrastructure market is expected to increase by US\$ 86,915 million during 2021-2027, expanding at a CAGR of 48.9% during the forecast period. Increasing IoT connections due to involvement of various devices, increasing data traffic and demand from end consumers, growing demand for high speed and large network coverage are expected to boost the market growth in the coming years.

The report provides up-to-date market size data for period 2017-2020 and forecast to 2027 covering key market aspects like sales value for 5g infrastructure. The global 5g infrastructure market is segmented on the basis of communication infrastructure, operational frequency, end-use, and region. Based on communication infrastructure, the global 5g infrastructure market is categorized into radio access networks, core network, transport networks. Globally, the radio access networks segment made up the largest share of the 5g infrastructure market. On the basis of operational frequency, the global 5g infrastructure market has been segmented into sub 6 GHz, above 6 GHz. The sub 6 GHz segment captured the largest share of the market in 2020. By end-use, the global 5g infrastructure market has been segmented into industrial, commercial, government, residential. According to the research, the industrial segment had the largest share in the global 5g infrastructure market. Geographically, the global 5g infrastructure market is segmented into North America, Asia Pacific, Europe, Rest of the World (ROW).

The global 5g infrastructure market is highly competitive. Key companies profiled in the report include Airspan Networks Inc., Cisco Systems Inc., Comba Telecom Systems Holdings Limited, CommScope Holding Company Inc., Hewlett Packard Enterprise Development LP, Huawei Technologies Co. Ltd., Mavenir Systems Inc., NEC Corporation, Nokia Corporation, Qualcomm Technologies Inc., Samsung Electronics Co. Ltd, ZTE Corporation.

Report Scope

Communication infrastructure: radio access networks, core network, transport networks

Operational frequency: sub 6 GHz, above 6 GHz

End-use: industrial, commercial, government, residential

Region: North America, Asia Pacific, Europe, Rest of the World (ROW)

Years considered: this report covers the period 2017 to 2027
