Abstracts

Visual Impairment is recognized as a global significant health problem which has a serious impact on the personal, economic, and social life of an individual. According to the International Agency for the Prevention of Blindness (IAPB), in 2020, nearly 1.1 billion people were considered to be affected by some form of vision loss; 43 million people are categorized as blind, about 553 million people are estimated to suffer from some form of Moderate and Severe Vision Impairment MSVI, about 258 million people experience mild vision impairment and about 510 million suffer from near vision impairment. In addition, at least 1 billion more people need ongoing access to eye care services. The global vision care market is poised to grow by US\$ 15,266 million from 2021 to 2027, registering a CAGR of 3.8% during the forecast period, according to StrategyHelix. Growth in the geriatric population, increasing prevalence of vision-related disorders, rising public and private initiatives to increase vision care awareness and prevent visual impairment ailments and increase in cataract surgeries and adoption of premium IOLs are expected to boost the market growth in the coming years.

The report provides up-to-date market size data for period 2017-2020 and forecast to 2027 covering key market aspects like sales value for vision care. The global vision care market is segmented on the basis of product, eyeglasses type, contact lens design, distribution channel, and region.
