Abstracts

Polyimide foam is an extremely lightweight insulation material that exhibits exceptional resistance to heat, low flame propagation, and smoke. Polyimide Foam has unrivalled advantages over traditional insulation materials, making it an ideal material for solving tough problems for marine vessels, rail installations and industrial applications, where non-combustible, high temperature resistant solutions are required. A study by StrategyHelix indicates that the global polyimide foam market is expected to increase at a CAGR of 7.2% till 2027.

The report provides up-to-date market size data for period 2017-2020 and forecast to 2027 covering key market aspects like sales value for polyimide foam. The global polyimide foam market is segmented on the basis of product, application, and region. Based on product, the global polyimide foam market is categorized into thermoplastic polyimide foam, thermosetting polyimide foam. The thermosetting polyimide foam segment captured the largest share of the market in 2020. On the basis of application, the global polyimide foam market has been segmented into construction, oil & gas, automotive & aerospace, marine & defense, others. In terms of geography, the global polyimide foam market has been segmented into North America, Asia Pacific, Europe, MEA, Latin America.

The global polyimide foam market is highly competitive. The competitive landscape of the industry has also been examined along with the profiles of the key players Boyd Corporation, FLEXcon Company Inc., I.S.T Corporation, SUZUKO Corporation, The 3M Company, Trelleborg Applied Technologies, Ube Industries Ltd.

Report Scope

Product: thermoplastic polyimide foam, thermosetting polyimide foam

Application: construction, oil & gas, automotive & aerospace, marine & defense, others

Region: North America, Asia Pacific, Europe, MEA, Latin America

Years considered: this report covers the period 2017 to 2027
