Abstracts

High-purity solvents are synthetically distilled organic chemicals with a wide range of applications in industry. The global high purity solvents market in terms of revenue is set to grow by US\$ 11 billion during 2021-2027, growing at a compound annual growth rate (CAGR) of 5.8% during the forecast period, according to data and analytics company StrategyHelix.

The report provides up-to-date market size data for period 2017-2020 and forecast to 2027 covering key market aspects like sales value for high purity solvents. The global high purity solvents market is segmented on the basis of product, type, end use, and region. By product, it is categorized into polar solvent, and non-polar solvent. The non-polar solvent segment held the largest market share in 2020. By type, the high purity solvents market is divided into GC Grade, HPLC grade, spectrophotometric grade, UHPLC grade, and others. Based on end use, the high purity solvents market is divided into agricultural, biotechnology, cosmetics, electrical & electronics, food & beverage, laboratories, paints & coatings, pharmaceuticals, and others.

The report has profiled some of the key players of the market such as Akzo Nobel N.V., Asahi Kasei Corporation, BASF SE, Dow Chemical Company, Evonik Industries AG, Exxon Mobil Corporation, Linde plc, Merck Group.

The report is an invaluable resource for companies and organizations active in this industry. It provides a cohesive picture of the high purity solvents market to help drive informed decision making for industry executives, policy makers, academic, and analysts.
