## Abstracts

Ceramics are increasingly being used in commercial and military aircraft, and have been used in space shuttles for many years. Ceramic materials are generally lighter than metals, and this low mass makes them highly appealing to the aerospace industry. A study by StrategyHelix indicates that the global aerospace ceramics market is expected to increase by US\$ 3,326 million from 2021 to 2027, garnering a CAGR of 9.8% during the forecast period.

The report provides up-to-date market size data for period 2017-2020 and forecast to 2027 covering key market aspects like sales value for aerospace ceramics. The global aerospace ceramics market is segmented on the basis of product, segment, and region. Based on product, the global aerospace ceramics market is categorized into oxide ceramics, non-oxide ceramics, composites. On the basis of segment, the global aerospace ceramics market has been segmented into commercial aerospace, defense, others. The commercial aerospace segment captured the largest share of the market in 2020. In terms of geography, the global aerospace ceramics market has been segmented into North America, Asia Pacific, Europe, Rest of the World (ROW).

The global aerospace ceramics market is highly competitive. As of 2020, the major players in the global aerospace ceramics market were Advanced Composites Inc., Applied Ceramics Inc., Compagnie de Saint-Gobain S.A., Composites Horizons LLC, CoorsTek Inc., Corning Inc., Hexcel Corporation, Honeywell International Inc., International Syalons Ltd., The 3M Company.

### Report Scope

Product: oxide ceramics, non-oxide ceramics, composites

Segment: commercial aerospace, defense, others

Region: North America, Asia Pacific, Europe, Rest of the World (ROW)

Years considered: this report covers the period 2017 to 2027
