Abstracts

Nerve monitoring systems enable surgeons to identify, confirm, and monitor motor nerve function to help reduce the risk of nerve damage during various procedures, including ENT and general surgeries. The global nerve monitoring system market is poised to grow by US\$ 493 million from 2021 to 2027, registering a CAGR of 6.3% during the forecast period, according to StrategyHelix. Increasing awareness of healthcare professionals about clinical benefits associated with nerve monitoring, growing surgical volumes and rising usage rates of nerve monitoring systems worldwide are expected to boost the market growth in the coming years.

The report provides up-to-date market size data for period 2017-2020 and forecast to 2027 covering key market aspects like sales value for nerve monitoring system. The global nerve monitoring system market is segmented on the basis of technology, application, end user, and region. By technology, the global nerve monitoring system market has been segmented into evoked potential, electromyography (EMG), electroencephalography (EEG). The evoked potential segment was the largest contributor to the global nerve monitoring system market in 2020. Based upon application, the global nerve monitoring system market is categorized into neurosurgery, orthopedic surgery, ENT surgery, cardiovascular surgery, others. On the basis of end user, the global nerve monitoring system market has been segmented into hospitals and surgical centers, ambulatory surgical centers. In terms of geography, the global nerve monitoring system market has been segmented into North America, Asia Pacific, Europe, Rest of the World (ROW). Globally, North America made up the largest share of the nerve monitoring system market.

The global nerve monitoring system market is highly competitive. The key players in the nerve monitoring system market include Cadwell Industries Inc., Halyard Health Inc., inomed Medizintechnik GmbH, Medtronic plc, Natus Medical Incorporated, Neurosign, Neurovision Medical Products Inc., Nihon Kohden Corporation, NuVasive Inc.

Report Scope

Technology: evoked potential, electromyography (EMG), electroencephalography (EEG)

Application: neurosurgery, orthopedic surgery, ENT surgery, cardiovascular surgery, others

End user: hospitals and surgical centers, ambulatory surgical centers

Region: North America, Asia Pacific, Europe, Rest of the World (ROW)

Years considered: this report covers the period 2017 to 2027
